A good reputation is the driving force for our continued development. Our company has absolute credit, so you can rest assured to buy our SSM test guides.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q90-Q95):

NEW QUESTION # 90

What is one benefit of PI Planning?

- A. It fosters cross-team dependencies
- B. It aligns the ART to established DevOps practices
- C. Allows for faster decision-making
- D. It maximizes team capacity

Answer: C

Explanation:

One benefit of PI Planning is that it allows for faster decision-making by bringing together all the members of the Agile Release Train (ART) and the relevant stakeholders in a face-to-face (or virtual) event. PI Planning provides an opportunity for the ART to align on a common vision and mission, review the business context and priorities, identify and resolve dependencies and risks, and commit to a realistic and achievable plan for the next Program Increment (PI). By having everyone involved in the planning process, the ART can leverage the collective knowledge and expertise of the participants, reduce ambiguity and uncertainty, and make informed and timely decisions that support the delivery of value to the customers. (Must be taken from SAFe 6 Scrum Master resources)
