P.S. Free 2026 Huawei H13-511\_V5.5 dumps are available on Google Drive shared by Actual4Labs:  
<https://drive.google.com/open?id=1v-wPMoQQkU2A2kBz0cMpiJJ0MEImgeyg>

The Huawei H13-511\_V5.5 Certification Exam is one of the valuable credentials that are designed to prove an Huawei aspirant's technical expertise. With the HCIA-Cloud Computing V5.5 (H13-511\_V5.5) certificate they can be competitive and updated in the highly competitive market. The Huawei Certification Questions offers a great opportunity for beginners and experienced professionals to not only validate their skills but also advance their careers.

Once you learn all H13-511\_V5.5 questions and answers in the study guide, try Actual4Labs's innovative testing engine for exam like H13-511\_V5.5 practice tests. These tests are made on the pattern of the Huawei real exam and thus remain helpful not only for the purpose of revision but also to know the real exam scenario. To ensure excellent score in the exam, Actual4Labs's braindumps are the real feast for all exam candidates. They contain questions and answers on all the core points of your exam syllabus. Most of these questions are likely to appear in the H13-511\_V5.5 Real Exam.

## **H13-511\_V5.5 Latest Exam Answers | H13-511\_V5.5 Reliable Dumps Free**

We are well-known for our wonderful performance on pushing more and more candidates to pass their H13-511\_V5.5 exams and achieve their dreaming certifications. There is no exaggeration to say that with our H13-511\_V5.5 study materials for 20 to 30 hours, you will be ready to pass your H13-511\_V5.5 Exam. Since our H13-511\_V5.5 exam torrent is designed on the purpose to be understood by our customers all over the world, it is compiled into the simplest language to save time and efforts.

## Huawei H13-511\_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>List a few use cases of cloud computing: This topic presents practical applications and scenarios where cloud computing is implemented across different industries. It demonstrates real-world examples of how organizations utilize cloud services to solve business problems.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Describe the characteristics of cloud computing: This section explains the essential attributes and defining features of cloud computing such as on-demand self-service, broad network access, and resource pooling. It outlines what distinguishes cloud computing from traditional computing models.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Understand KVM technology: This topic focuses on Kernel-based Virtual Machine (KVM) as a specific virtualization solution for Linux systems. It covers how KVM transforms Linux into a hypervisor to manage virtual machines efficiently.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Be able to design and deploy Huawei's FusionCompute virtualization solution and FusionAccess desktop solution: This section covers the practical skills needed to architect and implement Huawei's enterprise virtualization platform FusionCompute and their desktop virtualization product FusionAccess. It includes planning, configuration, and deployment procedures for these Huawei-specific solutions.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Describe the history of cloud computing: This section traces the evolution and development of cloud computing from its origins to its current state. It provides historical context for how cloud technology emerged and transformed over time.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Be able to describe what virtualization is: This topic covers the concept of virtualization technology and how it enables multiple virtual instances to run on physical hardware. It explains the foundational role virtualization plays in creating isolated computing environments.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Understand the differences between virtualization and cloud computing: This section clarifies how virtualization and cloud computing are related yet distinct technologies. It explains that virtualization is a key enabler of cloud computing but cloud encompasses broader service delivery models and characteristics.</li> </ul>

## Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q72-Q77):

### NEW QUESTION # 72

A user has made multiple snapshots for a virtual machine on FusionCompute, but the restoration of the virtual machine using the third snapshot fails. The reason may be that the second snapshot of the virtual machine was deleted before.

- A. False
- B. True

Answer: A

### NEW QUESTION # 73

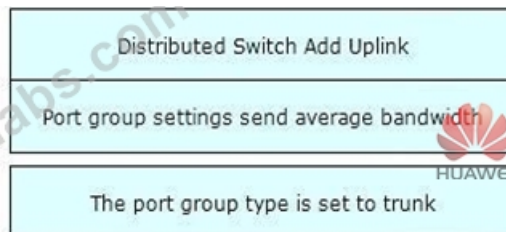

Drag and Drop Question

Please associate the configuration in the FusionCompute platform with the technologies involved.

Port group settings send average bandwidth	port binding
The port group type is set to trunk	traffic shaping
Distributed Switch Add Uplink	VLAN technology

Answer:

Explanation:

#### NEW QUESTION # 74

Which of the following statements is false about the graphical user interface (GUI) and the command-line interface (CLI) of Linux?

- A. It is more efficient to operate the Linux CLI using the keyboard than to operate the GUI using the mouse.
- **B. The GUI has higher permissions than the CLI, allowing it to modify the kernel and hide files.**
- C. The GUI consumes more system resources than the CLI.
- D. The CLI is more suitable for routine maintenance than the GUI.

**Answer: B**

Explanation:

According to the Huawei HCIA-Cloud Computing training materials, statement D is FALSE. In the Linux operating system, permissions are determined by the User ID (UID) and the specific privileges of the account logged in (such as the root user), not by the type of interface being used. Whether an administrator uses a Graphical User Interface (GUI) or a Command-Line Interface (CLI), the ability to modify the kernel or change system files is strictly governed by the OS's access control lists and kernel-level security modules. In many enterprise cloud environments, such as those running Huawei's EulerOS, the GUI is often not even installed to reduce the attack surface and save resources.

The other statements are technically correct. Statement A is true because the CLI allows for automation through scripting, making it far superior for routine maintenance and batch processing. Statement B is true because a GUI requires a display server (like X11 or Wayland) and a desktop environment, which significantly increase CPU and memory overhead compared to the text-based CLI. Statement C is true because an experienced administrator can execute complex tasks with a few keystrokes in the CLI much faster than navigating multiple windows and menus in a GUI. In the official curriculum, it is emphasized that for cloud data centers, the CLI is the primary tool for O&M (Operation and Maintenance) because it provides a direct, high-performance link to the system shell. The idea that a GUI provides "higher permissions" is a common misconception; in fact, critical kernel modifications are almost exclusively performed via the CLI or system configuration files to ensure precision and auditability.

#### NEW QUESTION # 75

Which of the following drives transmit data and serial Mohd?

- A. NL ?SAS
- **B. SATA**
- C. SSD
- **D. SAS**

**Answer: B,D**

#### NEW QUESTION # 76

Which of the following statements is false about host requirements during FusionCompute installation?

- A. If CPU virtualization is not enabled for a host, virtual machines cannot be created on the host.
- B. FusionCompute can be installed even if there is only one host network port.
- **C. The disk requirements of the host where the VRM is located are the same as those of other compute nodes.**
- D. The location where the host OS is booted first must be the location where the host OS is installed.

**Answer: C**

Explanation:

FusionCompute installation has clear host hardware and configuration requirements defined in the HCIA syllabus.

Option A is true. The boot device must match the installation location of the host operating system to ensure system stability.

OptionC is true. CPU virtualization must be enabled in the BIOS (Intel VT-x or AMD-V). If not enabled, the host cannot run virtual machines, which is a mandatory prerequisite.

OptionD is true. FusionCompute can be installed with a single network interface, although this is not recommended for production environments. Multiple NICs are preferred for traffic separation and high availability.

OptionB is false. The host where the VRM is deployed has higher disk requirements than ordinary compute nodes because it runs management services, databases, and logs. Therefore, its disk requirements are not the same as other compute nodes.

Thus, the false statement is B.

## NEW QUESTION # 77

.....

If you possess a certificate, it can help you enter a better company and improve your salary. H13-511\_V5.5 exam braindumps of us will help you obtain your certificate successfully. We are a professional certificate exam materials provider, and we have rich experiences in offering high-quality exam materials. In addition, we have a professional team to collect and research the latest information for H13-511\_V5.5 Exam Dumps. We offer you free update for 365 days, so that you can obtain the latest information for the exam. And the latest version for H13-511\_V5.5 exam braindumps will be sent to your email automatically.
