

Study CWNP CWDP-305 Tool, CWDP-305 Questions Answers

P.S. Free & New CWDP-305 dumps are available on Google Drive shared by UpdateDumps: <https://drive.google.com/open?id=1Tr1B5A4QBdrKGv07B-dH8tTgBivJcOUr>

With the society of development, companies have high demands for IT senior positions, how do applicants stand out over so many competes? CWNP CWDP-305 latest exam cram make you stand out. Our exam cram materials help thousands of candidates pass exam and get certifications. Many companies cooperate with us long-term to provide valid CWDP-305 Latest Exam Cram for their engineers and managers since they find our materials are the best provider.

UpdateDumps is one of the trusted and reliable platforms that is committed to offering quick Certified Wireless Design Professional (CWDP-305) exam preparation. To achieve this objective UpdateDumps is offering valid, updated, and real Certified Wireless Design Professional (CWDP-305) exam questions. These CWNP exam dumps will provide you with everything that you need to prepare and pass the final CWNP CWDP-305 exam with flying colors.

CWDP-305 Questions Answers, CWDP-305 Test Dumps Demo

Many candidates like APP test engine of CWDP-305 exam braindumps because it seem very powerful. If you are interested in this version, you can purchase it. This version provides only the questions and answers of CWDP-305 exam braindumps but also some functions easy to practice and master. It can be used on any electronic products if only it can open the browser such as Mobile Phone, Ipad and others. If you always have some fear for the real test or can't control the time to finish your test, APP test engine of CWNP CWDP-305 Exam Braindumps can set timed test and simulate the real test scene for your practice.

CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.
Topic 2	<ul style="list-style-type: none"> • Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.
Topic 3	<ul style="list-style-type: none"> • Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.
Topic 4	<ul style="list-style-type: none"> • Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.

CWNP Certified Wireless Design Professional Sample Questions (Q177-Q182):

NEW QUESTION # 177

When implementing WLAN security according to common best practices, what feature should be enabled when configuring an EAP type?

- A. The "Trusted Root Certification Authorities" list
- **B. The "Validate server certificate" option**
- C. The "Use WEP if RADIUS server unavailable" option
- D. The "Do not prompt user to authorize new servers or trusted certification authorities" option

Answer: B

NEW QUESTION # 178

When designing for OFDMA, why might the same channel bandwidth result in greater efficiency than that available in 802.11n and 802.11ac?

- A. The design will use transmit beamforming, which is not available in either 802.11n or 802.11ac.
- **B. The design will use RUs that allow for transmissions to multiple client devices concurrently without the use of MU-MIMO.**
- C. The clients will use UL MU-MIMO coupled with DSSS, which was not available in 802.11n or 802.11ac.
- D. The design will use MU-MIMO, which is not available in either 802.11n or 802.11ac.

Answer: B

Explanation:

Orthogonal Frequency Division Multiple Access (OFDMA), introduced in 802.11ax, enhances efficiency by dividing a channel into smaller sub-channels called Resource Units (RUs). This allows multiple devices to transmit simultaneously within the same channel bandwidth, reducing latency and improving throughput.

Unlike previous standards like 802.11n and 802.11ac, which primarily support single-user transmissions per channel, OFDMA's

ability to handle multiple concurrent transmissions without relying on MU-MIMO leads to more efficient spectrum utilization and better performance in dense environments.

NEW QUESTION # 179

What are some common problems with short (12 or fewer characters) ASCII passphrases in WPA/WPA2- Personal networks?

Response:

- A. Very few AP and client vendors support entry of an ASCII-based passphrase.
- B. They lead to weak group keys in a BSS.
- C. They are more susceptible to dictionary attacks than longer passphrases.
- D. They only produce a 64-bit PMK instead of a 256-bit PMK.

Answer: C

NEW QUESTION # 180

You deployed an AP and installed its antenna, and you now need to set the AP transmit power. Given a desired EIRP of 21 dBm, and an antenna gain of 5.85 dBd connected through 25 feet of cable with a loss specification of 4 dB/100 feet.

Assuming that there is no significant loss from the connectors, what should be the transmit power level for this AP?

- A. 14 mW
- B. 20 mW
- C. 25 mW
- D. 10 mW

Answer: C

NEW QUESTION # 181

What is the purpose of defining wall materials in WLAN design software?

- A. To ensure the attenuation and reflection of the materials are considered during propagation modeling
- B. Manager requires it, so WLAN designers should do it.
- C. It adds color to the floor plan which makes it easier to identify requirement areas
- D. So that the floor plan looks as much like the target deployment space as possible

Answer: A

NEW QUESTION # 182

.....

Our product provides the demo thus you can have a full understanding of our CWDP-305 prep torrent. You can visit the pages of the product and then know the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the CWDP-305 test braindumps, the price of the product and the discount. There are also the introduction of the details and the guarantee of our CWDP-305 prep torrent for you to read. You can also know how to contact us and what other client's evaluations about our CWDP-305 test braindumps. The pages of our product also provide other information about our product and the exam.
