All the contents of ActualPDF SAFe-Practitioner Complete Exam Dumps are compiled to help you pass the exam with ease. In addition, to ensure that you are spending on high quality SAFe-Practitioner exam dumps, we offer 100% money back in case of failure.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q222-Q227):

NEW QUESTION # 222

What is one purpose of the System Demo?

- A. To evaluate the full PI
- B. To identify PI Objectives
- C. **To demonstrate new functionality**
- D. To introduce new architectural designs

Answer: C

Explanation:

The System Demo is a significant event that provides an integrated view of new features for the most recent iteration delivered by all the teams in the Agile Release Train (ART). Each demo gives ART stakeholders an objective measure of progress during a Program Increment (PI) and the opportunity to give feedback on the solution. The System Demo is the one real measure of value, velocity, and progress of the fully integrated work across all the teams. The purpose of the System Demo is to demonstrate new functionality, not to evaluate the full PI, introduce new architectural designs, or identify PI Objectives. Those activities are done in other events, such as the Inspect and Adapt, the Architectural Runway, and the PI Planning. References: System Demo, System Demo - Scaled Agile Framework, Why System Demo Considered A Significant Event In SAFe? - Learnow, System Demo - Scaled Agile Framework.

NEW QUESTION # 223

During the Inspect and Adapt event, how are reflection, data collection, problem solving, and identification of improvement actions used?

- **A. To increase the quality and reliability of the next PI**
- B. To evaluate better implementation steps
- C. To help the team bond and work more efficiently together
- D. To enhance and improve the Innovation and Planning practices

Answer: A

Explanation:

According to the SAFe for Teams SP (6.0) - SAFe Practitioner handbook and study guide, the Inspect and Adapt event is a significant event held at the end of each PI, where the current state of the solution is demonstrated and evaluated. Teams then reflect and identify improvement backlog items via a structured problem-solving workshop. The purpose of the Inspect and Adapt event is to increase the quality and reliability of the next PI by applying the following practices:

* Reflection: Teams review the PI objectives, the system demo, and the quantitative and qualitative measurements to assess the current state of the solution and the ART performance. Teams also share their learnings, successes, and challenges with each other and the stakeholders.

* Data collection: Teams collect data from various sources, such as team and program metrics, customer feedback, surveys, and assessments, to measure the outcomes and the health of the solution and the ART. Teams also use tools such as the PI burndown chart, the cumulative flow diagram, and the team self-assessment to visualize the data and identify trends and patterns.

* Problem solving: Teams use a structured problem-solving workshop to identify the most critical issues or impediments that are affecting the solution or the ART. Teams use techniques such as brainstorming

NEW QUESTION # 224

The daily stand-up timebox should not exceed how many minutes?

- **A. 15 minutes**
- B. 20 minutes
- C. 5 minutes

- D. 10 minutes

Answer: A

Explanation:

The daily stand-up is a key event in SAFe that helps teams synchronize their work, identify impediments, and adjust their plans. It is a time-boxed event that should not exceed 15 minutes, as longer meetings can reduce the team's focus and productivity. The daily stand-up is also aligned with the Lean-Agile principle of applying cadence and synchronizing with cross-domain planning, which enables teams to operate reliably and efficiently.

Team Sync - Scaled Agile Framework, 18 Paragraphs That Will Make Your Daily Scrum Better

NEW QUESTION # 225

Which of the following SAFe Core Values involves coaching aspiring developers to grow their skillsets and fill new roles throughout the organization?

- **A. Respect for People**
- B. Transparency
- C. Built-In Quality
- D. Alignment

Answer: A

Explanation:

Respect for People is one of the four SAFe Core Values that guide the behaviors and actions of everyone participating in a SAFe portfolio. Respect for People means that everyone is valued and deserves respect, regardless of their role, background, or experience. It also means that everyone is empowered to contribute, learn, and grow within the organization. Respect for People involves coaching aspiring developers to grow their skillsets and fill new roles throughout the organization, as well as providing them with opportunities for feedback, recognition, and career development. Respect for People also fosters a culture of trust, collaboration, and psychological safety, where people can express their ideas, opinions, and concerns without fear of judgment or retaliation. References: Core Values - Scaled Agile Framework, Respect for People - Scaled Agile Framework

NEW QUESTION # 226

During System Demo, Team B states that the most recent release failed because of poor version control. They share their plan for preventing similar mistakes from happening in the future. Which of the following SAFe Core Values is Team B demonstrating?

- A. Siloed Thinking
- B. Organize around value
- **C. Transparency**
- D. Visualizing work

Answer: C

Explanation:

Transparency is one of the four core values of SAFe that represents the foundational beliefs that are key to SAFe's effectiveness. Transparency means making all the work visible, along with its priorities, status, dependencies, and outcomes. Transparency also means being honest and open about the challenges, risks, failures, and learnings that occur during the development process. By stating the reason for the release failure and sharing their improvement plan, Team B is demonstrating transparency to the other teams and stakeholders in the System Demo. Transparency helps to build trust, collaboration, alignment, and continuous learning in the ART and the Solution Train.
