## Get Updated Amazon SOA-C02 Exam Questions with 1 year Free Updates

They work together and strive hard to design and maintain the top standard of Amazon SOA-C02 exam questions. So you rest assured that the SOA-C02 exam questions you will not only ace your AWS Certified SysOps Administrator - Associate (SOA-C02) certification exam preparation but also be ready to perform well in the final SOA-C02 Certification Exam. The SOA-C02 exam are the real SOA-C02 exam practice questions that will surely repeat in the upcoming AWS Certified SysOps Administrator - Associate (SOA-C02) (SOA-C02) exam and you can easily pass the exam.

## Amazon AWS Certified SysOps Administrator - Associate (SOA-C02) Sample Questions (Q99-Q104):

### NEW QUESTION # 99

A company using AWS Organizations requires that no Amazon S3 buckets in its production accounts should ever be deleted. What is the SIMPLEST approach the SysOps administrator can take to ensure S3 buckets in those accounts can never be deleted?

- A. Use AWS Shield to deny the s3:DeleteBucket action on the AWS account instead of all S3 buckets.
- B. Create an IAM group that has an IAM policy to deny the s3:DeleteBucket action on all buckets in production accounts.
- C. Set up MFA Delete on all the S3 buckets to prevent the buckets from being deleted.
- **D. Use service control policies to deny the s3:DeleteBucket action on all buckets in production accounts.**

**Answer: D**

### NEW QUESTION # 100

A company has an organization in AWS Organizations. The company uses shared VPCs to provide networking resources across accounts. A SysOps administrator has been able to successfully launch and manage Amazon EC2 instances in a participant account. However, the SysOps administrator is now receiving an InstanceLimitExceeded error when the SysOps administrator tries to launch a new EC2 instance. What should the SysOps administrator do to resolve this error?

- A. Request an instance quota increase from the participant account
- B. Launch additional EC2 instances by using a different Amazon Machine image (AMI)
- C. Request an instance quota increase from the account that owns the VPC
- D. Launch additional EC2 instances in a different AWS Region

**Answer: A**

Explanation:

When receiving an InstanceLimitExceeded error in a participant account of a shared VPC, you need to request an instance quota increase from the participant account.

\* Requesting a Quota Increase:

\* Open the AWS Service Quotas console in the participant account.

\* In the navigation pane, choose "AWS services" and select "Amazon EC2."

\* Select the quota you need to increase, such as "Running On-Demand Standard (A, C, D, H, I, M, R, T, Z) instances."

\* Click "Request quota increase" and specify the desired limit.

\* Quota Management in AWS Organizations:

\* While shared VPCs allow resources to be used across accounts, quota limits are still managed per account.

\* Each participant account must manage its own quotas independently.

Service Quotas

Requesting a Quota Increase

### NEW QUESTION # 101

A company is expanding its use of AWS services across its portfolios. The company wants to provision AWS accounts for each team to ensure a separation of business processes for security compliance and billing. Account creation and bootstrapping should be completed in a scalable and efficient way so new accounts are created with a defined baseline and governance guardrails in place. A SysOps administrator needs to design a provisioning process that saves time and resources. Which action should be taken to meet these requirements?

- A. Create bootstrapping scripts in AWS OpsWorks and combine them with AWS CloudFormation templates to provision accounts and infrastructure
- B. Use AWS Config to provision accounts and deploy instances using AWS Service Catalog
- C. Automate using AWS Elastic Beanstalk to provision the AWS accounts, set up infrastructure, and integrate with AWS Organizations
- D. Use AWS Control Tower to create a template in Account Factory and use the template to provision new accounts

**Answer: D**

Explanation:

Account Factory - An Account Factory is a configurable account template that helps to standardize the provisioning of new accounts with pre-approved account configurations. AWS Control Tower offers a built-in Account Factory that helps automate the account provisioning workflow in your organization.

<https://docs.aws.amazon.com/controltower/latest/userguide/what-is-control-tower.html>

### NEW QUESTION # 102

A company uses Amazon S3 to aggregate raw video footage from various media teams across the US. The company recently expanded into new geographies in Europe and Australia. The technical teams located in Europe and Australia reported delays when uploading large video files into the destination S3 bucket in the United States.

What are the MOST cost effective ways to increase upload speeds into the S3 bucket? (Choose two.)

- A. Create multiple AWS Direct Connect connections between AWS and branch offices in Europe and Australia for file uploads into the destination S3 bucket.
- B. Use multipart uploads for file uploads into the destination S3 bucket from the branch offices in Europe and Australia.
- C. Use AWS Global Accelerator for file uploads into the destination S3 bucket from the branch offices in Europe and

Australia.

- **D. Use Amazon S3 Transfer Acceleration for file uploads into the destination S3 bucket.**
- E. Create multiple AWS Site-to-Site VPN connections between AWS and branch offices in Europe and Australia for file uploads into the destination S3 bucket.

**Answer: B,D**

Explanation:

Amazon S3 Transfer Acceleration leverages Amazon CloudFront's globally distributed edge locations to speed up uploads from distant locations, making it cost-effective and easy to implement. In addition, using multipart uploads allows large files to be split into smaller parts that can be uploaded concurrently, further improving the overall upload performance. Together, these two approaches provide an effective solution for increasing upload speeds for large video files from Europe and Australia to an S3 bucket in the United States.

### NEW QUESTION # 103

A company hosts an application on Amazon EC2 instances. The instances are in an Amazon EC2 Auto Scaling group that uses a launch template. The amount of application traffic changes throughout the day. Scaling events happen frequently.

A SysOps administrator needs to help developers troubleshoot the application. When a scaling event removes an instance, EC2 Auto Scaling terminates the instance before the developers can log in to the instance to diagnose issues.

Which solution will prevent termination of the instance so that the developers can log in to the instance?

- A. Use Amazon Inspector to configure a rules package to protect the instances from termination.
- B. Ensure that the Delete on termination setting is turned off in the UserData section of the launch template.
- C. Use Amazon GuardDuty to configure rules to protect the instances from termination.
- **D. Update the Auto Scaling group by enabling instance scale-in protection for newly launched instances.**

**Answer: D**

Explanation:

Enabling Instance Scale-In Protection:

\* Instance scale-in protection prevents Auto Scaling from terminating specific instances.

\* Steps:

\* Go to the AWS Management Console.

\* Navigate to EC2 and select "Auto Scaling Groups."

\* Select your Auto Scaling group.

\* Go to the "Instance management" tab.

\* Select the instances you want to protect and click "Actions."

\* Choose "Enable scale-in protection."

\* This ensures that instances are not terminated during troubleshooting.

\* Instance Scale-In Protection

### NEW QUESTION # 104

.....

As you can find that there are three versions of our SOA-C02 exam questions: the PDF, Software and APP online. Among them, the Software version has the function to simulate the exam which can help the learners be adjusted to the atmosphere, pace and environment of the Real SOA-C02 Exam. So our Software version of our SOA-C02 learning guide can help you learn the study materials and prepare for the test better if you already know all the information about the real exam.
