## I27001F Actual Exam | Latest I27001F Exam Fee

Comparing to the training institution, our website can ensure you pass the CertiProf actual test with less time and money. You just need to use spare time to practice the I27001F exam questions and remember key points of test answers. If you get a bad result in the I27001F Practice Test, we will full refund you to reduce the loss of your money.

### CertiProf I27001F Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Principles, concepts and the requirements of ISO</li><li>IEC 27001:2022: This domain covers the core principles, key concepts, and mandatory requirements of the ISO</li><li>IEC 27001:2022 standard. It explains how information security is structured, managed, and aligned with organizational objectives.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• ISO 27001:2022 Annex A: This domain outlines the set of security controls listed in Annex A of the standard. It explains how these controls are selected and applied to mitigate identified risks within an ISMS.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• How to Develop an ISMS: This section focuses on the process of establishing and implementing an Information Security Management System (ISMS). It includes planning, risk assessment, and applying appropriate controls to protect information assets.</li> </ul>

## CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q11-Q16):

### NEW QUESTION # 11

What does ISO/IEC 27001:2022 require for the control of documented information?

- A. Appropriate protection, for example, against loss of confidentiality, improper use, or loss of integrity
- B. A person designated by top management with expertise to control documented information
- C. A consultancy to accurately perform documented information control
- D. Acquisition of a set of information security tools for effective documented information control

**Answer: A**

Explanation:

ISO/IEC 27001:2022 requires documented information to be controlled so that it is adequately protected. The standard specifically refers to protection from issues such as loss of confidentiality, improper use, and loss of integrity. It also requires documented information to be available and suitable for use where and when needed.

The standard does not require a consultancy, specific tools, or a single designated expert to meet this requirement. Therefore, option D is correct.

### NEW QUESTION # 12

Within the ISMS, communicating the importance of effective information security management and of conforming to the ISMS requirements is a responsibility of:

- A. The IT Manager
- B. The IT Security Manager
- C. The quality management representative
- D. Top management

**Answer: D**

Explanation:

A specific leadership responsibility in ISO/IEC 27001:2022 is for top management to communicate the importance of effective information security management and of conforming to the ISMS requirements. This communication role is part of demonstrating leadership and commitment, helping create organizational awareness and support for the ISMS. Therefore, option B is correct.

### NEW QUESTION # 13

During the operation of the ISMS, what is a requirement for information security objectives?

- A. Ensure that the objectives are consistent with the information security policy
- B. Develop improvement plans using ISO/IEC 27002 to achieve the information security objectives
- C. Maintain documented information about the objectives
- D. Establish objectives for relevant functions and levels

**Answer: A**

Explanation:

ISO/IEC 27001:2022 requires information security objectives to be established at relevant functions and levels, to be consistent with

the information security policy, to be measurable if practicable, and to be monitored, communicated, and updated as appropriate. It also requires documented information on the objectives. Among the answer choices, option C is the best single answer because it expresses one of the core mandatory characteristics of the objectives. Even though options B and D are also requirements, the question asks for one answer only, and option C is the most fundamental wording in the set.

---

#### NEW QUESTION # 14

Which of the following must be included in the ISMS policy?

- A. The result of a gap analysis
- B. The deadline for ISMS implementation
- C. The certificate from previous audits
- **D. A commitment to continual improvement of the ISMS**

**Answer: D**

Explanation:

ISO/IEC 27001:2022 requires the information security policy to be appropriate to the purpose of the organization, include information security objectives or provide a framework for setting them, include a commitment to satisfy applicable requirements, and include a commitment to continual improvement of the ISMS. The other options are not mandatory contents of the policy. Therefore, option D is correct.

---

#### NEW QUESTION # 15

In ISO/IEC 27001:2022, what does the information security risk assessment process refer to?

- A. Establishing and maintaining information security risk criteria
- B. Identifying information security risks
- **C. All of the above**
- D. Identifying risk owners

**Answer: C**

Explanation:

ISO/IEC 27001:2022 requires the organization to establish and maintain information security risk criteria, identify information security risks, and identify risk owners as part of the risk assessment process. These activities are core elements of clause 6 on planning and risk assessment. Since all of the listed options are required parts of the process, the correct answer is D.

#### NEW QUESTION # 16

.....

To do this you just need to pass the Certified ISO/IEC 27001:2022 Foundation (I27001F) exam which is quite challenging and not easy to pass.
