Valid MB-820 Test Question & MB-820 Frequent Updates

Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Although our MB-820 exam dumps have been known as one of the world's leading providers of exam materials, you may be still suspicious of the content. For your convenience, we especially provide several demos for future reference and we promise not to charge you of any fee for those downloading. Therefore, we welcome you to download to try our MB-820 Exam for a small part. Then you will know whether it is suitable for you to use our MB-820 test questions. There are answers and questions provided to give an explicit explanation. We are sure to be at your service if you have any downloading problems.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q38-Q43):

NEW QUESTION # 38

A company owns and operates hotels, restaurants, and stores.

When the staff orders materials from the purchasing department, the requests are not directed to the correct approvers.

The staff requires a new field named Approver from which they can select the appropriate approver. The field must include the following options:

- * Hotel manager
- * Restaurant manager
- * Store manager
- * Purchasing manager

You need to create the Approver field in the Item table by using an AL extension.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Create an enum object named Approver and include all options.

* Reasoning: First, you must define the set of options (Hotel manager, Restaurant manager, etc.). In modern AL development, Enums are the standard way to create option sets because they are extensible.

Create a table extension object for an Item table with an Approver field of enum type named Approver in the field section.

* Reasoning: Next, you need to add the actual data field to the database. Since the "Item" table is a standard base table, you use a table extension. Tables use a fields section to define data columns. You reference the Enum created in step 1 here.

Create a page extension object that extends the Item Card object. Add the field to the layout section.

* Reasoning: Finally, to allow users to see and edit this new field on the screen, you must extend the "Item Card" page. Pages use a layout section to determine where controls appear.

NEW QUESTION # 39

You plan to run a debug for a client.

You extend the Standard Sales - Invoice report to add a new requirement.

You create a Report Extension 'Ext Standard Sales - Invoice' with ID = 50100 and add the following lines of code. (Line numbers are included for reference only.)

The client informs you that the value of the New Total VATBaseLCY column is incorrect.

You need to run a debug to identify the cause.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 40

A company uses Business Central.

The company has sales orders that have a different location in the header than in the customer's card. You plan to add a check on sales order posting.

The check must meet the following requirements.

- * Sales Order must have the same Location Code as the Location Code set up on the customer's card.
- * Must not be run in preview mode.
- * Must be run even if the user is only shipping items and not invoicing.

You create an event subscription for codeunit 80 "Sales-Post" You need to identify which event to subscribe to Which event should you identify?

- A.
- B.

- C.
- D.

Answer: C

Explanation:

This event occurs before posting a sales document.

PreviewMode is available in the parameters, which allows checking whether the process is being run in preview mode.

This event is typically used for sales order posting and can be used for both shipping and invoicing.

This event matches the requirements because:

You can check if PreviewMode is false.

It can run for both shipping and invoicing.

NEW QUESTION # 41

A company has an on-premises Business Central instance named TEST. The instance uses Windows authorization and a developer services port of 7149. Visual Studio Code is installed on the same server.

You create a new AL project but cannot download the symbols.

The launch.json file contains the following code:

You need to download the symbols.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Change the server Instance parameter to TEST
- B. Add the port: 7149 parameter.
- C. Check which server the instance is installed on and replace http://localhost with the correct IP address.
- D. Change the name parameter to TEST.
- E. Change the authentication parameter to UserPassword.

Answer: A,B

Explanation:

You are working on an on-premises Business Central instance and unable to download symbols for a new AL project. The current configuration in launch.json does not allow you to download symbols, and you need to make corrections.

Key Points in the Scenario:

* Instance name is TEST.

* Developer services port is 7149.

* Windows authentication is being used.

Correct Answers:

* A. Change the server Instance parameter to TEST.

* The serverInstance parameter must match the name of the Business Central instance, which is TEST in this scenario. You need to modify this to reflect the correct instance name.

* B. Add the port: 7149 parameter.

* Since the developer services are using port 7149, you need to specify this in the launch.json file by adding the port parameter with the value 7149.

Incorrect Options:

* C. Change the name parameter to TEST: The name parameter is just a label and does not affect downloading symbols, so changing this won't help.

* D. Change the authentication parameter to UserPassword: The authentication method is already set to Windows, which is valid for this scenario. Changing it to UserPassword is unnecessary unless specified by the system.

* E. Check which server the instance is installed on and replace http://localhost with the correct IP address: Since the server is on the same machine as Visual Studio Code (as specified), localhost is correct.

NEW QUESTION # 42

- A. Option B
- B.
- C. Option D
- D.
- E.

- F. □
- G. Option C
- H. Option A

Answer: C,D

Explanation:

To hide the field "Unit Price" from the Resource Card page in Microsoft Dynamics 365 Business Central, you need to modify the visibility property of the field using the modify keyword, which allows you to change the properties of an existing field on a page. modify("Unit Price") is the correct way to target an existing field on a page (like the Resource Card page).

The line Visible = false; makes the field invisible on the page.

Here's a breakdown of why each option is right or wrong:

Option A:

Uses addlast("Unit Price"), which is incorrect because you are not adding a new field; you're modifying an existing one. Also, Visible = false is correct for hiding a field, but the wrong method (addlast) is used.

Option B:

Uses modify("Unit Price") with Enabled = false;. This would disable the field (make it non-editable), not hide it. The field would still be visible, so this does not meet the requirement.

Option C:

Uses addlast("Unit Price"), which is incorrect, and Enabled = false;, which would disable the field, not hide it.

Option D:

modify("Unit Price") { Visible = false; } is the correct syntax for hiding the field on the page.

Correct Code Snippet:

```
modify("Unit Price")
{
Visible = false;
}
```

This hides the "Unit Price" field from the Resource Card page.

NEW QUESTION # 43

.....

We provide free update to the client and the discounts to the old client. We provide free update of our MB-820 exam materials within one year and after one year the client can enjoy the 50% discounts. The old clients enjoy some certain discounts when they buy our MB-820 exam torrent. Our experts check whether there is the update of the test bank every day and if there is the system will send to the client automatically. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important MB-820 Exam Torrent in the shortest time and finally pass the exam successfully.
