Latest SAP C_TS412_2021 Training - C_TS412_2021 Exam Blueprint

Quality of C_TS412_2021 practice materials you purchased is of prior importance for consumers. Our C_TS412_2021 practice materials make it easier to prepare exam with a variety of high quality functions. Their quality function is observably clear once you download them. We have three kinds of C_TS412_2021 practice materials moderately priced for your reference. All these three types of C_TS412_2021 practice materials win great support around the world and all popular according to their availability of goods, prices and other term you can think of.

SAP Certified Application Associate - SAP S/4HANA Project Systems Sample Questions (Q105-Q110):

NEW QUESTION # 105

What are some of the advantages of using project simulations? Note: There are 3 correct Answers to this question.

- A. Project simulations allow posting of actual data.
- B. Multiple project simulations can be used simultaneously.
- C. Project simulations can be created without using an operational project as a template.
- D. Project simulations can create purchase requisitions.
- E. Project simulations can be used to plan structures and costs.

Answer: B,C,E

NEW QUESTION # 106

Project structure.

You intend to work with predefined project coding mask to create project definitions. What do you have to consider?

- A. The standard project definition must differ from the definition of the operative project.
- **B. You can use an indicator to determine that only coded project numbers may be used within the project system.**
- C. You can use only numbers for a project coding mask definition.
- D. You can create project coding mask X... event if there are project numbers beginning with X.

Answer: B

Explanation:

You have to consider that you can use an indicator to determine that only coded project numbers may be used within the project system. A coded project number is a project number that follows a predefined structure defined by a project coding mask. A project coding mask consists of a project coding key and a coding mask that specify the length and format of the project number and the WBS element numbers. You can use an indicator in customizing to restrict the creation of project numbers that do not follow a project coding mask. NEW QUESTION # 107

Which statement is valid regarding networks? Note: There are 2 correct Answers to this question.

- A. A network activity can be assigned to several WBS elements.
- **B. Relationships can be used to connect activities of different networks.**
- **C. A network can be activity-account-assigned and header-account-assigned.**
- D. Material components can be assigned to activity elements.

Answer: B,C

NEW QUESTION # 108

A service company uses project management and they complain that the system does not prevent their project managers from exceeding their budgets. What actions do you have to take to solve the problem?

- A. Activate availability control for projects in the controlling area. Enter the plan data for each WBS element.
- B. Activate availability control for the WBS elements. Define the tolerance limits on each WBS element.
- C. Activate commitment management in the project definition. Enter the budget in the master data of the top WBS element.
- **D. Activate availability control in the assigned budget profile. Define the tolerance limits in customizing.**

Answer: D

NEW QUESTION # 109

Cost & Budget.

A customer wants to allocate overhead rates to a WBS element. What must you assign to the WBS element?

- A. Results analysis key
- B. Settlement rules
- **C. Costing Sheet**
- D. Investment profile.

Answer: C

Explanation:

To allocate overhead rates to a WBS element, you must assign a costing sheet to the WBS element. A costing sheet is a tool that allows you to define and calculate overhead costs based on various criteria, such as plant, company code, material origin, or order
