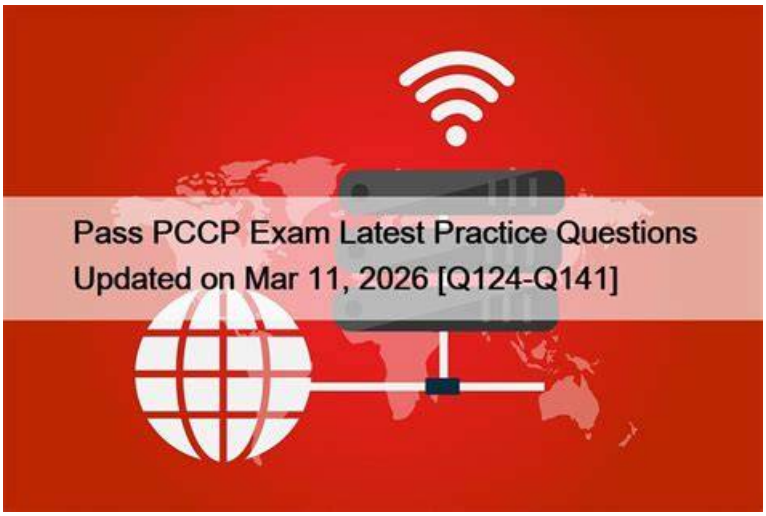
PCCP Examinations Actual Questions, PCCP Reliable Real Test



What's more, part of that itPass4sure PCCP dumps now are free: https://drive.google.com/open?id=1FZtk25O5Rlr1U4K9urGwtxXoaoLCQo0O

As is known to all, PCCP practice test simulation plays an important part in the success of exams. By simulation, you can get the hang of the situation of the real exam with the help of our free demo. You can fight a hundred battles with no danger of defeat. Simulation of our PCCP Training Materials make it possible to have a clear understanding of what your strong points and weak points are and at the same time, you can learn comprehensively about the exam. By combining the two aspects, you are more likely to achieve high grades in the real exam.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.
Topic 2	• Cybersecurity:This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.
Topic 3	• Secure Access: This part of the exam measures skills of a Secure Access Engineer and focuses on defining and differentiating Secure Access Service Edge (SASE) and Secure Service Edge (SSE). It covers challenges related to confidentiality, integrity, and availability of data and applications across data, private apps, SaaS, and AI tools. It examines security technologies including secure web gateways, enterprise browsers, remote browser isolation, data loss prevention (DLP), and cloud access security brokers (CASB). The section also describes Software-Defined Wide Area Network (SD-WAN) and Prisma SASE solutions such as Prisma Access, SD-WAN, AI Access, and enterprise DLP.

Topic 4	• Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.
Topic 5	• Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.

PCCP Reliable Real Test, Exam PCCP Dump

In fact, many candidates have the willing and ambition to pass the PCCP exam and achieve the certification for they want to challege themself to become better. The efficiency of going it alone is very low, and it is easy to go to a dead end. You really need a helper. Take a look at the development of PCCP Guide quiz and you will certainly be attracted to it. The advantages of PCCP study materials are numerous and they are all you need!

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q115-Q120):

NEW QUESTION # 115
Which two pieces of information are considered personally identifiable information (PII)? (Choose two.)

- A. Profession
- B. Name
- C. Login 10
- D. Birthplace

Answer: B,D

Explanation:
Personally identifiable information (PII) is any data that can be used to identify someone. All information that directly or indirectly links to a person is considered PII1. Among PII, some pieces of information are more sensitive than others. Sensitive PII is sensitive information that directly identifies an individual and could cause significant harm if leaked or stolen2. Birthplace and name are examples of sensitive PII, as they can be used to distinguish or trace an individual's identity, either alone or when combined with other information3.
Login 10 and profession are not considered sensitive PII, as they are not unique to a person and do not reveal their identity. Login 10 is a non-sensitive PII that is easily accessible from public sources, while profession is not a PII at all, as it does not link to a specific individual4. References:
* 1: What is PII (personally identifiable information)? - Cloudflare
* 2: What is Personally Identifiable Information (PII)? | IBM
* 3: personally identifiable information - Glossary | CSRC
* 4: What Is Personally Identifiable Information (PII)? Types and Examples

NEW QUESTION # 116
Which type of system collects data and uses correlation rules to trigger alarms?

- A. SIEM
- B. SOAR
- C. SIM
- D. UEBA

Answer: A

Explanation:
A Security Information and Event Management (SIEM) system collects data from various sources (logs, events, etc.) and uses correlation rules to analyze this data and trigger alarms when suspicious or predefined patterns are detected.

NEW QUESTION # 117
Which scenario highlights how a malicious Portable Executable (PE) file is leveraged as an attack?

- A. Corruption of security device memory spaces while file is in transit
- B. Embedding the file inside a pdf to be downloaded and installed
- C. Setting up a web page for harvesting user credentials
- D. Laterally transferring the file through a network after being granted access

Answer: B

Explanation:
Malicious Portable Executable (PE) files hidden inside PDFs represent a stealthy delivery tactic where attackers embed executable payloads within seemingly benign documents. When a user opens the PDF, the embedded PE executes, potentially installing malware. This approach combines social engineering with file obfuscation to bypass traditional detection methods. Palo Alto Networks' Advanced WildFire sandboxing inspects such files by detonating them in isolated environments to observe behavior and identify hidden threats. This detection technique is critical for uncovering evasive malware concealed within common file types before they reach end-users.

NEW QUESTION # 118
Which network firewall primarily filters traffic based on source and destination IP address?

- A. Stateless
- B. Proxy
- C. Application
- D. Stateful

Answer: A

Explanation:
A stateless firewall is a network firewall that primarily filters traffic based on source and destination IP address, as well as port numbers and protocols. A stateless firewall does not keep track of the state or context of network connections, and only inspects packet headers. A stateless firewall is faster and simpler than a stateful firewall, but it is less secure and flexible. A stateless firewall cannot block complex attacks or inspect packet contents for malicious payloads. References: What Is a Packet Filtering Firewall? - Palo Alto Networks, Common IP Filtering Techniques - APNIC, What is IP filtering? - Secure Network Traffic Management

NEW QUESTION # 119
Which Palo Alto Networks tool is used to prevent endpoint systems from running malware executables such as viruses, trojans, and rootkits?

- A. AutoFocus
- B. Cortex XDR
- C. Expedition
- D. App-ID

Answer: B

Explanation:
Cortex XDR is a cloud-based, advanced endpoint protection solution that combines multiple methods of prevention against known and unknown malware, ransomware, and exploits. Cortex XDR uses behavioral threat protection, exploit prevention, and local analysis to stop the execution of malicious programs before an endpoint can be compromised. Cortex XDR also enables remediation on the endpoint following an alert or investigation, giving administrators the option to isolate, terminate, block, or quarantine malicious files or processes. Cortex XDR is part of the Cortex platform, which provides unified visibility and detection across the

network, endpoint, and cloud. References:

NEW QUESTION # 120
.....

Unlike many other learning materials, our PCCP study materials are specially designed to help people pass the exam in a more productive and time-saving way, and such an efficient feature makes it a wonderful assistant in personal achievement as people have less spare time nowadays. On the other hand, PCCP Study Materials are aimed to help users make best use of their sporadic time by adopting flexible and safe study access.
