SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q50-Q55):

NEW QUESTION # 50

You want to use destination-based distance costs when planning freight orders with the VSR optimizer. What MUST you define?

- A. Costs for distance in the transportation lane
- B. Costs for distance in the constraints and cost settings
- C. Planning strategy VSR_DEF in the optimizer settings
- D. A freight unit building rule that does NOT use default routes

Answer: A

Explanation:

Transportation Planning

NEW QUESTION # 51

You have implemented a side-by-side scenario of SAP Transportation Management and SAP S/4HANA. Which of the following statements apply to the organizational units in SAP Transportation Management?

Note: There are 2 correct answers to this question.

- A. Organizational units can be maintained independently of organizational units in SAP S/4HANA
- B. Organizational units are not mandatory
- C. Organizational units can be determined automatically based on conditions
- D. The hierarchical relationship of organizational units is not fixed

Answer: A,C

NEW QUESTION # 52

If output has been triggered successfully, two monitoring transactions are available to review the status of message processing, as follow (2 correct answer)

- A. Monitor for processed XML messages
- B. TRSO
- C. Postprocessing desktop

Answer: A,C

NEW QUESTION # 53

You have fixed-price contracts with your carriers. The carriers have guaranteed availability for all of your transports. How can you streamline the subcontracting process?

- A. Use carrier selection with the Assign Best Carrier option
- B. Use carrier selection with the Automatic Tendering option
- **C. Use tendering with the Broadcast Tendering - First Acceptable Offer type**
- D. Use tendering with the Peer-to-Peer Tendering - No Response Required type

Answer: C

Explanation:

In SAP S/4HANA Transportation Management, when carriers have fixed-price contracts and guaranteed availability, the subcontracting process can be streamlined by using tendering with the Broadcast Tendering

- First Acceptable Offer type (C). According to the SAP documentation, this tendering method sends the freight order to multiple carriers simultaneously, and the first carrier to accept the offer is assigned, leveraging the guaranteed availability and fixed prices to expedite the process without requiring complex evaluations.

The other options are incorrect:

- * Assign Best Carrier (A) involves evaluating carriers based on criteria like cost or priority, which is unnecessary with fixed-price contracts and guaranteed availability.
- * Automatic Tendering (B) automates tendering but does not specifically streamline the process for guaranteed carriers.
- * Peer-to-Peer Tendering - No Response Required (D) sends the freight order directly to one carrier without expecting a response, which is less efficient than broadcasting to leverage the first acceptance.
