Which feature would ensure can view all invoices associated with an Opportunity if the user can view the parent Opportunity record?

- A. Master-Detail Relationships
- B. Sharing Rules
- C. Field Level Security
- D. Lookup Relationships

Answer: A

NEW QUESTION # 161
A user is getting an error when attempting to merge two accounts. The administrator checks the profile to see the user has Read/Write permission on Accounts and is the owner of both records.
What is preventing the user from completing the merge?

- A. The user is assigned to the wrong territory.
- B. The Delete permission is missing on the user for Accounts.
- C. Only administrators have permission to merge records.
- D. The Account matching rules are not set.

Answer: B

Explanation:
Explanation
The Delete permission is missing on the user for Accounts is what is preventing the user from completing the merge. Merging accounts is a way to combine up to three duplicate accounts into one master record and update the related records accordingly.
Merging accounts requires the Delete permission on accounts because merging accounts involves deleting the duplicate records and keeping only the master record.
