各国の人はGH-900復習資料を利用できるように、私たちの専門家は全力を尽くしてGH-900復習資料の内容を簡潔化し、詳しい説明を添えました。従って、GH-900復習資料を楽的に利用できるようになりました。大切なのは、GH-900復習資料の合格率が高いで、多くの受験者がGH-900試験をパスしたということです。それは、私たちの誇りです。

Microsoft GH-900 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
トピック 2	• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.
トピック 3	• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.
トピック 4	• Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI • CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.

トピック 5	• Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.

GH-900認定試験はIT業界の新たなターニングポイントの一つです。試験に受かったら、あなたはIT業界のエリートになることができます。情報技術の進歩と普及につれて、MicrosoftのGH-900問題集と解答を提供するオンライン・リソースが何百現れています。その中で、GoShikenが他のサイトをずっと先んじてとても人気があるのは、GoShikenのMicrosoftのGH-900試験トレーニング資料が本当に人々に恩恵をもたらすことができ、速く自分の夢を実現することにヘルプを差し上げられますから。

Microsoft GitHub Foundations 認定 GH-900 試験問題 (Q64-Q69):

質問 # 64

As a user, which of the following default labels is used to indicate that a maintainer needs assistance on an issue or pull request?

- A. Help wanted
- B. Enhancement
- C. Question
- D. Documentation

正解: A

解説:

In GitHub, labels are used to categorize issues and pull requests, and certain default labels are provided to help manage tasks:

Help Wanted Label:

Option C is correct. The "Help wanted" label is used to indicate that the maintainer of the repository needs assistance on a particular issue or pull request. This label helps in attracting contributors who might be interested in helping with specific tasks.

Other Options:

Option A ("Enhancement") is incorrect because it indicates a request for a new feature or improvement rather than a call for help.

Option B ("Question") is incorrect because it is used to flag issues or pull requests that seek clarification or additional information, not necessarily requiring assistance.

Option D ("Documentation") is incorrect because it labels issues or PRs related to documentation, not for seeking help.

Reference:

GitHub Docs: Using Labels

質問 # 65

How can a user highlight a post to the top of the Discussions page?

- A. Star the discussion.
- B. Pin the discussion.
- C. Save the discussion.
- D. Create an issue from the discussion.

正解: B

解説:

To highlight a post at the top of the Discussions page on GitHub, you can Pin the discussion. Pinning a discussion ensures it remains

prominently visible at the top of the list, making it easier for others to find and participate in that discussion. This is particularly useful for important announcements or frequently referenced topics.

質問 # 66

Which of the following options is available as a default Discussion category?

- A. Daily check-in
- **B. Show and tell**
- C. Security concern
- D. Bug report

正解: B

解説:

In GitHub Discussions, several default categories are provided to help organize conversations within a project. One of the default categories is Show and tell. This category is designed for users to showcase their work, share progress, or discuss achievements with the community. The other options listed (Bug report, Daily check-in, Security concern) are not default categories but could be custom categories created by the repository maintainers.

質問 # 67

Where should a repository admin navigate to view pre-built visualizations from repository data?

- A. Issues
- B. Settings
- C. Charts
- **D. Insights**

正解: D

解説:

GitHub provides repository admins with a feature called "Insights" where they can view various pre-built visualizations and analytics related to the repository.

Insights:

Option C is correct because the "Insights" tab in a GitHub repository offers various pre-built visualizations, including contributions, traffic, code frequency, dependency graphs, and more. This helps admins and maintainers track the project's activity and health.

Other Options:

Option A (Settings) is incorrect because the Settings tab is where you configure repository settings, permissions, and integrations, but it does not provide visualizations of repository data.

Option B (Issues) is incorrect because the Issues tab is used for tracking bugs, enhancements, and other tasks but does not provide data visualizations.

Option D (Charts) is incorrect as there is no "Charts" tab or section in GitHub. The correct location for data visualizations is under "Insights." Reference:

GitHub Docs: Viewing Repository Insights

質問 # 68

Which of the following information is available by default in a user's GitHub profile?

- A. Public Secure Shell Protocol (SSH) keys
- B. Email address and password
- C. A list of the user's private repositories
- **D. Personal biography and profile picture**

正解: D

解説:

A user's GitHub profile typically includes public information such as a personal biography, profile picture, and a list of public repositories. More sensitive information, like email addresses and passwords, is not publicly displayed.

Personal Biography and Profile Picture:
