With these features, you will improve your AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Architect-Associate exam confidence and time management skills. Many candidates prefer to prepare for the AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Architect-Associate Exam Dumps using different formats. The AWS Certified Solutions Architect - Associate (SAA-C03) AWS-Solutions-Architect-Associate exam questions were designed in different formats so that every candidate could select what suited them best.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q388-Q393):

NEW QUESTION # 388

DynamoDB uses only as a transport protocol, not as a storage format.

- A. WDDX
- B. SGML
- C. XML
- **D. JSON**

Answer: D

Explanation:

DynamoDB uses JSON only as a transport protocol, not as a storage format. The AWS SDKs use JSON to send data to DynamoDB, and DynamoDB responds with JSON, but DynamoDB does not store data persistently in JSON format. <http://docs.aws.amazon.com/amazondynamodb/latest/developerguide/Programming.LowLevelAPI.html>

NEW QUESTION # 389

The new DB Instance that is created when you promote a Read Replica retains the backup window period.

- A. FALSE
- B. TRUE

Answer: B

NEW QUESTION # 390

Does Amazon RDS allow direct host access via Telnet, Secure Shell (SSH), or Windows Remote Desktop Connection?

- A. No
- B. Depends on if it is in VPC or not
- C. Yes

Answer: A

NEW QUESTION # 391

A company recently signed a contract with an AWS Managed Service Provider (MSP) Partner for help with an application migration initiative. A solutions architect needs to share an Amazon Machine Image (AMI) from an existing AWS account with the MSP Partner's AWS account. The AMI is backed by Amazon Elastic Block Store (Amazon EBS) and uses a customer managed customer master key (CMK) to encrypt EBS volume snapshots.

What is the MOST secure way for the solutions architect to share the AMI with the MSP Partner's AWS account?

- A. Make the encrypted AMI and snapshots publicly available. Modify the CMK's key policy to allow the MSP Partner's AWS account to use the key
- B. Modify the launchPermission property of the AMI. Share the AMI with the MSP Partner's AWS account only. Modify the CMK's key policy to trust a new CMK that is owned by the MSP Partner for encryption.
- C. Modify the launchPermission property of the AMI. Share the AMI with the MSP Partner's AWS account only. Modify the CMK's key policy to allow the MSP Partner's AWS account to use the key.
- D. Export the AMI from the source account to an Amazon S3 bucket in the MSP Partner's AWS account. Encrypt the S3 bucket with a CMK that is owned by the MSP Partner. Copy and launch the AMI in the MSP Partner's AWS account.

Answer: C

NEW QUESTION # 392

Can Amazon S3 uploads resume on failure or do they need to restart?

- A. This question doesn't make sense
- B. Resume on failure
- C. You can resume them, if you flag the "resume on failure" option before uploading.
- D. Restart from beginning

Answer: B

NEW QUESTION # 393
