Möchten Sie in kurzer Zeit die OGEA-103 The Open Group Zertifizierungsprüfung bestehen? Unser ITZert bietet Ihnen die Testfragen und Antworten zur The Open Group OGEA-103 Zertifizierung, die von den IT-Experten durch Experimente und Praxis erhalten werden und über IT-Zertifizierungserfahrungen über 10 Jahre verfügt. Außerdem gewährt unser ITZert Ihnen die vollständigsten Zertifizierungskriterien sowie Ausbildungsmethoden. Die Ergebnisse von unseren Kunden haben bewiesen, dass die Genauigkeit der The Open Group OGEA-103 Zertifizierung 100% beträgt! Wenn Sie irgendeine Frage über die OGEA-103 Prüfung haben, werden wir so schnell wie möglich beantworten.

Das Open Group Architecture Framework (TOGAF) ist ein bekannter und weit verbreiteter Framework für Unternehmensarchitektur. Es bietet einen umfassenden Ansatz für das Entwerfen, Planen, Implementieren und Verwalten einer Unternehmensarchitektur. Die TOGAF -Zertifizierung wird von Fachleuten auf dem Gebiet der Enterprise -Architektur sehr geschätzt und gesucht. Die offene Gruppe bietet verschiedene Zertifizierungsebenen, einschließlich der OGEA-103-Prüfung, die Teil 1 und Teil 2 der TOGAF Enterprise Architecture-Zertifizierung kombiniert.

Die OGEA-103-Zertifizierungsprüfung umfasst zwei Teile mit jeweils ein anderes Format. Teil 1 ist eine geschlossene Prüfung, die aus 40 Multiple-Choice-Fragen besteht, und Kandidaten haben 60 Minuten Zeit, um sie abzuschließen. Teil 2 ist eine Open-Book-Prüfung, die aus acht szenariobasierten Fragen besteht, und die Kandidaten haben 90 Minuten Zeit, um sie abzuschließen. Der Passpunkt für jeden Teil beträgt 60%, und die Kandidaten müssen beide Teile verabschieden, um die Zertifizierung zu erhalten.

OGEA-103 Musterprüfungsfragen - OGEA-103 Online Praxisprüfung

Es ist unrealistisch, beim Lernen der relevanten Bücher diese The Open Group OGEA-103 Prüfung zu bestehen. Es ist besser für Sie, einige wertvolle Prüfungsfragen zu machen, statt alle Kenntnisse für die Prüfung ziellos auswendig zu lernen. Die hocheffektiven Dumps sind das beste Vorbereitungsgerät. So kaufen Sie bitte schnell die The Open Group OGEA-103 Dumps von ITZert. Das ist Dumps mit höherer Hit-Rate. Und es ist wirksamer als alle anderen Lernmethoden. Die sind die Unterlagen, womit Sie einmaligen Erfolg machen können.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam OGEA-103 Prüfungsfragen mit Lösungen (Q12-Q17):

12. Frage

Refer to the table below:

□ Which ADM Phase does this describe?

- A. Phase A
- **B. Phase B**
- C. Preliminary Phase
- D. Phase C

Antwort: B

Begründung:

Explanation

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

13. Frage

Complete the sentence Business Transformation Readiness Assessment is _____.

- **A. a joint effort between corporate staff lines of business and IT planners**
- B. a way to put building blocks into context thereby supporting re-usable solutions
- C. widely used to validate an architecture that is being developed
- D. to ensure the active support of powerful stakeholders

Antwort: A

Begründung:

Business Transformation Readiness Assessment is a joint effort between corporate staff lines of business and IT planners to evaluate the readiness of the organization to undergo change. It involves assessing factors such as vision, commitment, capacity, capability, culture, and motivation that may influence the success of a business transformation initiative. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.2 Business Transformation Readiness Assessment.

14. Frage

Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- A. Governance Log
- B. Architecture Metamodel
- C. Reference Library
- **D. Architecture Landscape**

Antwort: D

15. Frage

Scenario:

You are working as an Enterprise Architect within a company providing legal services. The company operates in many countries and

has a complicated structure. Every office must follow the local regulations in their country.

The company's Enterprise Architecture (EA) department has been operating for several years and has mature, well-developed architecture governance and development processes based on the TOGAF standard. In addition to the EA program, the company has several management frameworks, including business planning, project/portfolio management, and operations management. The Architecture Board includes representatives from all parts of the company.

The Chief Information Officer (CIO) is the sponsor of the Enterprise Architecture program. The CIO has actively encouraged architecting with agility within the EA department as the preferred approach for projects. The CIO has given approval for a Request for Architecture Work to explore the adoption of an AI- powered system for managing legal cases and financial processes.

Senior management has become more concerned about business performance, especially with the advancements in Artificial Intelligence (AI). Many of the company's competitors have started using AI to assist with legal strategies, streamline processes, and boost productivity. One of the most important benefits AI has for the business is its ability to increase accuracy and minimize mistakes.

Some of the top managers are worried about a change in the way of working, and if it will achieve the business goals. Their staff also fear that management will use the AI system to measure their performance. The CIO wants to know how to address these concerns and reduce risks.

The new system is expected to guide legal professionals and analysts on which tasks to focus on. The main goals are to improve productivity and make better use of staff. In addition, the CIO hopes these changes will lead to higher customer satisfaction.

Refer to the scenario:

You have been asked to respond to the Chief Information Officer (CIO) recommending an approach that would enable the development of an architecture that addresses the concerns of the top managers and the multiple branches in different parts of the company.

Based on the TOGAF standard, which of the following is the best answer?

- A. You recommend that models be created for each of the Business, Application, and Technology architectures. These can be used to ensure that the system will be compliant with the local regulations for each operating entity. This ensures that all necessary data and detail is addressed. A formal review should be held with the stakeholders to verify that their concerns have been properly addressed by the models.
- **B. You recommend that an analysis of the stakeholders is undertaken. This will allow the architects to define groups of partners (the stakeholders) who have common concerns and include development of a Stakeholder Map. The concerns and relevant views should then be defined for each group and recorded in the Architecture Vision document. To reduce risk, you include a requirement that there be progressive development of the target architecture to get regular feedback.**
- C. You recommend that a Communications Plan be created to address the key stakeholders, particularly influential partners. This plan should include a report summarizing the key features of the architecture with respect to each location and reflect the stakeholders' requirements. You will check with each key stakeholder that their concerns have been addressed. Risk mitigation should be explicitly addressed as a component of the architecture being developed.
- D. You recommend creation of a set of business models that can be applied uniformly across all AI- related architecture projects. These should be developed in a portable format to ensure maximum portability across the many tools used in the firm. Each architecture should then be defined based on this fixed set of models. All concerned stakeholders can then examine the models to ensure that their needs have been addressed.

Antwort: B

Begründung:

The correct answer is B, as it aligns with TOGAF's stakeholder management approach, ensuring that stakeholder concerns are captured and addressed iteratively throughout the architecture development process.

Analysis of the Correct Answer (Option B):

* Stakeholder Analysis and Mapping

* The scenario highlights that top managers and staff are worried about the changes AI will bring.

* TOGAF recommends stakeholder analysis early in the ADM process to ensure that concerns, expectations, and risks are documented.

* Creating a Stakeholder Map groups stakeholders by common concerns, allowing architects to develop tailored viewpoints.

* Recording Concerns in the Architecture Vision Document

* The Architecture Vision (ADM Phase A) serves as a high-level guiding document.

* Capturing stakeholder concerns in the Vision document ensures alignment between business goals and technology implementation.

* Iterative Development and Regular Feedback

* The scenario describes an AI-powered system with major business impacts, so incremental validation is necessary.

* TOGAF emphasizes progressive development to manage risk and validate requirements continuously.

* Regular feedback loops help mitigate resistance from top managers and staff.

Why Other Options Are Incorrect?

* Option A: Creating Models for Business, Application, and Technology Architectures

* Incorrect because while compliance is important, it does not address stakeholder concerns directly.

- * The scenario is about ensuring buy-in from top managers and employees, not just regulatory compliance.
 - * Option C: Using Uniform Business Models Across All Projects
 - * Incorrect because a one-size-fits-all model does not allow for regional and functional differences within the company.
 - * The scenario emphasizes the need to address specific concerns of top managers and different locations, which requires stakeholder-specific customization.
 - * Option D: Creating a Communications Plan
 - * Incorrect because communication alone does not resolve stakeholder concerns.
 - * While communication is useful, the architecture development process should include stakeholder engagement and progressive validation, not just reporting.

16. Frage

Which section of the TOGAF template for Architecture Principles should highlight the requirements for carrying out the principle?

- **A. Implications**
- B. Rationale
- C. Statement
- D. Name

Antwort: A

Begründung:

The Implications section describes the impact of adhering to the principle on the organization, the processes, the information systems, and the technology²³. It also identifies the changes, costs, and risks that may result from applying the principle²³. The Implications section helps to communicate the benefits and consequences of the principle to the stakeholders and to guide the implementation and governance of the architecture²³.

The other sections of the TOGAF template for Architecture Principles are:

- * Name: This section provides a short and memorable name for the principle that represents its essence and purpose²³. The name should not mention any specific technology or solution²³.
- * Statement: This section provides a concise and formal definition of the principle that expresses the fundamental rule or constraint that the principle imposes²³. The statement should be clear, unambiguous, and testable²³.
- * Rationale: This section provides the reasoning and justification for the principle, explaining why it is important and how it supports the business goals and drivers²³. The rationale should also link the principle to the higher-level enterprise or IT principles that it elaborates on²³.

17. Frage

.....

Wenn Sie Ihre Stelle in der schärf konkurrenzierten IT-Branche durch das Zertifikat von The Open Group OGEA-103 festigen und somit Ihre beruflichen Fähigkeiten verstärken wollen, können Sie die Schulungsunterlagen zur The Open Group OGEA-103 Zertifizierungsprüfung von unserem ITZert wählen. Nach langjährigen Bemühungen haben unsere Erfolgsquote von der The Open Group OGEA-103 Zertifizierungsprüfung 100% erreicht. Wählen Sie ITZert, wählen Sie Erfolg.
