PECB Certified ISO 45001 Lead Auditor Exam Sample Questions (Q97-Q102):

NEW QUESTION # 97

You are an audit team leader conducting a Stage 2 audit of a Financial Services Provider. You are currently interviewing the organisation's Risk and Compliance Officer, who appears very competent when it comes to the management of business risks. As the Risk and Compliance Officer, she is also identified as having lead responsibility for the management of OH and S risk, and you are now seeking evidence that she understands the requirements relating to risk that are contained within ISO 45001. During your conversation, she makes the following six statements about risk within an ISO 45001-based OHSMS. Which four of his statements are correct?

- A. Risk is often expressed as a combination of likelihood and impact.
- B. Risk assessment is an activity that must be carried out by top management.

- C. The organisation must attempt to identify and address every risk it faces.
- D. The organisation is required to assess risks arising from OH and S hazards.
- E. The effect of uncertainty (i.e. risk) can result in positive outcomes as well as negative ones.
- F. Although organisations are required to carry out risk management, the method by which they do so is up to them.

Answer: A,D,E,F

Explanation:

Analysis of Options:

* A. The organisation must attempt to identify and address every risk it faces: Incorrect. ISO 45001 focuses on OH and S risks and not every risk faced by the organization.

* B. The effect of uncertainty (i.e. risk) can result in positive outcomes as well as negative ones:

Correct. Clause 3.20 defines risk as the " effect of uncertainty, " which may result in positive or negative outcomes.

* C. Although organisations are required to carry out risk management, the method by which they do so is up to them: Correct. ISO 45001 does not prescribe specific risk management methods, leaving the organization to choose the approach that best suits its context (Clause 6.1.2).

* D. Risk assessment is an activity that must be carried out by top management: Incorrect. Risk assessment can involve workers and other personnel; it is not limited to top management.

* E. The organisation is required to assess risks arising from OH and S hazards: Correct. Clause 6.1.2.2 requires organizations to assess OH and S risks associated with hazards.

* F. Risk is often expressed as a combination of likelihood and impact: Correct. This is a common way to express risk, aligned with Clause 6.1.2.

ISO References:

* Clause 3.20: Definition of risk.

* Clause 6.1.2: Hazard identification and risk assessment

NEW QUESTION # 98

You are an audit team leader conducting an ISO 45001 surveillance audit of a nautical college that provides course for those working in the maritime sector. The College Principle Is absent, and you are interviewing the Deputy (DP) DP: 1 apologise for the absence of the College Principle. He has called in sick today and we are really short of staff.

You: 1 see, it really should not affect the OHSMS so the audit can progress as normal.

DP: The College principle set up the system. I am afraid I am not as familiar with it as he is.

You: OK, let's start with the OH and S policy. What are the main issues for the OHSMS here?

DP: Give me a minute. I need look at the OH and S Policy on the noticeboard in his office.

As the audit progresses, It is clear that the Deputy College Principle has a very low knowledge of the OHSMS. He continually has to search the answers to your questions or asks staff members about their processes.

Choose one of the following options that best describes the basis for the nonconformity.

- A. OHSS improvement is not possible due to the lack of awareness of the OHSMS.
- B. The OH and S Policy only exists as a document in the College principle office.
- C. As a member of the management team, the Deputy College Principal is not aware of the OHSMS policy.
- D. The Deputy College Principal is not competent to manage the OHSMS.

Answer: C

Explanation:

Comprehensive Detailed Explanation along with All ISO 45001 Audit References Clause 5.1 of ISO 45001:2018 requires top management to demonstrate leadership and commitment to the OH&S management system. This includes awareness of the OH&S policy and its objectives.

Analysis of Options:

* A. As a member of the management team, the Deputy College Principal is not aware of the OHSMS policy: Correct. A lack of awareness of the policy reflects poor leadership commitment, which violates Clause 5.1.

* B. OH&S improvement is not possible due to the lack of awareness of the OHSMS: Incorrect.

While improvement may be hindered, this is not the main issue in this scenario.

* C. The Deputy College Principal is not competent to manage the OHSMS: Incorrect. The Deputy's competence to manage the OHSMS is not in question; the issue is their lack of awareness of key elements.

* D. The OH&S policy only exists as a document in the College Principal's office: Incorrect. The policy may be accessible but not effectively communicated or understood by management.

ISO References:

* Clause 5.1: Leadership and commitment.

* Clause 5.2: OH&S policy.

NEW QUESTION # 99

On behalf of a certification body, you are conducting a combined audit of Shelf-Fit. The organization designs, manufacturing install interiors for retail stores. They employ subcontractors for the installation work.

Representing the ISO 45001 audit, you ask the Purchase Manager about the identification of health and safety hazards for contractors on site. Having previously reviewed the hazards list (HSD-21/11 Rev.3), you found that various health and safety hazards were listed but not were associated with contractor working on-site.

When you ask about the use of contractors, the response is, "We know that contractors use chemicals, such as glues, paints and vanishes. We trust them since they know more than we do about the safe handling of such issues". The auditor made the same enquiry to an accompanying member of the health and safety team and was told that chemical safety had never been a problem with the installation process.

- A. The organization failed to include its OH and S policy in contracts for installation contractors (5.2.f)
- B. The purchase manager confirmed that the safe use of chemicals in installation work was left to the contractor
- C. There was not communication between the organization and site contractors (7.4.1.c.2)
- D. The organization did not have a documented process in place to control outsourced work. (8.1.4.3)
- E. Staff indicated that chemical hazards on installation sites are the same as at the factory. The hazard List does not reference this. (Clause 6.1.2.2)
- F. The internal audit programme does not include installation sites. The audit programme does not cover the full OHS management system (Clause 9.2.2)
- G. Some safety data sheets for chemical used were missing for some of the installation contractors.(clause 8.1.4.2)
- H. No hazard assessment by Shelf-Fit were in place for installation works on customer sites. (Clause 6.1.2.2)
- I. After gathering more evidence, you note down findings against several clauses of ISO 45001. Select three options to determine which findings stated are major nonconformities.

Answer: C,D,E

Explanation:

Major nonconformities are raised when there is a systemic failure to meet ISO 45001 requirements that could lead to significant risks.

Analysis of Options:

* B. Lack of a documented process for controlling outsourced work (8.1.4.3): Major nonconformity.

A failure to control outsourced work is a serious systemic issue.

* C. Failure to include OH and S policy in contractor contracts (5.2.f): Not a major nonconformity.

While this is a nonconformity, it is procedural and not critical.

* D. No hazard assessment for installation works (6.1.2.2): Major nonconformity. A lack of hazard assessment for site-specific tasks is a serious issue.

* E. Missing safety data sheets for contractor chemicals (8.1.4.2): Not a major nonconformity. While important, this issue does not indicate systemic failure.

* G. Chemical hazards on installation sites not referenced in the hazard list (6.1.2.2): Major nonconformity. This reflects a failure in hazard identification and risk assessment.

* H. Internal audit program does not cover installation sites (9.2.2): Not a major nonconformity. This is a gap in auditing scope but does not directly endanger safety.

* I. Safe use of chemicals left to contractors: Not a major nonconformity. This could be addressed through improved contractor oversight rather than indicating systemic failure.

ISO References:

* Clause 8.1.4.3: Control of outsourced processes.

* Clause 6.1.2.2: Hazard identification and risk assessment.

* Clause 7.4.1: Communication requirements.

NEW QUESTION # 100

A well-known fast-food organisation (ISO 45001 certified) contracts young people to deliver orders; last week one of them died in a street accident riding for the first time a new motorbike provided by the organisation. You will lead the recertification audit in two weeks, and you plan to prepare a checklist to investigate this incident. The following are potential questions you might ask; match them to the related ISO

45001 clause/subclause.

Question related to the worker who had the accident	ISO 45001 clause/subclause
Was he made aware of the hazards related to this work?	
Was he trained to use the new motorbike?	
Was he asked to deliver too many orders in a short period of time?	
Was he carrying any contact details in case of an accident?	

To complete the table click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, drag and drop each option to the appropriate blank section.

6.1.2.1 8.2 7.2 7.3

Answer:

Explanation:

Question related to the worker who had the accident	ISO 45001 clause/subclause
Was he made aware of the hazards related to this work?	6.1.2.1
Was he trained to use the new motorbike?	7.2
Was he asked to deliver too many orders in a short period of time?	8.2
Was he carrying any contact details in case of an accident?	7.3

To complete the table click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, drag and drop each option to the appropriate blank section.

6.1.2.1 8.2 7.2 7.3

Explanation:

Question related to the worker who had the accident	ISO 45001 Clause/Subclause
Was he made aware of the hazards related to this work?	6.1.2.1
Was he trained to use the new motorbike?	7.2
Was he asked to deliver too many orders in a short period of time?	8.2
Was he carrying any contact details in case of an accident?	7.3

* Was he made aware of the hazards related to this work? # Clause 6.1.2.1: Clause 6.1.2.1 focuses on hazard identification. Organizations must identify hazards associated with work activities, such as operating a motorbike, and ensure workers are aware of these hazards.

* Was he trained to use the new motorbike? # Clause 7.2: Clause 7.2 requires organizations to ensure that workers are competent to perform their assigned tasks, including providing necessary training for new equipment like a motorbike.

* Was he asked to deliver too many orders in a short period of time? # Clause 8.2: Clause 8.2 relates to managing operational controls and ensuring that work processes do not impose undue risks, such as excessive workloads or time pressure.

* Was he carrying any contact details in case of an accident? # Clause 7.3: Clause 7.3 requires effective communication of information relevant to OH and S, including emergency contact details or procedures for accidents.

ISO References:

* Clause 6.1.2.1: Hazard identification.

* Clause 7.2: Competence.

* Clause 7.3: Awareness and communication.

* Clause 8.2: Operational control.

NEW QUESTION # 101

Which one option defines what is to be achieved by an audit?

- A. An audit criterion
- **B. The objective of the audit**
- C. A finding of the audit
- D. The scope of the audit"

Answer: B
