Salesforce Certified B2C Commerce Architect Sample Questions (Q34-Q39):

NEW QUESTION # 34

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases, json file below will accomplish this task?

- A)
- B)
- C)
- D)

- A. Option B
- **B. Option D**
- C. Option A
- D. Option C

Answer: B

NEW QUESTION # 35

There is an issue with the site when the domain is opened from Google search results. After researching the problem, it turns out that the site returns a 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add dynamic redirect if the URL contains parameter to Home Show. Add this snippet to the aliases configuration for the domain
- **B. Add dynamic catch-all rule to redirect to home page.**
- C. Add this snippet to the aliases configuration for the domain:
- D. Add this snippet to the aliases configuration for the domain

Answer: B

Explanation:

To address the issue of the site returning a 404 error when accessed with a parameter from Google search results, a dynamic catch-all rule to redirect such requests to the homepage is an effective solution (Answer A). This approach ensures that users landing from external links with appended parameters, which might not match any configured route or alias, are redirected to a valid page instead of seeing an error page. This improves the user experience and minimizes potential bounce rates caused by broken links or outdated URLs.

NEW QUESTION # 36

The Client plans to deploy a new payment provider and Order Management System on its existing B2C Commerce website. They have asked an Architect to advise which environment it should use to conduct load testing of its new integrations.

Which environment should be used as the ideal environment for this kind of load test?

- A. The Development Instance of a rental Realm
- B. The Production Instance of a rental Realm
- **C. The Development Instance of the existing Realm.**
- D. The Production instance of the existing Realm

Answer: C

Explanation:

For conducting load testing of new integrations with a payment provider and Order Management System, it is recommended to use the Development Instance of the existing Realm (Option B). This approach ensures that any issues found during testing do not affect the live production environment, while still allowing tests to be conducted in an environment that mirrors the production setup as closely as possible. This minimizes the risk of disruptive downtime or customer-facing errors when the integration goes live.

NEW QUESTION # 37

Northern Trail Outfitters (NTO) wants to integrate its product information management (PIM) system with B2C Commerce so shopping experiences can be relevant, personalized, and seamless across channels. They need the ability to search for product deltas in the PIM system and reflect those changes in B2C Commerce on a scheduled basis. The Solution Architect recommends using MuleSoft Accelerator for B2C Commerce for this integration.

Which two benefits should the Solution Architect highlight about API-led connectivity while implementing the MuleSoft accelerator for B2C Commerce?

Choose 2 answers

- A. It enforces a distributed approach and allows for the creation of Experience APIs, Data APIs, and System APIs.
- **B. It offers a template-driven approach for development.**
- **C. It lets the business quickly integrate different systems without involving IT.**
- D. It enables self-service and an increase in productivity through reusable microservices and APIs.

Answer: B,C
