Just come and try our M2 practice braindumps!

International Code Council Commercial Mechanical Inspector Sample Questions (Q19-Q24):

NEW QUESTION # 19

An equipment shutoff valve shall be in the same room and not more than how many feet away from the appliance?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

The IFGC requires the appliance shutoff valve to be located in the same room as the appliance and within 6 feet of the appliance . Therefore, the correct answer is A .

NEW QUESTION # 20

Infrared radiant heaters shall be installed:

- A. with a 6-ft. clearance on all sides.
- B. in accordance with UL 2158.
- C. with clearances from combustible material in accordance with the manufacturer's installation instructions.
- D. in accordance with UL 1240.

Answer: C

Explanation:

The ICC mechanical code provision for infrared radiant heaters states that the heaters must be installed with clearances from combustible material in accordance with the manufacturer's installation instructions .

That makes Option D the correct answer. The code does not establish a blanket 6-foot clearance on all sides in this section, and the exam expects the candidate to rely on the listed installation requirements for the appliance.

NEW QUESTION # 21

Where located on a roof with a 5:12 slope, a level platform shall be provided along the access panel of the furnace at least _____ inches wide.

- A. [option text not fully visible in the material you sent]
- B. 0
- C. 1
- D. 2

Answer: B

Explanation:

For appliances on roofs, ICC access provisions require a level platform at the appliance. The platform must be not less than 30 inches in any dimension . For the choices provided, that makes 30 inches the correct answer, which is Option C .

NEW QUESTION # 22

Shutoff valves in plastic pipe ground-source heat pump loop systems shall be installed on both sides of which one of the following?

- A. Pressure-reducing valves
- B. Change-in-material joints
- C. Expansion tanks
- D. Heat-fusion joints

Answer: A

Explanation:

In the IMC hydronic piping provisions for ground-source heat pump loop systems, shutoff valves are required on both sides of a pressure-reducing valve . That matches D . Heat-fusion joints and change-in-material joints do not trigger this two-sided shutoff-valve requirement.

NEW QUESTION # 23

Which of the following is not a required mechanical inspection?

- A. Underground
- B. Annual system test
- C. Final
- D. Rough-in

Answer: B

Explanation:

The ICC mechanical administrative inspection sequence includes underground inspection , rough-in inspection , and final inspection as required inspections. An annual system test is not listed as one of the required permit inspections in that section, so Option D is the correct answer. This fits the M2 General Administration content area, which includes permit and inspection administration.

NEW QUESTION # 24

.....

When we started offering International Code Council M2 exam questions and answers and exam simulator, we did not think that we will get such a big reputation. What we are doing now is incredible form of a guarantee.
