With the rapid development of computer, network, and semiconductor techniques, the market for people is becoming more and more hotly contested. Passing a 1Z0-1055-25 exam to get a certificate will help you to look for a better job and get a higher salary. If you are tired of finding a high quality study material, we suggest that you should try our 1Z0-1055-25 Exam Prep. Because our 1Z0-1055-25 exam materials not only has better quality than any other same learn products, but also can guarantee that you can pass the 1Z0-1055-25 exam with ease.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.
Topic 2	• Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.
Topic 3	• Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.

Topic 4	• Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.
Topic 5	• Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.

This way you can save money even if 1Z0-1055-25 introduces fresh Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional 1Z0-1055-25 exam updates. Purchase the Oracle 1Z0-1055-25 preparation material to get certified on the first attempt.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q40-Q45):

NEW QUESTION # 40
Your company has set certain entertainment daily limits in its Entertainment Policy to restrict employee entertainment expenses. Oracle Expenses supports the requirements within your entertainment policy where you can configure and define daily sum limits, along with single instance limits and yearly limits that depend on your policy requirements.
What are three considerations when enabling and defining daily limits in entertainment policies?

- A. The limits defined in the policy will be enforced per attendee only if the policy has rate determinants set up.
- B. This policy can be associated only with entertainment policies.
- C. Use the entertainment policy to define single, daily, or yearly limits that need to be enforced per attendee.
- D. The limits defined in the policy will be enforced per attendee regardless of whether the policy has rate determinants set up.
- E. This policy can be associated with both travel and entertainment policies.
- F. Use the entertainment policy to define single or multiple daily limits that need to be enforced per attendee or group of attendees.
- G. The limits apply only to company employees and excludes nonemployees.

Answer: A,B,C

NEW QUESTION # 41
Your company asks you to build new Payables reports. You will be using Oracle Transactional Business Intelligence (OTBI) and deep links. Deep links allow you to directly drill down from OTBI reports to purchase orders and view the related purchase order details. Which three predefined job roles allow you to use this drill-down feature?

- A. Accounts Payable Specialist
- B. Accounts Payable Agent
- C. Account Payable Invoice Supervisor
- D. Accounts Payable Manager
- E. Accounts Payable Analyst

Answer: A,D,E

Explanation:
Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, Oracle Transactional Business Intelligence (OTBI) provides robust reporting capabilities, including the use of deep links that enable users to drill down from summary reports into detailed transactional data, such as purchase orders. Access to these drill-down features is governed by specific job roles that encompass the necessary privileges.

Predefined Job Roles with Drill-Down Capabilities:

Accounts Payable Analyst (Option A):

Role Overview: This role is primarily focused on analyzing payables data, including the ability to access and drill down into detailed transactions to support financial analysis and reporting.

Privileges: Includes access to OTBI reports and the capability to drill down into transactional details such as invoices and payments.

Reference:

Accounts Payable Manager (Option B):

Role Overview: This managerial role oversees the entire accounts payable process, ensuring efficient operations and compliance. The role requires comprehensive access to payables data, including the ability to drill down into specific transactions for oversight and decision-making.

Privileges: Grants access to manage and review payables transactions, with drill-down capabilities into invoices, payments, and related purchase orders.

Accounts Payable Specialist (Option E):

Role Overview: This role is responsible for the day-to-day processing of accounts payable transactions, including invoice entry and payment processing. Access to detailed transaction data is essential for resolving issues and ensuring accuracy.

Privileges: Provides the ability to view and process payables transactions, with drill-down access to detailed information such as purchase order details linked to invoices.

NEW QUESTION # 42

You're a Payables supervisor, and your team has been struggling to keep up with the high volume of incomplete invoices coming through the Oracle Cloud Supplier Portal, causing delays in timely period closures. As a Payables supervisor, you have the ability to identify and then cancel incomplete supplier portal invoices without having to contact suppliers.

Which two options are available for the Payables Supervisor to identify incomplete supplier portal invoices for cancellation?

- A. Query invoices on the Manage Invoices page
- B. Run the Period Close Exception Report
- C. Run the Period Invoice Audit Report
- D. Query the Payables Invoice Register

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth

Managing incomplete invoices is crucial to ensure a smooth period close process in Oracle Financials Cloud. As a Payables Supervisor, you have specific tools and reports at your disposal to identify and address these incomplete supplier portal invoices:

Query Invoices on the Manage Invoices Page (Option C):

Purpose: The Manage Invoices page allows you to search and view all invoices within the system. By applying filters such as status (e.g., "Incomplete") and source (e.g., "Supplier Portal"), you can identify invoices that are incomplete and originated from the supplier portal.

Action Steps:

Navigate to the Manage Invoices page.

Use the search filters to specify criteria:

Status: Set to "Incomplete".

Source: Set to "Supplier Portal".

Review the filtered list to identify invoices that require cancellation.

Reference:

Run the Period Close Exception Report (Option D):

Purpose: The Payables Period Close Exceptions Report provides details of transactions that prevent the Payables period from closing, including incomplete invoices. Running this report helps in identifying any such invoices that need attention before period closure.

Action Steps:

Navigate to the Scheduled Processes work area.

Submit the Payables Period Close Exceptions Report.

Review the report output to identify incomplete supplier portal invoices.

Options A (Query the Payables Invoice Register) and B (Run the Period Invoice Audit Report) are not specifically designed to identify incomplete invoices:

Payables Invoice Register: This report provides a list of invoices but does not specifically highlight incomplete ones.

Period Invoice Audit Report: This report focuses on auditing invoices for compliance and accuracy, not necessarily on their completion status.

Therefore, the most effective tools for identifying incomplete supplier portal invoices for cancellation are Option C: Query invoices on the Manage Invoices page and Option D: Run the Period Close Exception Report.

NEW QUESTION # 43

You are a consultant for a mid-sized company. They have asked you to identify Cash Management reports that can be used to gain a better understanding of the company's cash position. You found four key reports.

Which option correctly matches each report with its description?

Report	Description (To be matched)
1. Cash to General Ledger Reconciliation Report	(Drag and drop correct description here)
2. Bank Statement Report	(Drag and drop correct description here)
3. Cash in Transit Report	(Drag and drop correct description here)
4. Bank Statement Analysis Report	(Drag and drop correct description here)

Description
Lists all transactions for a specific bank account that have been remitted to the bank but have not been cleared
Displays the bank statements that are used to analyze balances and transaction details
Displays balance and transaction information for specific bank statements
Lists bank statement transactions that are accounted in GL but are not reconciled in Cash Management

Answer:

Explanation:

Report	Description (To be matched)
1. Cash to General Ledger Reconciliation Report	Lists bank statement transactions that are accounted in GL but are not recor
2. Bank Statement Report	Displays balance and transaction information for specific bank statements
3. Cash in Transit Report	Lists all transactions for a specific bank account that have been remitted to t cleared
4. Bank Statement Analysis Report	Displays the bank statements that are used to analyze balances and transac

Description
Lists all transactions for a specific bank account that have been remitted to the bank but have not been cleared
Displays the bank statements that are used to analyze balances and transaction details
Displays balance and transaction information for specific bank statements
Lists bank statement transactions that are accounted in GL but are not reconciled in Cash Management

NEW QUESTION # 44

You participated as a functional consultant in the implementation of Oracle Procurement as well as Payables for customer ABC Consulting. A Payables Analyst has logged a ticket stating that the "Create Supplier" task is not showing up in the Supplier work are a. You checked the related settings and found that the Payables Analyst user account has been defined as a Procurement Agent.

Why was the Payables Analyst NOT able to see the "Create Supplier" task in the Supplier work area?

- A. The analyst was not given the Supplier Manager role.
- B. The analyst was not given the Supplier Administrator role.
- C. The analyst was not given the Procurement Administrator role.
- D. The analyst was not given the Procurement Requester role.

Answer: A

Explanation:
Comprehensive and Detailed In-Depth
In Oracle Fusion Applications, access to specific tasks and functionalities is governed by the roles assigned to a user. The "Create Supplier" task within the Supplier work area is a critical function that allows authorized users to add new suppliers to the system. To access this task, a user must possess the appropriate roles that grant the necessary permissions.
A . The analyst was not given the Procurement Administrator role.
The Procurement Administrator role encompasses a broad range of procurement-related activities, including configuration and oversight functions. However, the ability to create suppliers is not inherently included within this role's permissions. Therefore, assigning the Procurement Administrator role alone would not grant access to the "Create Supplier" task.
B . The analyst was not given the Supplier Manager role.
The Supplier Manager role is specifically designed to manage supplier-related activities, including the creation and maintenance of supplier records. Assigning this role to a user provides them with the necessary permissions to access the "Create Supplier" task within the Supplier work area. In the scenario described, the absence of the Supplier Manager role is the reason the Payables Analyst cannot see the "Create Supplier" task. This is corroborated by Oracle's documentation, which states that users require the Supplier Manager role to create suppliers.
support.oracle.com
C . The analyst was not given the Supplier Administrator role.
While the Supplier Administrator role grants access to certain supplier-related functions, it does not include the permissions necessary to create new suppliers. Users with only the Supplier Administrator role may have visibility into supplier information but lack the capability to add new supplier records. Therefore, the absence of this role is not the cause of the issue.
D . The analyst was not given the Procurement Requester role.
The Procurement Requester role is intended for users who initiate purchase requisitions and related procurement activities. This role does not encompass supplier creation capabilities. Assigning the Procurement Requester role would not grant access to the "Create Supplier" task, and its absence is not related to the issue at hand.
In summary, to enable the Payables Analyst to access the "Create Supplier" task, the Supplier Manager role must be assigned to their user account. This role provides the necessary permissions to create and manage supplier records within the Oracle Fusion Applications.
