

# Updated Amazon CLF-C02 exam practice material in 3 different formats

P.S. Free 2026 Amazon CLF-C02 dumps are available on Google Drive shared by Dumpkiller: <https://drive.google.com/open?id=1SErXcqMxpZnsoMdmvgh3P0Ca1nPV1V41>

In order to meet the different need from our customers, the experts and professors from our company designed three different versions of our CLF-C02 exam questions for our customers to choose, including the PDF version, the online version and the software version. Now I want to introduce the online version of our CLF-C02 learning guide to you. The most advantage of the online version is that this version can support all electronic equipment. If you choose the online version of our CLF-C02 study materials, you can use our products by your any electronic equipment.

## Amazon CLF-C02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Billing, Pricing, and Support:</b> This section contrasts pricing methods and budgeting resources management. It also tests understanding of billing methods, identifying support options, and technical resources.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Cloud Technology and Services:</b> Describe ways to access AWS services in AWS Cloud and explore connectivity options. It deals with defining the global infrastructure of AWS, computing services, and network services.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• Security and Compliance: This section involves understanding the shared responsibility framework of AWS in addition to compliance and governance. It also involves exploring the management capabilities of AWS by exploring its security capabilities.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Cloud Concepts: This section involves knowledge of value proposition and exploring design rules of AWS. It covers the advantages of techniques for moving over to AWS cloud and developing a good understanding of cloud economics.</li> </ul>

## New CLF-C02 Exam Cram & CLF-C02 Test Duration

After paying our CLF-C02 exam torrent successfully, buyers will receive the mails sent by our system in 5-10 minutes. Then candidates can open the links to log in and use our CLF-C02 test torrent to learn immediately. Because the time is of paramount importance to the examinee, everyone hope they can learn efficiently. So candidates can use our CLF-C02 guide questions immediately after their purchase is the great advantage of our product. The language is easy to be understood makes any learners have no obstacles. The CLF-C02 Test Torrent is suitable for anybody no matter he or she is in-service staff or the student, the novice or the experience people who have worked for years. The software boosts varied self-learning and self-assessment functions to check the results of the learning.

## Amazon AWS Certified Cloud Practitioner Sample Questions (Q344-Q349):

### NEW QUESTION # 344

A company needs to use dashboards and charts to analyze insights from business data. Which AWS service will provide the dashboards and charts for these insights?

- A. Amazon Aurora
- B. AWS CloudTrail
- C. Amazon QuickSight
- D. Amazon Macie

**Answer: C**

Explanation:

The correct answer is C because Amazon QuickSight is an AWS service that will provide the dashboards and charts for the insights from business data. Amazon QuickSight is a fully managed, scalable, and serverless business intelligence service that enables users to create and share interactive dashboards and charts. Amazon QuickSight can connect to various data sources, such as Amazon S3, Amazon RDS, Amazon Redshift, and more. Amazon QuickSight also provides users with machine learning insights, such as anomaly detection, forecasting, and natural language narratives. The other options are incorrect because they are not AWS services that will provide the dashboards and charts for the insights from business data. Amazon Macie is an AWS service that helps users discover, classify, and protect sensitive data stored in Amazon S3. Amazon Aurora is an AWS service that provides a relational database that is compatible with MySQL and PostgreSQL. AWS CloudTrail is an AWS service that enables users to track user activity and API usage across their AWS account. Reference: Amazon QuickSight FAQs

### NEW QUESTION # 345

An ecommerce company wants to design a highly available application that will be hosted on multiple Amazon EC2 instances. How should the company deploy the EC2 instances to meet these requirements?

- A. Across multiple VPCs
- B. Across multiple edge locations
- C. Across multiple Availability Zones
- D. Across multiple AWS accounts

**Answer: C**

Explanation:  
Explanation

The company should deploy the EC2 instances across multiple Availability Zones to design a highly available application. Availability Zones are isolated locations within an AWS Region that are engineered to be fault-tolerant and operate independently of each other. By deploying the EC2 instances across multiple Availability Zones, the company can ensure that their application can withstand the failure of an entire Availability Zone and continue to operate with minimal disruption. Deploying the EC2 instances across multiple edge locations, VPCs, or AWS accounts will not provide the same level of availability and fault tolerance as Availability Zones. Edge locations are part of the Amazon CloudFront service, which is a content delivery network (CDN) that caches and serves web content to users. VPCs are virtual networks that isolate the AWS resources within an AWS Region. AWS accounts are the primary units of ownership and access control for AWS resources<sup>12</sup>

#### NEW QUESTION # 346

A company wants its Amazon EC2 instances to operate in a highly available environment, even if there is a natural disaster in a particular geographic area.

Which solution achieves this goal?

- A. Use EC2 instances in multiple edge locations.
- B. Use EC2 instances in a single Availability Zone.
- **C. Use EC2 instances in multiple AWS Regions.**
- D. Use Amazon CloudFront with the EC2 instances configured as the source.

**Answer: C**

Explanation:

Explanation

To achieve high availability in the event of a natural disaster, the company should use EC2 instances in multiple AWS Regions. AWS Regions are geographically isolated areas that consist of multiple Availability Zones. Availability Zones are physically separate locations within an AWS Region that are engineered to be isolated from failures. By using EC2 instances in multiple AWS Regions, the company can ensure that its applications can continue to run even if one Region is affected by a disaster. AWS Global Infrastructure AWS Well-Architected Framework

#### NEW QUESTION # 347

A company needs to set a maximum spending limit on AWS services each month. The company also needs to set up alerts for when the company reaches its spending limit.

Which AWS service or tool should the company use to meet these requirements?

- A. Cost Explorer
- B. Service Quotas
- **C. AWS Budgets**
- D. AWS Trusted Advisor

**Answer: C**

Explanation:

Explanation

AWS Budgets is a service that helps you plan your service usage, service costs, and instance reservations, and track how close your plan is to your budgeted amount. You can set custom budgets that alert you when you exceed (or are forecasted to exceed) your budgeted thresholds. You can also use AWS Budgets to set a maximum spending limit on AWS services each month and set up alerts for when you reach your spending limit. Cost Explorer is a service that enables you to visualize, understand, and manage your AWS costs and usage over time. You can use Cost Explorer to view charts and graphs that show how your costs are trending, identify areas that need further inquiry, and see the impact of your cost management actions. However, Cost Explorer does not allow you to set a maximum spending limit or alerts for your AWS services. AWS Trusted Advisor is a service that provides you real time guidance to help you provision your resources following AWS best practices, including security and performance. It can help you monitor for cost optimization opportunities, such as unused or underutilized resources, but it does not allow you to set a maximum spending limit or alerts for your AWS services. Service Quotas is a service that enables you to view and manage your quotas, also referred to as limits, from a central location. Quotas, also referred to as limits, are the maximum number of resources that you can create in your AWS account. However, Service Quotas does not allow you to set a maximum spending limit or alerts for your AWS services.

### NEW QUESTION # 348

Which AWS tool or feature acts as a VPC firewall at the subnet level?

- A. Internet gateway
- B. Security group
- C. Traffic Mirroring
- **D. Network ACL**

**Answer: D**

Explanation:

Network ACLs (NACLs) are subnet-level firewalls in AWS, controlling inbound and outbound traffic for VPC subnets. They provide an additional layer of security by allowing or denying traffic based on IP protocol, source and destination IP, and port. Security groups operate at the instance level, while Traffic Mirroring and Internet Gateways do not function as firewalls at the subnet level.

### NEW QUESTION # 349

.....

With the advent of knowledge times, we all need some professional certificates such as Amazon CLF-C02 to prove ourselves in different working or learning condition. So making right decision of choosing useful practice materials is of vital importance. Here we would like to introduce our Amazon CLF-C02 practice materials for you with our heartfelt sincerity.
