Answer: A,B,C

NEW QUESTION # 42

In which three ways does FortiSASE help organizations ensure secure access for remote workers? (Choose three.)

- A. It uses the identity & access management (IAM) portal to validate the identities of remote workers.
- B. It offers zero trust network access (ZTNA) capabilities.
- C. It enforces multi-factor authentication (MFA) to validate remote users.
- D. It enforces granular access policies based on user identities.
- E. It secures traffic from endpoints to cloud applications.

Answer: B,D,E

Explanation:

FortiSASE provides several features to ensure secure access for remote workers. The following three ways are particularly relevant: It secures traffic from endpoints to cloud applications (Option B):

FortiSASE secures all traffic between remote endpoints and cloud applications by inspecting it in real time. This includes applying security policies, threat detection, and data protection measures to ensure that traffic is safe and compliant.

It offers zero trust network access (ZTNA) capabilities (Option D):

ZTNA ensures that remote workers are granted access to resources based on strict verification of their identity and device posture. By treating all users and devices as untrusted by default, ZTNA minimizes the risk of unauthorized access and lateral movement within the network.

It enforces granular access policies based on user identities (Option E):

FortiSASE allows administrators to define and enforce fine-grained access policies based on user identities, roles, and other attributes. This ensures that remote workers only have access to the resources they need, reducing the attack surface.
