Valid Exam HPE2-W12 Preparation | Training HPE2-W12 Kit

Grasping different consumers' learning situation in a comprehensive way, the operation system of our HPE2-W12 practice materials can adapt to different consumer groups. Facts speak louder than words. Through years' efforts, our HPE2-W12 exam preparation has received mass favorable reviews because the 99% pass rate of our HPE2-W12 Study Guide is the powerful proof of trust of the public. No other vendor can do this like us, we are the unique and best HPE2-W12 learning prep provider!

HP Selling HPE Aruba Networking Solutions Sample Questions (Q60-Q65):

NEW QUESTION # 60
Which business outcome is a high priority for most Chief Information Security Officers (CISO)?

- A. Improving operational continuity by minimizing risks and attack surfaces.
- B. Ensuring that employees can only access resources from within the corporate campus.
- C. Allowing network admins to use their preferred security monitoring tools.
- D. Planning network security so that they can assume no breach will ever occur.

Answer: A

Explanation:
The correct answer is C because CISOs are primarily focused on reducing business risk, minimizing the attack surface, and ensuring operational continuity. Instead of assuming that breaches will never occur, modern security strategies such as Zero Trust and SASE aim to mitigate risks, contain breaches, and protect critical business operations to maintain availability and resilience.

NEW QUESTION # 61
A senior IT manager tells you that she wants IT staff members to spend less time troubleshooting issues so they have more time to focus on new initiatives. How can HPE Aruba Networking deliver the senior IT manager's desired outcome?

- A. HPE Aruba Networking ClearPass monitors network devices' performance and automatically notifies IT admins of performance issues.
- B. HPE Aruba User Experience Insight (UXI) helps IT determine why data center applications are not performing as well as they should.
- C. HPE Aruba Networking Edge-to-Cloud solutions rely on AI to automate the onboarding of devices.
- D. HPE Aruba Networking Central with AI for Networking accelerates troubleshooting by providing insights and recommendations that help remedy issues.

Answer: D

Explanation:
The correct answer is D because Aruba Central with AI for Networking leverages machine learning and AI-powered insights to accelerate troubleshooting, provide root-cause analysis, and deliver prescriptive recommendations. This reduces the time IT staff spends on manual problem- solving, freeing them to focus on innovation and strategic initiatives.

NEW QUESTION # 62
Based on recent trends, which common challenge can HPE Aruba Networking help customers overcome?

- A. Difficulties making employees understand that accessing applications securely from home is impossible.
- B. Struggles in accommodating the data shift from the edge to the main corporate data center.
- C. Difficulties providing secure, consistent connectivity for remote workers.
- D. Struggles in optimizing overprovisioned networks for a lower load of edge devices.

Answer: C

Explanation:
The correct answer is C because one of the most pressing challenges created by the recent shift to hybrid and remote work is ensuring secure, consistent, and reliable connectivity for remote workers. Aruba addresses this with Zero Trust Network Access (ZTNA), SD-WAN, and Secure Service Edge (SSE) capabilities integrated into Aruba ESP. These solutions simplify secure remote access and deliver consistent user experiences regardless of location.
Relevant extracts from official HPE Aruba Networking documentation:
* "The expansion of remote work has created the challenge of delivering secure, reliable connectivity for users outside the corporate perimeter."
* "Aruba's EdgeConnect SD-WAN and ZTNA solutions provide consistent access and enforce least- privilege policies to secure remote connectivity."
* "By combining Zero Trust, SASE, and AI-powered WAN optimization, Aruba ensures remote workers experience the same level of performance and security as they would on campus."
* "This addresses one of the top customer priorities: maintaining business continuity while supporting a distributed workforce." Why

the other options are incorrect:
* AThe challenge is not about data moving to the corporate data center-modern architectures are distributed and cloud-first.
* BNetworks today face underprovisioning and overutilization due to IoT and remote traffic, not overprovisioned networks with fewer edge devices.
* DThis is not a valid business challenge-Aruba enables secure access from home, it does not assume it' s impossible.

NEW QUESTION # 63

A customer has many small sites that connect over a wide area network (WAN) to the customer's data center and access the Internet from there. Due to changes in traffic patterns, the CIO now wants to stop sending Internet-bound traffic through the data center, but the Head of IT Security is concerned about potential security risks from that change. What benefit of HPE Aruba Networking solutions should you emphasize?

- A. HPE Aruba Networking offers branch-in-the-box solutions with all the services branches require, so branch devices no longer need to send traffic to the Internet.
- B. HPE Aruba Networking Fabric Composer automatically establishes a secure fabric across all the customer's sites.
- C. HPE Aruba Networking solutions optimize network speeds to such a high degree that the company can continue sending all traffic through the data center.
- D. HPE Aruba Networking offers SD-WAN solutions for branches with built-in next-generation firewall capabilities.

Answer: D

Explanation:
The correct answer isCbecauseHPE Aruba Networking EdgeConnect SD-WANprovides secure local Internet breakout at branch sites withintegrated next-generation firewall (NGFW) and security features.
This allows Internet-bound traffic to be securely routed directly from the branch instead of being backhauled through the data center, while still ensuring full visibility and threat protection.
Relevant extracts from HPE Aruba Networking documentation:
* "Aruba EdgeConnect SD-WAN enables local Internet breakout with integrated NGFW and IDS/IPS capabilities, reducing latency while ensuring strong security."
* "This approach eliminates the inefficiencies of backhauling SaaS and Internet traffic to the data center, without compromising security posture."
* "Built-in security services in Aruba SD-WAN address the CIO's need for performance and the CISO's need for risk mitigation."
* "Aruba EdgeConnect integrates with SSE and SASE frameworks to extend security policies consistently across all branch sites."
Why the other options are incorrect:
* AKeeping all traffic routed through the data center defeats the purpose of modern SD-WAN and SaaS- optimized architectures.
* BWhile Aruba provides branch-in-a-box solutions, the specific concern here is security for Internet breakout, addressed by SD-WAN with NGFW.
* DFabric Composer is adata center fabric orchestration tool, not designed for WAN/branch security.

NEW QUESTION # 64

Which Aruba wireless feature helps improve performance in high-density environments such as stadiums?

- A. ClientMatch
- B. STP
- C. DHCP relay
- D. Static routing

Answer: A

Explanation:
Aruba ClientMatch wireless optimization dynamically steers clients to the best access point and radio band for optimal performance.

NEW QUESTION # 65

......

To let the clients have an understanding of their mastery degree of our HPE2-W12 guide materials and get a well preparation for the test, we provide the test practice software to the clients. The test practice software of HPE2-W12 practice guide is based on the real test questions and its interface is easy to use. The test practice software boosts the test scheme which stimulate the real test and boost multiple practice models, the historical records of the practice of HPE2-W12 Training Materials and the self-evaluation function.
