

# Microsoft AZ-500 Latest Test Cost: Microsoft Azure Security Technologies - VCEdumps Pass-leading Provider

BTW, DOWNLOAD part of VCEdumps AZ-500 dumps from Cloud Storage: <https://drive.google.com/open?id=1qCDkIH8eNZUdxxdcsCEIKEPw-ZdinuuB>

It is a challenging exam and not a traditional exam. But complete Microsoft AZ-500 exam preparation can enable you to crack the Microsoft AZ-500 exam easily. For the quick and complete Microsoft Azure Security Technologies (AZ-500) exam preparation you can trust AZ-500 Exam Practice test questions. The Microsoft AZ-500 exam practice test questions have already helped many Microsoft AZ-500 exam candidates in their preparation and success.

The Microsoft AZ-500 Exam consists of various topics such as securing Azure resources and data services, implementing platform protection, managing identity and access, monitoring and reporting on Azure security, and responding to security incidents. To pass the exam, you need to have a solid understanding of Azure security features, tools, and best practices. It is recommended that candidates have at least one year of experience in implementing security controls in Azure environments.

## AZ-500 Valid Exam Forum | Reliable AZ-500 Test Tips

How VCEdumps will help you in passing the Microsoft Azure Security Technologies? VCEdumps online digital Microsoft AZ-500 exam questions are the best way to prepare. Using our Microsoft AZ-500 Exam Dumps, you will not have to worry about whatever topics you need to master.

Microsoft AZ-500 Exam is a highly regarded certification in the cloud computing industry and can open up many career opportunities for professionals. Microsoft Azure Security Technologies certification demonstrates the candidate's proficiency in implementing and managing security controls in Microsoft Azure and is highly valued by employers. Microsoft Azure Security Technologies certification also validates the candidate's knowledge and skills in cloud security, which is a critical skill set for organizations that are adopting cloud technologies. Overall, the Microsoft AZ-500 Exam is an excellent way for professionals to demonstrate their expertise in securing and managing cloud environments and advance their careers in the cloud computing industry.

## Microsoft Azure Security Technologies Sample Questions (Q514-Q519):

### NEW QUESTION # 514

You need to ensure that you can meet the security operations requirements. What should you do first?

- A. Integrate Security Center and Microsoft Cloud App Security.
- B. Turn on Auto Provisioning in Security Center.
- C. Upgrade the pricing tier of Security Center to Standard.
- D. Modify the Security Center workspace configuration.

Answer: C

Explanation:

Section: [none]

Explanation:

The Standard tier extends the capabilities of the Free tier to workloads running in private and other public clouds, providing unified security management and threat protection across your hybrid cloud workloads. The Standard tier also adds advanced threat detection capabilities, which uses built-in behavioral analytics and machine learning to identify attacks and zero-days exploits, access and application controls to reduce exposure to network attacks and malware, and more.

Scenario: Security Operations Requirements

Litware must be able to customize the operating system security configurations in Azure Security Center.

### NEW QUESTION # 515

You create a new Azure subscription that is associated to a new Azure Active Directory (Azure AD) tenant.

You create one active conditional access policy named Portal Policy. Portal Policy is used to provide access to the Microsoft Azure Management cloud app.

The Conditions settings for Portal Policy are configured as shown in the Conditions exhibit. (Click the Conditions tab.)

**Portal Policy** [Info] [Delete]

**Conditions** [Info]

**Locations** [Info] [Close]

**Name**  
Portal Policy

**Assignments**

Users and groups [Info]  
All users

Cloud apps [Info]  
1 app included

Conditions [Info]  
1 condition selected

**Access controls**

Grant [Info]  
2 controls selected

Session [Info]  
0 controls selected

**Device platforms** [Info]  
Not configured

**Locations** [Info]  
1 included

**Client apps (preview)** [Info]  
Not configured

**Device state (preview)** [Info]  
Not configured

**Control user access based on their physical location.** [Learn more]  
Configure [Info]  
**Yes** No

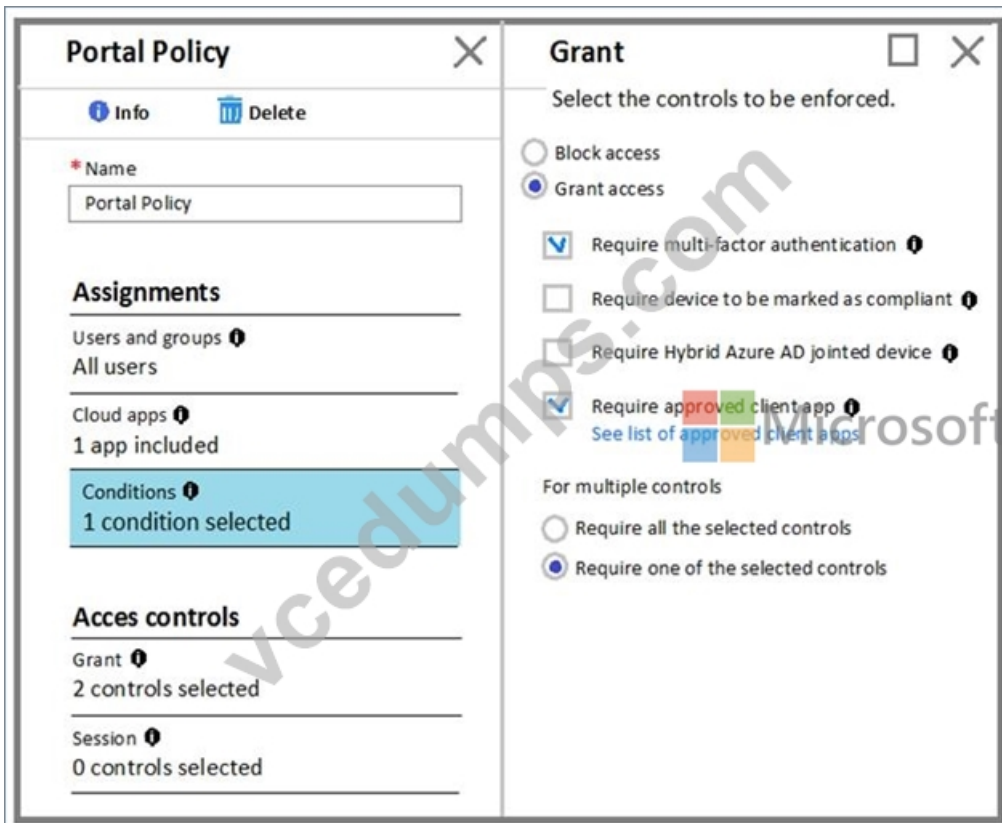

**Include** Exclude

Any location  
 All trusted locations  
 Selected locations

Select  
Contoso

Contoso ...

The Grant settings for Portal Policy are configured as shown in the Grant exhibit. (Click the Grant tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Users from the Contoso named location must use multi-factor authentication (MFA) to access the Azure portal.	<input type="radio"/>	<input type="radio"/>
Users from the Contoso named location must use multi-factor authentication (MFA) to access the web services hosted in the Azure subscription.	<input type="radio"/>	<input type="radio"/>
Users external to the Contoso named location must use multi-factor authentication (MFA) to access the Azure portal.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

Statements	Yes	No
Users from the Contoso named location must use multi-factor authentication (MFA) to access the Azure portal.	<input type="radio"/>	<input checked="" type="radio"/>
Users from the Contoso named location must use multi-factor authentication (MFA) to access the web services hosted in the Azure subscription.	<input checked="" type="radio"/>	<input type="radio"/>
Users external to the Contoso named location must use multi-factor authentication (MFA) to access the Azure portal.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
Users from the Contoso named location must use multi-factor authentication (MFA) to access the Azure portal.	<input type="radio"/>	<input checked="" type="radio"/>
Users from the Contoso named location must use multi-factor authentication (MFA) to access the web services hosted in the Azure subscription.	<input checked="" type="radio"/>	<input type="radio"/>
Users external to the Contoso named location must use multi-factor authentication (MFA) to access the Azure portal.	<input type="radio"/>	<input type="radio"/>

Box 1: No

The Contoso location is excluded

Box 2: Yes

Box 3: Yes

### NEW QUESTION # 516

You have 15 Azure virtual machines in a resource group named RG1.

All virtual machines run identical applications.

You need to prevent unauthorized applications and malware from running on the virtual machines.

What should you do?

- A. Apply an Azure policy to RG1.
- **B. From Microsoft Defender for Cloud, configure adaptive application controls.**
- C. Configure Azure Active Directory (Azure AD) Identity Protection.
- D. Apply a resource lock to RG1.

**Answer: B**

Explanation:

Microsoft Defender for Cloud helps you prevent, detect, and respond to threats. Defender for Cloud gives you increased visibility into, and control over, the security of your Azure resources. It provides integrated security monitoring and policy management across your Azure subscriptions. It helps detect threats that might otherwise go unnoticed, and works with a broad ecosystem of security solutions.

Defender for Cloud helps you optimize and monitor the security of your virtual machines by:

Providing security recommendations for the virtual machines. Example recommendations include: apply system updates, configure ACLs endpoints, enable antimalware, enable network security groups, and apply disk encryption.

Monitoring the state of your virtual machines.

<https://learn.microsoft.com/en-us/azure/security/fundamentals/virtual-machines-overview>

### NEW QUESTION # 517

You are configuring just in time (JIT) VM access to a set of Azure virtual machines.

You need to grant users PowerShell access to the virtual machine by using JIT VM access.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Permission that must be granted to users on VM:

- Read
- Update
- View
- Write

TCP port that must be allowed:

- 22
- 25
- 3389
- 5986

Answer:

Explanation:

Answer Area Microsoft

Permission that must be granted to users on VM:

- Read
- Update
- View
- Write

TCP port that must be allowed:

- 22
- 25
- 3389
- 5986

NEW QUESTION # 518

You need to configure support for Azure Sentinel notebooks to meet the technical requirements.

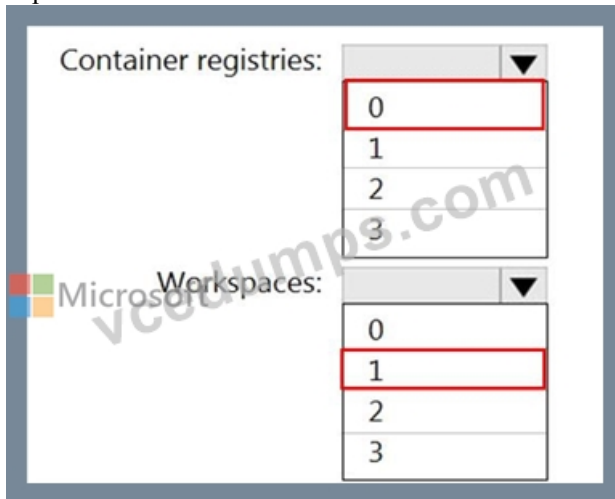

What is the minimum number of Azure container registries and Azure Machine Learning workspaces required?

Container registries:

Workspaces:

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/sentinel/notebooks>
