# Verified Exam NS0-185 Cram Review Spend Your Little Time and Energy to Pass Network Appliance NS0-185 exam

PDFBraindumps has many NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) practice questions that reflect the pattern of the real Network Appliance NS0-185 exam. PDFBraindumps allows you to create a NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) exam dumps according to your preparation. It is easy to create the NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) practice questions by following just a few simple steps. Our NS0-185 exam dumps are customizable based on the time and type of questions.

A good brand is not a cheap product, but a brand that goes well beyond its users' expectations. The value of a brand is that the NS0-185 exam questions are more than just exam preparation tool -- it should be part of our lives, into our daily lives. Do this, therefore, our NS0-185 question guide has become the industry well-known brands, but even so, we have never stopped the pace of progress, we have been constantly updated the NS0-185 real study dumps. The most important thing is that the NS0-185 exam questions are continuously polished to be sold, so that users can enjoy the best service that our products bring. Our NS0-185 real study dumps provide users with comprehensive learning materials, so that users can keep abreast of the progress of The Times.

NS0-185 Latest Demo | NS0-185 Mock Exams

If you are preparing for the Network Appliance NS0-185 exam dumps our NS0-185 Questions help you to get high scores in your Network Appliance NS0-185 exam. Test your knowledge of the Network Appliance NS0-185 Exam Dumps with PDFBraindumps Network Appliance NS0-185 practice questions. The software is designed to help with Network Appliance NS0-185 exam dumps preparation.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q63-Q68):

NEW QUESTION # 63
Node 3 has taken over Node 4. You are attempting to access Node 4 on its management interface but cannot do it.
In this scenario, how would you access Node 4's management interface?

- A. You have not waited long enough for the failover timeout.
- B. Use SSH to a cluster interconnect switch.
- C. Connect to Node 3 and use the HA interconnect.
- D. You must use the Service Processor; node management LIFs do not fall over between nodes.

Answer: D

NEW QUESTION # 64
You want to add an AFF A400 HA pair to an existing cluster.
In this scenario, which LIF type is required?

- A. intercluster
- B. node-mgmt

- C. cluster-mgmt
- D. data

Answer: A

Explanation:
When expanding an ONTAP cluster by adding new nodes or HA pairs, intercluster LIFs are required to enable secure communication between clusters or nodes during join and expansion workflows. Intercluster LIFs provide IP-based connectivity used for cluster peering, node addition, and replication setup.
Cluster management LIFs are used for administrative access, node management LIFs provide per-node management access, and data LIFs are used for client I/O. None of these LIF types support the inter-node communication required during cluster expansion. Therefore, an intercluster LIF is required.

NEW QUESTION # 65
A customer has two Cisco 40GbE data switches. They want to connect the switches to an AFF A400 HA pair.
The switches and the AFF A400 are approximately seven meters apart.
Referring to the exhibit, which two supported actions would allow you to accomplish this task? (Choose two.)

- A. Relocate the switches or the AFF A400 so that the distance is less than five meters.
- B. Install 10 meter NetApp supported copper cables.
- C. Change the requirement for optical cables.
- D. Change the requirement for Ethernet cables.

Answer: B,C

Explanation:
NetApp hardware installation documentation strictly defines supported cable types and distances for Ethernet connectivity. For 40GbE connections using QSFP+ interfaces, NetApp supports both copper and optical cabling, each with specific distance limitations.
The exhibit shows supported copper cable options, including 10-meter NetApp-supported copper cables, which exceed the current seven-meter requirement. Installing these supported cables is a valid and compliant solution.
Alternatively, the customer can change the requirement to optical cables, which support significantly longer distances and are fully supported for AFF A400 40GbE connectivity. Optical cables are commonly used when distance exceeds passive copper limitations.
Relocating equipment is not required when supported cabling options exist. Changing "Ethernet cable requirements" generically is not a valid technical action.
Therefore, the correct answers are B and D.

NEW QUESTION # 66
You are preparing to replace a Cisco Nexus 92300YC switch. You have executed the cluster ping-cluster node1 command and received the output shown in the exhibit.
Which two checks indicate that the cluster is ready for the replacement to be performed? (Choose two.)

- A. 2 paths up, 0 paths down (TCP check)
- B. larger than PMTU communication succeeds on 4 path(s)
- C. 2 paths up, 0 paths down (UDP check)
- D. basic connectivity succeeds on 4 path(s)

Answer: A,C

Explanation:
For safe cluster switch replacement, ONTAP requires verification that both TCP and UDP connectivity are fully redundant and operational. The output confirms no paths are down, which validates resilience.

NEW QUESTION # 67
Which switch vendor is supported for the cluster network switches?

- A. Cisco
- B. Hewlett-Packard
- C. Brocade
- D. Juniper Networks

Answer: A

Explanation:
ONTAP cluster networks support specific switch vendors validated by NetApp.Ciscois a supported and commonly used vendor for ONTAP cluster interconnect switches.
Other vendors listed are not supported for ONTAP cluster networks.

NEW QUESTION # 68

......

As we all know, in the highly competitive world, we have no choice but improve our software power, such as international NS0-185 certification, working experience, educational background and so forth. Therefore, it is of great significance to have a NS0-185 certificate in hand to highlight your resume, thus helping you achieve success in your workplace. So with our NS0-185 Preparation materials, you are able to pass the exam more easily in the most efficient and productive way and learn how to study with dedication and enthusiasm. There are many advantages of our NS0-185 guide torrent.

NS0-185 Latest Demo: https://www.pdfbraindumps.com/NS0-185_valid-braindumps.html

Network Appliance Exam NS0-185 Cram Review However, one thing must be fully realized is that it is not always easy to get a certificate, The broad knowledge provided to you by our NS0-185 Latest Demo - NetApp Storage Installation Engineer, ONTAP Professional Exam questions and answers not only enhances your skill and ability but also helps you to succeed in the NS0-185 Latest Demo exam in your very first attempt, Also you can ask us any questions about Network Appliance NS0-185 certification training any time as you like.

Is it worthwhile to take measures to prevent NS0-185 Detailed Answers the potential problem, or should you just live with the risk, Novel Roles for Processors in Hardware Replacement, However, one NS0-185 thing must be fully realized is that it is not always easy to get a certificate.

Real Network Appliance NS0-185 Questions - Your Key to Success

The broad knowledge provided to you by our NetApp Storage Installation Engineer, ONTAP Professional Exam questions and NS0-185 Latest Demo answers not only enhances your skill and ability but also helps you to succeed in the NCSIE ONTAP exam in your very first attempt.

Also you can ask us any questions about Network Appliance NS0-185 certification training any time as you like, As long as you choose our NS0-185 exam materials, you never have to worry about this problem.

You can have a look of our NS0-185 exam questions for realistic testing problems in them.
