CompTIA Tech+ Certification Exam Sample Questions (Q71-Q76):

NEW QUESTION # 71

Which of the following encryption types protects data at rest?

- A. VPN
- B. Plaintext
- C. HTTPS
- D. File-level

Answer: D

Explanation:

Data at rest refers to information stored on a device or disk, such as a hard drive. The encryption that protects it is typically file-level encryption (or full-disk encryption).

"File-level encryption applies encryption to individual files or directories on storage media and is used to protect data at rest." -

CompTIA ITF+ Study Guide VPN and HTTPS protect data in transit.

Plaintext means data is unencrypted, and therefore is not protective.

Therefore, A is the correct answer.

NEW QUESTION # 72

A user wants to connect to a home's Wi-Fi from the basement but is unable to do so. Which of the following is a potential cause of the issue?

- A. Permission
- B. Interference
- C. Speed
- D. Synchronization

Answer: B

Explanation:

Interference from walls, floors, or other electronic devices can weaken Wi-Fi signals, making it difficult to connect from locations like a basement.

Other options:

*Speed affects data transfer rate but not connection availability,

*Synchronization relates to timing, not connection,

*Permission would prevent connection if access credentials were incorrect, but the scenario implies a signal issue.

NEW QUESTION # 73

A user is unable to load the most recent version of a web page. The old page loads each time the screen is refreshed. Which of the following would the user most likely do to resolve the issue?

- A. Clear the cache.
- B. Disable browser extensions.
- C. Enable the pop-up blocker.
- D. Synchronize the profile.

Answer: A

Explanation:

Browsers store previously loaded pages in their cache to improve performance. If outdated content is cached, clearing the cache forces the browser to load the latest version from the server.

"Clearing the browser cache removes stored versions of web pages and resolves display issues caused by outdated content." - CompTIA ITF+ Correct answer: C

NEW QUESTION # 74

Which of the following is an example of PII? (Choose two.)

- **A. Date of birth**
- B. School attended
- C. Employment status
- **D. Full name**
- E. Social media username
- F. City of residence

Answer: A,D

Explanation:

Full name and date of birth are classic examples of Personally Identifiable Information (PII) because they can be used to uniquely identify an individual.

The other options are less specific and not uniquely identifying on their own.

NEW QUESTION # 75

A user needs to securely access a remote network from home. Which of the following should the user utilize for secure remote access?

- A. FTP
- B. LAN
- C. DNS
- **D. VPN**

Answer: D

Explanation:

A VPN (Virtual Private Network) allows users to securely connect to a remote network over the internet by encrypting the connection.

Other options:

*LAN is a local network,

*FTP transfers files but is not secure by default,

*DNS resolves domain names and doesn't provide secure access.
