

Fantastic ANS-C01 Sample Test Online by Test4Engine

The screenshot displays the Test4Engine ANS-C01 sample test interface. It features a sidebar on the left with sections for Pages, Columns, Rows, Filters, and Marks. The Columns section is set to 'Assortment' and 'YEAR(Week ID)'. The Rows section is set to 'Item Number ID'. The Marks section includes a dropdown menu set to 'Automatic' and buttons for Color, Size, Text, Detail, and Tooltip. A green button labeled 'SUM(Sales (\$))' is also visible. The main area shows 'Sheet 1' with a table of data. The table has columns for Item Number, Electronics (2017, 2018), Hardware (2017, 2018), and Phones (2017, 2018). The data rows are numbered from 000 to 358. A watermark 'test4engine.com' is visible across the table.

Item Numb..	Electronics		Hardware		Phones	
	2017	2018	2017	2018	2017	2018
000	71,674	54,234				
011					79,617	71,609
027			106,973	76,484		
050	100,327	72,274				
108					86,087	60,200
110			69,435	50,785		
140	102,081	79,018				
148					39,502	30,629
160			69,771	51,396		
199	102,789	89,136				
205					171,935	147,770
211			116,330	102,571		
253	66,099	48,029				
285					47,558	36,390
307			77,514	61,099		
308	41,532	52,460				
311					39,591	40,371
312			31,809	23,571		
332	31,632	33,056				
358					18,807	22,896

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the test ANS-C01 Certification can make them become that kind of people and if you are one of them buying our ANS-C01 study materials will help you pass the ANS-C01 test smoothly with few efforts needed.

To be eligible for the ANS-C01 Exam, candidates should have at least five years of experience in network engineering or a related field, as well as a strong understanding of basic networking concepts. They should also have hands-on experience with AWS networking services, such as Amazon Virtual Private Cloud (VPC) and Amazon Route 53.

Earning the AWS Certified Advanced Networking Specialty certification can help IT professionals advance their careers by demonstrating their expertise in designing and implementing complex networking solutions in AWS. AWS Certified Advanced Networking Specialty Exam certification also demonstrates a commitment to continuing education and staying up-to-date with the latest technologies and industry trends.

ANS-C01 Sample Test Online Reliable Questions Pool Only at Test4Engine

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, ANS-C01 study materials have been designed to serve most of the office workers who aim at getting an exam certification. With the popularization of wireless network, those who are about to take part in the ANS-C01 exam guide to use APP on the mobile devices as their learning tool, because as long as entering into an online environment, they can instantly open the learning material from their appliances. Our ANS-C01 Study Materials provide such version for you. The online test engine is a kind of online learning, you can enjoy the advantages of APP version of our ANS-C01 exam guide freely. Moreover, you actually only need to download the APP online for the first time and then you can have free access to our ANS-C01 exam questions in the offline condition if you don't clear cache.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q75-Q80):

NEW QUESTION # 75

A global company runs business applications in the us-east-1 Region inside a VPC. One of the company's regional offices in London uses a virtual private gateway for an AWS Site-to-Site VPN connection to the VPC. The company has configured a transit gateway and has set up peering between the VPC and other VPCs that various departments in the company use. Employees at the London office are experiencing latency issues when they connect to the business applications. What should a network engineer do to reduce this latency?

- **A. Create a new Site-to-Site VPN connection. Set the transit gateway as the target gateway. Enable acceleration on the new Site-to-Site VPN connection. Update the VPN device in the London office with the new connection details.**
- B. Create a new AWS Global Accelerator standard accelerator that has an endpoint of the Site-to-Site VPN connection. Update the VPN device in the London office with the new connection details.
- C. Create a new transit gateway in the eu-west-2 (London) Region. Peer the new transit gateway with the existing transit gateway. Modify the existing Site-to-Site VPN connection by setting the new transit gateway as the target gateway.
- D. Modify the existing Site-to-Site VPN connection by setting the transit gateway as the target gateway. Enable acceleration on the existing Site-to-Site VPN connection.

Answer: A

Explanation:

<https://docs.aws.amazon.com/vpn/latest/s2svpn/accelerated-vpn.html>

NEW QUESTION # 76

You have two physical routers (R1 and R2) that connect to AWS Direct Connect and support BGP routing. R1 should handle all traffic under normal circumstances. In the event of a failure, BGP should automatically redirect all traffic over R2. Assume that R1 and R2 cannot communicate with each other. How can you configure this?

(Choose two.)

Response:

- A. Use a lower BGP MED on R2 to tell the VGW the preferred path into the AS
- B. Configure R1 to prepend additional AS numbers when advertising routes
- C. Configure R2 with a higher local preference versus R1
- D. Configure R1 with a higher local preference versus R2
- **E. Use a lower BGP MED on R1 to tell the VGW the preferred path into the AS**
- **F. Configure R2 to prepend additional AS numbers when advertising routes**

Answer: E,F

NEW QUESTION # 77

A company uses Amazon Route 53 for its DNS needs. The company's security team wants to update the DNS infrastructure to provide the most recent security posture.

The security team has configured DNS Security Extensions (DNSSEC) for the domain. The security team wants a network engineer to explain who is responsible for the rotation of DNSSEC keys.

Which explanation should the network administrator provide to the security team?

- **A. AWS rotates the zone-signing key (ZSK). The company rotates the key-signing key (KSK).**
- B. The company rotates the AWS Key Management Service (AWS KMS) key. AWS rotates the key-signing key (KSK).
- C. The company rotates the zone-signing key (ZSK) and the key-signing key (KSK).
- D. AWS rotates the AWS Key Management Service (AWS KMS) key and the key-signing key (KSK).

Answer: A

NEW QUESTION # 78

Your website utilizes EC2, S3, ELB-Classical, and CloudFront. Your manager has shifted focus to security and wants you to ensure the site is as secure as possible. What two items could you recommend?

(Choose two.)

Note: Answers to this question are not verified by our experts, please study yourself and select the appropriate answers.

Contribute: Please send the correct answers with reference text/link on feedback@VMexam.com to get up to 50% cashback.

Response:

- A. A WAF on your CloudFront distribution.
- B. A restricted bucket policy.
- **C. An NACL that blocks all ports to your subnets.**
- D. A WAF on the load balancer.

Answer: C

NEW QUESTION # 79

A customer has set up multiple VPCs for Dev, Test, Prod, and Management. You need to set up AWS Direct Connect to enable data flow from on-premises to each VPC. The customer has monitoring software running in the Management VPC that collects metrics from the instances in all the other VPCs. Due to budget requirements, data transfer charges should be kept at minimum. Which design should be recommended?

- A. Create a total of four private VIFs, one for each VPC owned by the customer, and route traffic between VPCs using the Direct Connect link.
- B. Create a private VIF to the Management VPC, and peer this VPC to all other VPCs, enable source /destination NAT in the Management VPC.
- C. Create a private VIF to the Management VPC, and peer this VPC to all other VPCs.
- **D. Create a total of four private VIFs, and enable VPC peering between all VPCs.**

Answer: D

Explanation:

- creating VPC peering is free of charge - traffic costs ~0.01€/GB for VPC peering (IN + OUT) and ~0.02€/GB for direct connect (OUT only). As the communication involved in monitoring will never have IN = OUT, then $0.01 * (IN + OUT)$ will always be lower than $0.02 * OUT$, ergo VPC peering will be cheaper

NEW QUESTION # 80

.....

After you purchase our ANS-C01 exam guide is you can download the test bank you have bought immediately. You only need 20-30 hours to learn and prepare for the ANS-C01 exam, because it is enough for you to grasp all content of our ANS-C01 study materials, and the passing rate of our ANS-C01 Exam Questions is very high and about 98%-100%. Our latest ANS-C01 quiz torrent provides 3 versions and you can choose the most suitable one for you to learn. All in all, there are many merits of our ANS-C01 quiz prep.
