With our IAM IAM-Certificate practice questions, you can get the most out of your studying and maximize your chances of passing your IAM IAM-Certificate Exam. PracticeVCE IAM IAM-Certificate practice test software is the answer if you want to score higher in the IAM IAM-Certificate exam and achieve your academic goals.

## IAM The Institute of Asset Management Certificate Sample Questions (Q21-Q26):

### NEW QUESTION # 21

What are the main cost elements of a whole-life cost approach?

- A. Installation, maintenance and operations, and disposal costs
- B. Installation, failure and refurbishment costs
- C. Maintenance, associated financing costs, refurbishment, and disposal costs
- D. Asset deterioration and reliability costs

**Answer: A**

Explanation:

Whole-life cost elements include costs incurred from the point of asset creation to its final disposal. This covers:

- \* Installation
- \* Operations & Maintenance
- \* Disposal or decommissioning

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 4.5.1:

"Key cost elements include initial acquisition, installation, maintenance, operation, and final disposal costs."

### NEW QUESTION # 22

The term optimizing describes.

- A. The process of control the best value compromise between a set of competing factors, in order to support asset management decision-making
- B. The process of establishing the best value compromise between a set of competing factors, in order to support asset management decision-making
- C. The process of review the best value compromise between a set of competing factors, in order to support asset management decision-making
- D. The process of Maintenance the best value compromise between a set of competing factors, in order to support asset management decision-making

**Answer: B**

### NEW QUESTION # 23

The concept of 'line of sight' means .....

- A. Stakeholders involved in asset management
- B. Asset Manager involved in asset management
- C. Top Management involved in asset management
- D. Everyone who touches or influences what happens to an asset is involved in asset management

**Answer: D**

Explanation:

'Line of sight' is a key concept in IAM, referring to how all actions-regardless of position or role-are visibly and logically aligned to the organization's asset management objectives.

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 1.5 - Line of Sight:

"Line of sight is achieved when everyone in the organization understands how their activities contribute to delivering value from assets."

### NEW QUESTION # 24

Which of the following typically describes an organization's spending plans for new assets?

- A. Operational Expenditure (Opex) forecast
- B. Insurance valuation
- C. Procurement contract
- D. Asset valuation
- E. Capital Expenditure (Capex) forecast

**Answer: E**

Explanation:

The correct answer is D . Spending plans for new assets are typically described through a Capital Expenditure (Capex) forecast , because new asset acquisition, creation, or major enhancement is capital investment rather than routine operating spend. IAM-aligned guidance places long-term renewal, enhancement, and investment planning within strategic planning and the SAMP context, which is where future capital needs are developed and translated into investment plans.

The other options do not fit as well. Opex relates to day-to-day operating costs, insurance valuation and asset valuation are valuation concepts rather than spending plans, and a procurement contract is a delivery instrument, not the overall spending forecast.

### NEW QUESTION # 25

Which of the following types of information would NOT normally be required for the development of an asset management plan?

- A. Asset Condition
- B. Asset Critically
- C. Asset Register
- D. Organisation's share price

**Answer: D**

### NEW QUESTION # 26

.....
