

# Practice ECCouncil 312-85 Tests - 312-85 Pdf Torrent

2026 Latest PassLeaderVCE 312-85 PDF Dumps and 312-85 Exam Engine Free Share: [https://drive.google.com/open?id=1K\\_C9uGuKam31N9zNeMD7vrzhMANnNohH](https://drive.google.com/open?id=1K_C9uGuKam31N9zNeMD7vrzhMANnNohH)

Why you should trust PassLeaderVCE? By trusting PassLeaderVCE, you are reducing your chances of failure. In fact, we guarantee that you will pass the 312-85 certification exam on your very first try. If we fail to deliver this promise, we will give your money back! This promise has been enjoyed by over 90,000 takes whose trusted PassLeaderVCE. Aside from providing you with the most reliable dumps for 312-85, we also offer our friendly customer support staff. They will be with you every step of the way.

The Certified Threat Intelligence Analyst certification is ideal for professionals who work in the field of cybersecurity, such as security analysts, threat hunters, and incident responders. It is also suitable for individuals who are interested in pursuing a career in threat intelligence. Certified Threat Intelligence Analyst certification demonstrates a candidate's commitment to staying up-to-date with the latest trends and developments in the field of cybersecurity.

## Get Updated Practice 312-85 Tests and Pass Exam in First Attempt

Our 312-85 study guide has PDF, Software/PC, and App/Online three modes. You can use scattered time to learn whether you are at home, in the company, or on the road. At the same time, the contents of 312-85 learning test are carefully compiled by the experts according to the content of the examination syllabus of the calendar year. With our 312-85 Study Materials, you only need to spend 20 to 30 hours to practice before you take the 312-85 test, and have a high pass rate of 98% to 100%.

## ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Which of the following types of threat attribution deals with the identification of the specific person, society, or a country sponsoring a well-planned and executed intrusion or attack over its target?

- A. Campaign attribution
- B. Intrusion-set attribution
- C. Nation-state attribution
- D. True attribution

**Answer: D**

Explanation:

True attribution in the context of cyber threats involves identifying the actual individual, group, or nation-state behind an attack or intrusion. This type of attribution goes beyond associating an attack with certain tactics, techniques, and procedures (TTPs) or a

known group and aims to pinpoint the real-world entity responsible. True attribution is challenging due to the anonymity of the internet and the use of obfuscation techniques by attackers, but it is crucial for understanding the motive behind an attack and for forming appropriate responses at diplomatic, law enforcement, or cybersecurity levels.

#### NEW QUESTION # 19

Kim, an analyst, is looking for an intelligence-sharing platform to gather and share threat information from a variety of sources. He wants to use this information to develop security policies to enhance the overall security posture of his organization.

Which of the following sharing platforms should be used by Kim?

- A. Cuckoo sandbox
- B. PortDroid network analysis
- C. Blueliv threat exchange network
- D. OmniPeek

**Answer: C**

#### NEW QUESTION # 20

In which of the following forms of bulk data collection are large amounts of data first collected from multiple sources in multiple formats and then processed to achieve threat intelligence?

- A. Hybrid form
- B. Production form
- C. Unstructured form
- D. Structured form

**Answer: C**

Explanation:

In the context of bulk data collection for threat intelligence, data is often initially collected in an unstructured form from multiple sources and in various formats. This unstructured data includes information from blogs, news articles, threat reports, social media, and other sources that do not follow a specific structure or format.

The subsequent processing of this data involves organizing, structuring, and analyzing it to extract actionable threat intelligence. This phase is crucial for turning vast amounts of disparate data into coherent, useful insights for cybersecurity purposes.

#### NEW QUESTION # 21

Alison, an analyst in an XYZ organization, wants to retrieve information about a company's website from the time of its inception as well as the removed information from the target website.

What should Alison do to get the information he needs.

- A. Alison should use SmartWhois to extract the required website information.
- B. Alison should recover cached pages of the website from the Google search engine cache to extract the required website information.
- C. Alison should run the Web Data Extractor tool to extract the required website information.
- D. Alison should use <https://archive.org> to extract the required website information.

**Answer: D**

Explanation:

To retrieve historical information about a company's website, including content that may have been removed or altered, Alison should use the Internet Archive's Wayback Machine, accessible at <https://archive.org>. The Wayback Machine is a digital archive of the World Wide Web and other information on the Internet, providing free access to snapshots of websites at various points in time. This tool is invaluable for researchers and analysts looking to understand the evolution of a website or recover lost

information.References:

### NEW QUESTION # 22

An organization suffered many major attacks and lost critical information, such as employee records, and financial information. Therefore, the management decides to hire a threat analyst to extract the strategic threat intelligence that provides high-level information regarding current cyber-security posture, threats, details on the financial impact of various cyber-activities, and so on. Which of the following sources will help the analyst to collect the required intelligence?

- A. Human, social media, chat rooms
- **B. OSINT, CTI vendors, ISAO/ISACs**
- C. Active campaigns, attacks on other organizations, data feeds from external third parties
- D. Campaign reports, malware, incident reports, attack group reports, human intelligence

**Answer: B**

Explanation:

For gathering strategic threat intelligence that provides a high-level overview of the current cybersecurity posture, potential financial impacts of cyber activities, and overarching threats, sources such as Open Source Intelligence (OSINT), Cyber Threat Intelligence (CTI) vendors, and Information Sharing and Analysis Organizations (ISAOs)/Information Sharing and Analysis Centers (ISACs) are invaluable. OSINT involves collecting data from publicly available sources, CTI vendors specialize in providing detailed threat intelligence services, and ISAOs/ISACs facilitate the sharing of threat data within specific industries or communities. These sources can provide broad insights into threat landscapes, helping organizations understand how to align their cybersecurity strategies with current trends and threats.References:

### NEW QUESTION # 23

.....

Studies show that some new members of the workforce are looking for more opportunity to get promoted but get stuck in an awkward situation, because they have to make use of their fragment time and energy to concentrate on 312-85 exam preparation. Our 312-85 exam materials embrace much knowledge and provide relevant exam bank available for your reference, which matches your learning habits and produces a rich harvest of the exam knowledge. You can not only benefit from our 312-85 Exam Questions, but also you can obtain the 312-85 certification.
