SAP Certified Associate - Validating Business Transformation Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which tool is used for business process analysis in the RISE toolchain?

- A. SAP Signavio
- B. SAP Enable Now
- C. SAP LeanIX
- D. SAP Business Technology Platform

Answer: A

Explanation:

SAP Signavio is SAP's dedicated suite for business process analysis and optimization. Within the RISE with SAP toolchain, Signavio enables organizations to evaluate existing processes, identify performance gaps, benchmark operations, and design optimized target processes. It is used heavily during the Discover and Prepare phases to guide fit-to-standard workshops. The other tools support architecture, extensions, and training but do not serve as the main process analysis engine.

NEW QUESTION # 21

SAP LeanIX Fact Sheets can represent which of the following?

- A. RACI Matrices
- B. Survey Forms
- C. Audit Logs
- D. Application, interfaces, and capabilities

Answer: D

NEW QUESTION # 22

What transformation method does SAP Signavio use to offer fast insights with minimal setup?

- A. Clone and Execute
- B. Plug and Gain
- C. Lift and Shift
- D. Extend and Merge

Answer: B

Explanation:

SAP Signavio's Plug and Gain approach is designed to provide organizations with rapid process insights without requiring extensive configuration or long deployment cycles. The method allows companies to connect their SAP systems to Signavio in a streamlined manner so the platform can immediately begin analyzing transactional data, identifying performance gaps, and revealing improvement opportunities. This makes it particularly valuable during early stages of transformation, when leadership needs fast visibility into system performance and process inefficiencies.

Plug and Gain eliminates the need for heavy upfront modeling or manual data migration. Instead, it leverages automated data integration and prebuilt best-practice process models to start generating insights almost immediately. As a result, companies can accelerate their discovery phase, understand current process behavior, and prepare for fit-to-standard workshops much more efficiently.

Options A, C, and D refer to general transformation concepts that are not tied to SAP Signavio's methodology. Plug and Gain is the only method specifically developed for Signavio to offer quick, meaningful insights with minimal effort. It supports transformation readiness by helping teams identify high-priority areas early and align their process improvement initiatives with quantifiable data.

NEW QUESTION # 23

What analysis does SAP Signavio support to compare company performance with peers?

- A. SWOT Analysis
- B. Regression Modeling
- C. Performance Benchmarking
- D. Value Discovery

Answer: C

NEW QUESTION # 24

What tool is used for test automation within SAP Cloud ALM projects?

- A. Tricentis
- B. SAP Business Data Cloud
- C. SAP Walk Me
- D. SAP Enable Now

Answer: A

NEW QUESTION # 25

.....
