We know deeply that a reliable Professional-Cloud-Developer exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. Compared with the other products in the market, our Professional-Cloud-Developer latest questions grasp of the core knowledge and key point of the real exam, the targeted and efficient Google Certified Professional - Cloud Developer study training dumps guarantee our candidates to pass the test easily. Our Professional-Cloud-Developer Latest Questions is one of the most wonderful reviewing Google Certified Professional - Cloud Developer study training dumps in our industry, so choose us, and together we will make a brighter future.

## Section 4: Integrating Google Cloud Services

The aim of this domain is to evaluate the learners based on their capacity to integrate an app with storage & data services, integrate an app with compute services, as well as integrate Cloud APIs with apps.

Google Professional-Cloud-Developer Certification Exam is designed to test and validate the skills and knowledge of developers who work with Google Cloud Platform (GCP). It is an industry-recognized certification that demonstrates a developer's ability to design, build, test, and deploy applications on GCP using best practices and industry standards. Professional-Cloud-Developer Exam covers a wide range of topics including GCP infrastructure, data storage, application development, deployment, and monitoring.

## Google Professional-Cloud-Developer Unparalleled Valid Exam Duration Pass Guaranteed

Our Professional-Cloud-Developer study guide can energize exam candidate as long as you are determined to win. During your preparation period, all scientific and clear content can help you control all Professional-Cloud-Developer exam questions appearing in the real exam, and we never confirm to stereotype being used many years ago but try to be innovative at all aspects. As long as you click into the link of our Professional-Cloud-Developer Learning Engine, you will find that our Professional-Cloud-Developer practice quiz are convenient and perfect!

## Google Certified Professional - Cloud Developer Sample Questions (Q136-Q141):

### NEW QUESTION # 136

You are running a containerized application on Google Kubernetes Engine. Your container images are stored in Container Registry. Your team uses CI/CD practices. You need to prevent the deployment of containers with known critical vulnerabilities. What should you do?

- A. - Use Web Security Scanner to automatically crawl your application
  - Review your application logs for scan results, and provide an attestation that the container is free of known critical vulnerabilities
  - Use Binary Authorization to implement a policy that forces the attestation to be provided before the container is deployed
- B. - Use Web Security Scanner to automatically crawl your application
  - Review the scan results in the scan details page in the Cloud Console, and provide an attestation that the container is free of known critical vulnerabilities
  - Use Binary Authorization to implement a policy that forces the attestation to be provided before the container is deployed
- C. - Enable the Container Scanning API to perform vulnerability scanning
  - Review vulnerability reporting in Container Registry in the Cloud Console, and provide an attestation that the container is free of known critical vulnerabilities
  - Use Binary Authorization to implement a policy that forces the attestation to be provided before the container is deployed
- D. - Enable the Container Scanning API to perform vulnerability scanning
  - Programmatically review vulnerability reporting through the Container Scanning API, and provide an attestation that the container is free of known critical vulnerabilities
  - Use Binary Authorization to implement a policy that forces the attestation to be provided before the container is deployed

**Answer: D**

Explanation:

<https://cloud.google.com/binary-authorization/docs/creating-attestations-kritis>

### NEW QUESTION # 137

Please refer to the following information to answer the questions on the right.

Lucille has issues with her Apple device and takes it to an Apple Service Provider where Baron, a technician, assists her. Without much knowledge about the technical aspects of her device, Lucille vaguely describes the issues to Baron.

Which of the following skills would help Baron verify that he understood the issue that Lucille described?

- A. Reflecting
- B. Listening
- C. Imitating
- D. Evaluating

**Answer: A**

### NEW QUESTION # 138

Your team manages a Google Kubernetes Engine (GKE) cluster where an application is running.

A different team is planning to integrate with this application. Before they start the integration, you need to ensure that the other team cannot make changes to your application, but they can deploy the integration on GKE. What should you do?

- A. Using Identity and Access Management (IAM), grant the Viewer IAM role on the cluster project to the other team.
- B. Create a new namespace in the existing cluster. Using Identity and Access Management (IAM), grant the Editor role on the cluster project to the other team.
- C. Create a new namespace in the existing cluster. Using Kubernetes role-based access control (RBAC), grant the Admin role on the new namespace to the other team.
- D. Create a new GKE cluster. Using Identity and Access Management (IAM), grant the Editor role on the cluster project to the other team.

**Answer: C**

Explanation:

You define permissions within a Role or ClusterRole object. A Role defines access to resources within a single Namespace, while a ClusterRole defines access to resources in the entire cluster.

<https://cloud.google.com/kubernetes-engine/docs/how-to/role-based-access-control>

### NEW QUESTION # 139

You are working on a social media application. You plan to add a feature that allows users to upload images.

These images will be 2 MB - 1 GB in size. You want to minimize their infrastructure operations overhead for this feature. What should you do?

- A. Change the application to accept images directly and store them in the database that stores other user information.
- **B. Change the application to create signed URLs for Cloud Storage. Transfer these signed URLs to the client application to upload images to Cloud Storage.**
- C. Create a separate bucket for each user in Cloud Storage. Assign a separate service account to allow write access on each bucket. Transfer service account credentials to the client application based on user information. The application uses this service account to upload images to Cloud Storage.
- D. Set up a web server on GCP to accept user images and create a file store to keep uploaded files. Change the application to retrieve images from the file store.

**Answer: B**

Explanation:

Reference:

### NEW QUESTION # 140

Your company's product team has a new requirement based on customer demand to autoscale your stateless and distributed service running in a Google Kubernetes Engine (GKE) cluster. You want to find a solution that minimizes changes because this feature will go live in two weeks. What should you do?

- **A. Deploy a Horizontal Pod Autoscaler, and scale based on the CPU load.**
- B. Deploy a Vertical Pod Autoscaler, and scale based on a custom metric.
- C. Deploy a Vertical Pod Autoscaler, and scale based on the CPU load.
- D. Deploy a Horizontal Pod Autoscaler, and scale based on a custom metric.

**Answer: A**

### NEW QUESTION # 141

.....

Professional-Cloud-Developer test dumps are aiming at helping you to pass the exam in the shortest time and with the least amount of effort. As the saying goes, an inch of gold is an inch of time. Whether you are an office worker or a student or even a housewife, time is your most important resource. With Professional-Cloud-Developer study materials, you may only need to spend half of your time that you will need if you don't use our Professional-Cloud-Developer test answers on successfully passing a professional qualification exam. In this way, you will have more time to travel, go to parties and even prepare for another exam. The benefits of Professional-Cloud-Developer Study Materials for you are far from being measured by money. Professional-Cloud-Developer test answers have a first-rate team of experts, advanced learning concepts and a complete learning model. The time saved for you is the greatest return to us.
