### Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q145-Q150):

#### NEW QUESTION # 145

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses Lean processes. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

- \* Create a purchase agreement for the subcontracting vendor that contains the pricing information for SP-01.
- \* Create a vendor resource and a work cell for outsourced painting, then add the resource to the work cell.
- \* Create a production flow process activity using the painting work cell and the service item as the picking activity.
- \* Create a service term on the activity to tie the purchase agreement to the activity.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

Explanation:

The solution meets the goal. Here is the explanation:

To create a subcontracting activity for the painting service, you should use the following steps<sup>1</sup>:

Create a purchase agreement for the subcontracting vendor that contains the pricing information for SP-01. This step is correct, because you need to create a purchase agreement that defines the terms and conditions for purchasing the subcontracting service from the vendor<sup>1</sup>. You also need to add a purchase agreement line for SP-01 and specify the quantity and price of the service.

Create a vendor resource and a work cell for outsourced painting, then add the resource to the work cell. This step is correct, because you need to create a resource that is assigned to the vendor account and add it to a resource group that represents the subcontracting work cell<sup>1</sup>. This way, you can assign the subcontracting activity to the vendor resource.

Create a production flow process activity using the painting work cell and the service item as the picking activity. This step is correct, because you need to create a process activity that represents the subcontracting service in the production flow<sup>1</sup>. You also need to specify the painting work cell as the resource group and SP-01 as the product of the process activity. You also need to select the Generate license plate option on the mobile device menu item that is used for reporting as finished<sup>1</sup>.

Create a service term on the activity to tie the purchase agreement to the activity. This step is correct, because you need to create a service term that links the purchase agreement line to the production flow process activity<sup>1</sup>. A service term defines how a service item is consumed in production and how it is invoiced by the vendor.

<sup>1</sup>: Activity-based subcontracting

#### NEW QUESTION # 146

You are the product design manager for a computer manufacturer.

Your new laptop model is configurable. There are restrictions on which hardware components can be selected depending on the model. You create configuration groups for hardware and software.

You need to create a new laptop item number and configurations.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
<ul style="list-style-type: none"> <li>⋮ Create a product master with dimension-based configuration technology.</li> <li>⋮ Assign a product dimension group with an active configuration dimension.</li> <li>⋮ Create a bill of materials version and create a configuration route.</li> <li>⋮ Create the configuration variants automatically by using the Maintain configurations form.</li> </ul>	

**Answer:**

**Explanation:**

**NEW QUESTION # 147**

A company that assembles packaging material uses Dynamics 365 Supply Chain Management. The glue that is used in assembly has run out of stock and will not be back in stock as expected. Another adhesive must be substituted for the glue. This will affect orders in planning as well as production orders that have started. You need to ensure that the substitute adhesive is used in production until the glue is back in stock. Which configuration should you use for each requirement? To answer, select the appropriate options in the answer area.

**NOTE:** Each correct selection is worth one point.

Requirement	Configuration
Include the adhesive in planning.	<ul style="list-style-type: none"> <li>Alternative item</li> <li>Alternative item</li> <li>Plan group and priority</li> <li>Validity dates on BOM lines</li> </ul>
Update production orders with the adhesive.	<ul style="list-style-type: none"> <li>Production picking list</li> <li>Where used</li> <li>Production picking list</li> <li>Validity dates on BOM lines</li> </ul>

**Answer:**
