Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 2	<ul style="list-style-type: none">• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 3	<ul style="list-style-type: none">• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.

Topic 4	<ul style="list-style-type: none"> • Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 5	<ul style="list-style-type: none"> • Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 6	<ul style="list-style-type: none"> • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 7	<ul style="list-style-type: none"> • Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 8	<ul style="list-style-type: none"> • Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 9	<ul style="list-style-type: none"> • Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 10	<ul style="list-style-type: none"> • Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 11	<ul style="list-style-type: none"> • Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 12	<ul style="list-style-type: none"> • Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 13	<ul style="list-style-type: none"> • Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.

DEP-2025 Valid Braindumps Ebook & DEP-2025 Trustworthy Pdf

Perhaps you have no choice and live unhappily now because you cannot change your current situation. Our DEP-2025 exam materials will remove your from the bad condition. Life needs to be colorful and meaningful. We must realize our own values and make progress. Do not worry. Our DEP-2025 Study Guide will help you regain confidence. we can claim that with our DEP-2025 practice engine for 20 to 30 hours, you will be quite confident to pass the exam.

Apple Deployment and Management Exam Sample Questions (Q213-Q218):

NEW QUESTION # 213

Which MDM option gives you the ability to keep the same eSIM service for an iPhone that you redeploy?

- A. Redeploy with eSIM
- B. Remote wipe

- C. Managed erase
- D. Rapid deployment

Answer: B

Explanation:

Remote wipe preserves eSIM. The Mobile Device Management Protocol Reference states, "The EraseDevice command with the preserveDataPlan option allows MDM to keep the eSIM active during a wipe, aiding redeployment." References:

Mobile Device Management Protocol Reference, "EraseDevice Command" section.

iOS Deployment Reference, "eSIM Management" section.

NEW QUESTION # 214

You used Apple Business Manager to assign enrolled iPhone and iPad devices to a new MDM solution. What must you do to enroll the devices in the new MDM solution using Automated Device Enrollment?

- A. Send a remote-wipe command from Apple Business Manager.
- **B. Erase the devices.**
- C. Revoke the devices.
- D. Release the devices in Apple Business Manager.

Answer: B

Explanation:

Erasing triggers ADE. The Apple Business Manager User Guide states, "To enroll devices in a new MDM solution via ADE after reassignment, erase the devices to restart Setup Assistant and connect to the new server." Reference:

Apple Business Manager User Guide, "Reassign Devices" section.

Apple Platform Deployment Guide, "ADE Re-enrollment" section.

NEW QUESTION # 215

What enables MDM solutions to securely configure Apple devices by sending profiles and commands to a device?

- A. Platform Single Sign-on
- B. Network relay
- C. Federated authentication
- **D. Apple's MDM framework**

Answer: D

Explanation:

Apple's MDM framework is the backbone of enterprise device management. It allows MDM solutions to send configuration profiles, security commands, and restrictions to managed devices securely via the Apple Push Notification service (APNs). Apple documentation highlights that the framework is integrated into all Apple platforms, making it the official channel for managing device settings, distributing apps, and enforcing compliance. Other technologies like federated authentication or Platform SSO assist with identity but do not perform configuration tasks. Therefore, the MDM framework is the required technology that makes centralized configuration and command execution possible for iPhone, iPad, and Mac devices.

References: Apple Platform Deployment - "How mobile device management works."

NEW QUESTION # 216

Why could newly bought apps stop appearing in MDM?

- A. The APNs token expired.
- B. The MDM server token expired.
- C. The Managed Apple Account that downloaded the content token created a new location.
- **D. The content token expired.**

Answer: D

Explanation:

Apple uses content tokens (also referred to as server tokens) to link Apple Business Manager (ABM) with MDM solutions for license distribution. Apple Learning explains that these tokens are time-bound and eventually expire, requiring administrators to renew them from ABM and upload the updated token to the MDM. When the token expires, synchronization between ABM and the MDM breaks, causing newly purchased apps and books to stop appearing in the MDM console. The APNs token, while also expiring annually, only affects push notifications, not app license syncing. The creation of new locations or password changes do not invalidate purchased app syncs unless tied directly to the token. The most common and documented reason for this issue is an expired content/server token, which must be refreshed.

References: Apple Business Manager User Guide - "Renew server tokens for app distribution."

NEW QUESTION # 217

Which feature allows IT administrators to remotely wipe a device?

- A. Find My
- B. Activation Lock
- C. iCloud
- **D. MDM**

Answer: D

Explanation:

Mobile Device Management (MDM) provides IT administrators with the capability to remotely wipe a device, either fully (factory reset) or selectively (removing managed data), via commands sent over APNs. This is a core MDM feature for security and compliance. Activation Lock (option A) prevents unauthorized reactivation after a wipe but doesn't perform the wipe. Find My (option B) allows users to wipe their own devices, not administrators. iCloud (option C) supports personal wipes via Find My, not organizational ones. The MDM Protocol Reference confirms MDM's remote wipe functionality.

NEW QUESTION # 218

.....

Each of the formats is unique in its own way and helps every Apple certification exam applicant prepare according to his style. All of these formats are user-friendly and very helpful to clear the Apple DEP-2025 Exam exam on the first try. Apple DEP-2025 dumps are packed with multiple benefits that will help you prepare Apple DEP-2025 Exam successfully in a short time. In case of new updates, Apple DEP-2025 dumps will immediately provide you with up to 1 year of free questions updates. These free updates will save your time in case of Apple DEP-2025 Exam real exam changes.
