Real NCP-DB-6.10 Exams | 100% Free Latest Nutanix Certified Professional

- Database Automation (NCP-DB) v6.10 Reliable Dumps

Nutanix NCP-DB-6.10 Practice test is an integral part of Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam preparation. Itcerttest offers desktop-based NCP-DB-6.10 practice exam software and web-based Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) practice test that simulates the real Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam environment. These Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) practice tests are designed to help identify strengths and weaknesses.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q121-Q126):

NEW QUESTION # 121
An administrator needs to patch a PostgreSQL database server VM from version 13.4 to 13.8.
What is the first step within the NDB patching workflow to accomplish this task?

- A. Create a new Database Parameters profile for PostgreSQL server 13.8.
- B. Create a Software Profile Version with PostgreSQL 13.8.
- C. Create a new Software Profile with PostgreSQL 13.8.
- D. Create a maintenance window and add this PostgreSQL server 13.8 to the queue.

Answer: B

Explanation:
NDB supports patching for PostgreSQL database instances. Patching for PostgreSQL is validated on VMs provisioned by NDB (greenfield deployments). To patch PostgreSQL database server VMs, you must create a software profile version by uploading the PostgreSQL update file in NDB. You can then use the PostgreSQL update to patch other database server VMs or provision a new database server VM with the updated software profile. The first step in the NDB patching workflow is to create a software profile version with the desired PostgreSQL version.

NEW QUESTION # 122
An administrator needs to restore a source database from a point in time at 21:50, but the restore option is not available.
What could explain the matter?

- A. Point in time must be within the most recent range.
- B. Selected Restore time is not available.
- C. Change to snapshot option.
- D. Logs to Backup must be run first.

Answer: D

Explanation:
The provided exhibit shows the NDB Time Machine restore interface for October 31, 2024, with a Point-in-Time (PIT) restore option selected at 21:50. However, the restore option is unavailable, as indicated by the question. The exhibit includes a warning: "Logs to Backup: The database may contain additional logs. Backup any remaining logs before restore or they will be lost." This suggests that PIT restore requires continuous log retention, and if logs since the last snapshot (at 01:10:00) are not backed up, the restore to 21:50 cannot proceed. Running the "Logs to Backup" operation ensures all transaction logs are captured, enabling PIT restore by allowing NDB to replay logs to the desired point.

NEW QUESTION # 123
When registering SAP HANA Database and Database Server VM there are several (Linux) OS configuration requirements that must be set before registering a database Or a database server VM. Which system file should the entry, secure_pazh be configured in?

- A. /ezc/sudores

- B. 'etc/ profile

Answer: A

NEW QUESTION # 124
An administrator needs to reset the NDB GUI password.
What should the administrator perform from the SSH session?

- A. 1. Enter the era-server CLl
  2. Execute: security password reset
- B. sudo passwd era
- C. 1. Enter the era CLl
  2. Execute: security password reset
- D. sudo passwd admin

Answer: A

Explanation:
To reset the NDB GUI password in Nutanix Database Service (NDB), an administrator must access the system through an SSH session and use the appropriate command-line interface (CLI) tools provided by NDB. The correct process involves entering the era-server CLI, which is the specific CLI environment for managing NDB-related configurations, including security settings like password resets. Once in the era-server CLI, the administrator executes the security password reset command to initiate the password reset process for the NDB GUI. This method ensures that the reset is performed within the NDB-managed environment securely and aligns with Nutanix's recommended administrative procedures.

NEW QUESTION # 125
For an NDB offline upgrade, which NDB CLI command should be used to upload the upgrade bundle?

- A. path=path_to_upgrade_bundle
- B. path=path_to_upgrade_bundle upgrade bundle
- C. upload upgrade_bundle path=path_to_upgrade_bundle
- D. upgrade upload_bundle path=path_to_upgrade_bundle upload bundle

Answer: C

Explanation:
For an NDB offline upgrade, you need to download the upgrade bundle from the Nutanix Support Portal and copy it to the NDB server. Then, you need to use the NDB CLI command upload upgrade_bundle with the path parameter to specify the location of the upgrade bundle file. This command will upload the upgrade bundle to the NDB server and verify its integrity. After uploading the upgrade bundle, you can use the upgrade command to perform the upgrade.

NEW QUESTION # 126
......

The web-based Nutanix NCP-DB-6.10 practice exam is compatible with all browsers like Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, Opera, and more. Unlike the desktop version, it requires an internet connection. The Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) practice exam will ask real Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam questions. Consistent practice with it relieves exam stress and boosts self-confidence. The web-based Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) practice exam does not require additional software installation. All operating systems also support this Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) practice test.

NCP-DB-6.10 Reliable Dumps: https://www.itcerttest.com/NCP-DB-6.10_braindumps.html

We will soon upload our new version of our NCP-DB-6.10 guide braindumps into our official websites, Nutanix Real NCP-DB-6.10 Exams Most of People who can seize the opportunityin front of them are successful, Nutanix Real NCP-DB-6.10 Exams If you don't pass the exam, money back guarantee, Because these Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 exam dumps are designed by experts after in-depth research about the certification exam content, You can

rest assured that the NCP-DB-6.10 braindumps questions and NCP-DB-6.10 real braindumps are created by our IT teammates who have rich experience in the NCP-DB-6.10 braindumps exam.

Common examples of this pattern include announcements NCP-DB-6.10 of various sorts, Documentation is traditionally one of the places where open source is weak, We will soon upload our new version of our NCP-DB-6.10 Guide braindumps into our official websites.

Unparalleled Nutanix Real NCP-DB-6.10 Exams: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Pass Guaranteed

Most of People who can seize the opportunity in NCP-DB-6.10 Test Score Report front of them are successful, If you don't pass the exam, money back guarantee, Because these Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 exam dumps are designed by experts after in-depth research about the certification exam content.

You can rest assured that the NCP-DB-6.10 braindumps questions and NCP-DB-6.10 real braindumps are created by our IT teammates who have rich experience in the NCP-DB-6.10 braindumps exam.
