For not only that our CPRE-FL\_Syll\_3.0 Study Materials can help you know more knowledge on the subject and our CPRE-FL\_Syll\_3.0 practice engine can help you get your according certification.

### ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q63-Q68):

#### NEW QUESTION # 63

Which sentence best characterises the term "stakeholder"? (1 Point)

- A. Stakeholders are special interest representatives who are responsible for the approval of the first project phase.
- B. A stakeholder is responsible for the administration of the software development environment.
- C. The external actors interacting with a system and the technical interfaces to surrounding systems are designated as stakeholders.
- **D. Stakeholders are persons and organisations affected by the development and the use of the system or of the product.**

**Answer: D**

#### NEW QUESTION # 64

The level of detail of requirements should be higher...

- A. the higher the availability of feedback from stakeholders.
- B. the higher the freedom to be given to developers.
- C. the more familiar the developing team is with the context.
- **D. the higher the benefit of the requirement.**

**Answer: D**

#### NEW QUESTION # 65

All the following are general documentation guidelines, EXCEPT:

- A. Structure work products accordingly (e.g., using standard structures).
- B. Use terms as defined in the glossary.
- **C. Avoid inconsistencies by repeating the same content throughout the document.**
- D. Select a work product type aligned with the intended purpose.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The handbook recommends choosing documentation forms that match purpose-formal specs for contracts, user stories for agile backlogs, etc.-and encourages consistent structure using standard templates or reference models. It also insists on using glossary terms to prevent ambiguity. However, repeating the same content in multiple places is discouraged because redundancy quickly leads to inconsistencies when updates are made. Instead, authors should reference existing sections rather than duplicate them. Therefore B is not a recommended guideline and is the correct "EXCEPT" option.

#### NEW QUESTION # 66

Which attribute is used to indicate that a requirement cannot be implemented without another requirement also being satisfied?

- A. Traceability

- B. Rationale
- **C. Dependency**
- D. Source

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Requirements attributes capture structured information about each requirement. Rationale records why it exists. Source identifies where it came from (stakeholder, document, meeting). Traceability is a broader property, not a single attribute, enabling links to origins and realizations. The dependency attribute explicitly documents relationships between requirements, such as "Req A depends on Req B". It shows where a requirement's implementation requires others (enabler requirements) to be implemented first. Thus, dependency is the attribute used to represent such implementation dependencies.

#### NEW QUESTION # 67

Which of the following is a major source for requirements?

- A. Regulations
- B. Elicitation
- C. Constraints
- **D. Documents**

**Answer: D**

#### NEW QUESTION # 68

.....

Generally speaking, CPRE-FL\_Syll\_3.0 certification has become one of the most authoritative voices speaking to us today. Let us make our life easier by learning to choose the proper CPRE-FL\_Syll\_3.0 study materials, pass the exam, obtain the certification, and be the master of your own life, not its slave. There are so many of them that they make you believe that their product is what you are looking for. With one type of CPRE-FL\_Syll\_3.0 Study Materials are often shown one after another so that you are confused as to which product you should choose.
