Practice To OGBA-101 - Remarkable Practice On your TOGAF Business Architecture Foundation Exam Exam

All the OGBA-101 training files of our company are designed by the experts and professors in the field. The quality of our study materials is guaranteed. According to the actual situation of all customers, we will make the suitable study plan for all customers. If you buy the OGBA-101 Learning Materials from our company, we can promise that you will get the professional training to help you pass your OGBA-101 exam easily. By our professional training, you will pass your OGBA-101 exam and get the related certification in the shortest time.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67

Consider the following ADM phases objectives.

	Objective
1	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
2	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
3	Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABBs
4	Ensure conformance with the Target Architecture by implementation projects

Which phase does each objective match?

- A. 1F-2F-3E-4G
- B. 1G-2E-3F-4E
- C. 1F-2G-3F-4F
- D. 1E-2F-3E-4G

Answer: C

NEW QUESTION # 68

Which of the following can be used to help define information concepts in an information map?

- A. Organization Map
- B. Statement of business goals and drivers
- C. Stakeholder Map
- D. Value streams

Answer: B

Explanation:

A statement of business goals and drivers can be used to help define information concepts in an information map. Here's a detailed explanation:

* Information Map:

* Definition: An information map represents the structure and interaction of information assets that support key business functions and processes. It is used to visualize how information flows within the enterprise.

* Role of Business Goals and Drivers:

* Business Goals: These are the strategic objectives that the business aims to achieve. They provide direction and context for defining the information needs of the organization.

* Business Drivers: These are the factors that influence the business strategy and operations. They help in understanding the priorities and requirements for information management.

* Using Goals and Drivers to Define Information Concepts:

* Alignment: By aligning information concepts with business goals and drivers, architects can ensure that the information map reflects the strategic priorities of the organization.

* Relevance: Business goals and drivers help in identifying the most relevant information assets and understanding how they support the achievement of business objectives.

* TOGAF References:

* Phase A: Architecture Vision: During this phase, business goals and drivers are identified and used to shape the architecture vision and requirements.

* Phase C: Information Systems Architectures: In this phase, the data architecture is developed, and business goals and drivers are

used to define the information concepts and data structures needed to support the business.

In summary, a statement of business goals and drivers helps define information concepts in an information map by ensuring that the information assets are aligned with the strategic priorities and needs of the organization.

NEW QUESTION # 69

Consider the following Business Capability Example:

Name	Recruitment Management
Description	The ability to solicit, qualify, and provide support for hiring new employees into the organization.
Components	A User: Recruiter Stakeholders: Manager, Candidate Employee
	B Evaluate New Hire Requisitions; Recruit/Source Candidates; Screen and Select Candidates; Hire Candidate
	C Candidate/Applicant Details; Position Descriptions; Recruitment Agency Data; Industry Standard Role Definitions
	D Recruitment Management Application; HR Application; Social Media Application

Which of the following are A and C?

- A. Roles, Information.
- B. Actors, Actions.
- C. Who. What.
- D. Organization. Data.

Answer: A

Explanation:

According to the TOGAF Business Capabilities Guide V2, a business capability is defined as "the expression or the articulation of the capacity, materials, and expertise an organization needs in order to perform core functions"⁵. A business capability can be decomposed into four elements: roles, information, processes, and technology⁵. In the given example, A represents roles and C represents information.

In the context provided in the image, 'A' refers to the roles involved in the recruitment management process, which in this case is the 'User: Recruiter' and the 'Stakeholders: Manager, Candidate Employee'. 'C' refers to the information or data aspects of the process, which includes 'Candidate/Applicant Details', 'Position Descriptions', 'Recruitment Agency Data', and 'Industry Standard Role Definitions'. Thus, 'A' corresponds to 'Roles' and 'C' to 'Information'.

NEW QUESTION # 70

Which of the following is a benefit of information mapping?

- A. It highlights information requirements not addressed by a business architecture.
- B. It provides a framework for effective business requirements analysis.
- C. It enables improved business process integration.
- D. It provides a basis to support decision-making throughout the business.

Answer: D

Explanation:

In TOGAF and business architecture practices, information mapping is a technique used to organize, visualize, and analyze key information assets within an organization. One of the primary benefits of information mapping is that it provides a structured view of information flows, dependencies, and requirements across various parts of the organization, supporting decision-making at multiple levels. By clearly mapping how information is generated, used, and shared, decision-makers can make more informed choices, ensuring alignment with strategic goals and effective use of resources.

Each option can contribute to the business architecture, but Option D is the most accurate for the benefit of information mapping:

* Option A (Improved business process integration) describes a benefit of process mapping rather than information mapping, although structured information can support process integration indirectly.

* Option B (Framework for effective business requirements analysis) is not the primary benefit of information mapping. While information mapping helps clarify information needs, the analysis of business requirements is more focused on requirements engineering practices.

* Option C (Highlights information requirements not addressed) is incorrect because while information mapping can reveal gaps in information needs, its primary function is not to identify gaps but to provide a clear view of information assets and flows.

Therefore, Option D accurately reflects the main benefit of information mapping: supporting effective, informed decision-making across the business.

NEW QUESTION # 71

What criteria for a good architecture principle indicates that it is sufficiently definitive and precise to support consistent decision-making in complex situations?

- A. Completeness
- B. Consistency
- C. Robustness
- D. Stability

Answer: C

NEW QUESTION # 72

.....
