It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Topic 3	<ul style="list-style-type: none">• Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 4	<ul style="list-style-type: none">• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.

Pass Guaranteed 2026 SAP C-SEC-2405: SAP Certified Associate - Security Administrator Perfect 100% Exam Coverage

The users of our C-SEC-2405 exam questions log on to their account on the platform, at the same time to choose what they want to attend the exam simulation questions, the C-SEC-2405 exam questions are automatically for the user presents the same as the actual test environment simulation C-SEC-2405 test system, the software built-in timer function can help users better control over time, so as to achieve the systematic, keep up, as well as to improve the user's speed to solve the problem from the side with our C-SEC-2405 test guide.

SAP Certified Associate - Security Administrator Sample Questions (Q28-Q33):

NEW QUESTION # 28

In SAP S/4HANA Cloud Public Edition, which of the following can you change in a derived business role if the "Inherit Spaces in Derived Business Roles" checkbox is NOT selected in the leading business role?

- A. Business Catalogs
- B. Business Role Template
- C. Restrictions
- **D. Pages**

Answer: D

Explanation:

In SAP S/4HANA Cloud Public Edition, derived business roles inherit attributes from their leading business role, but the "Inherit Spaces in Derived Business Roles" checkbox controls whether Spaces are inherited. If this checkbox is not selected, administrators can modify the Pages assigned to the derived business role independently of the leading role. Pages in the SAP Fiori launchpad define the layout and content visible to users, such as tiles and applications, and allowing changes in the derived role provides flexibility to tailor the user interface for specific business needs. The Business Role Template, Restrictions, and Business Catalogs, however, remain inherited and cannot be modified in the derived role, as these are core components defined in the leading role to ensure consistency across related roles. This selective modification of Pages enables organizations to customize user experiences while maintaining standardized authorizations, supporting both operational efficiency and security compliance in SAP S/4HANA Cloud Public Edition's role management framework.

NEW QUESTION # 29

For which of the following can transformation variables be used?

- A. To save data to the output JSON file
- B. To save data permanently
- **C. To save data temporarily**

Answer: C

Explanation:

In SAP Cloud Identity Services, transformation variables are used to save data temporarily during data transformation processes. These variables act as placeholders to store intermediate values, such as user attributes or calculated fields, while processing data between source and target systems in identity provisioning. Temporary storage enables complex transformations, like mapping or reformatting data, without affecting the final output until the transformation is complete. Transformation variables are not used to save data to the output JSON file, as this is handled by the transformation rules' final output configuration.

Similarly, they do not save data permanently, as their scope is limited to the transformation process, and permanent storage would occur in the target system's repository. By using transformation variables for temporary data storage, SAP Cloud Identity Services ensures flexible and efficient data handling, supporting seamless integration and customization of identity data flows while maintaining security and accuracy in provisioning processes.

NEW QUESTION # 30

What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object to be checked to the chosen transaction code in the SAP
- B. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.
- **C. Assign authorization object S_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.**
- D. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".

Answer: C

NEW QUESTION # 31

What can be assigned directly to a user when using the SAP Launchpad service in SAP BTP?

- A. Launchpad roles
- B. Spaces
- **C. Role collections**
- D. Catalogs

Answer: C

Explanation:

In the SAP Launchpad service within SAP Business Technology Platform (BTP), Role collections can be assigned directly to a user. Role collections are groups of roles that define access to specific applications, services, or functionalities within the Launchpad, allowing administrators to grant users the necessary permissions to access content, such as Fiori apps or custom applications. By assigning role collections directly to users in the SAP BTP subaccount, administrators ensure that users have the appropriate access rights tailored to their responsibilities. Spaces, which organize apps in the Launchpad, and Catalogs, which group apps and tiles, are assigned to roles or role collections, not directly to users. Launchpad roles are not a distinct entity in SAP BTP; roles are part of role collections. This direct assignment of role collections simplifies access management, ensuring secure and efficient user access to the SAP Launchpad service while aligning with SAP BTP's security and authorization framework.

NEW QUESTION # 32

Where can you find SAP Fiori tiles and target mappings according to segregation of duty?

- A. Assigned Spaces
- **B. Business Catalogs**
- C. Assigned Pages
- D. Assigned Technical Catalogs

Answer: B

Explanation:

In SAP S/4HANA, SAP Fiori tiles and target mappings relevant to segregation of duties (SoD) are found in Business Catalogs. Business Catalogs group Fiori apps, tiles, and target mappings that correspond to specific business processes or roles, ensuring that authorizations are aligned with functional requirements. These catalogs are designed to support SoD by organizing applications and their associated authorizations in a way that prevents conflicting access, such as separating financial and procurement duties. By assigning Business Catalogs to business roles, administrators can enforce SoD principles, ensuring users only access apps relevant to their responsibilities. Assigned Pages and Assigned Spaces are related to the Fiori Launchpad's user interface organization, not directly to SoD or authorization management. Assigned Technical Catalogs contain technical objects, not business-specific tiles or mappings. Business Catalogs are thus the primary mechanism for maintaining SoD-compliant access, providing a structured approach to authorization management in SAP Fiori environments, ensuring security and compliance across business processes.

NEW QUESTION # 33

.....

A lot of office workers in their own professional development encounter bottleneck and begin to choose to continue to get the test C-SEC-2405 certification to the school for further study. We all understand the importance of education, and it is essential to get the C-SEC-2405 certification. Learn the importance of self-evident, and the stand or fall of learning outcome measure, in reality of hiring process, for the most part through your grades of high and low, as well as you acquire the qualification of how much remains. Therefore, the C-SEC-2405 practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best.
