Information-Technology-Management Authorized Certification | Information-Technology-Management Exam Forum

With the principles of customers first and service first, we will offer you the most considerate service. Free update for 365 days, and if you do have some questions about the Information-Technology-Management exam braindumps , you can ask the live chat service stuff for help or you can contact us by email, we will answer your questions immediately, and if you have any good suggestion of the Information-Technology-Management Exam Braindumps, we will be glad to accept. The Information-Technology-Management exam dumps is professional and helpful, it will benefit you a lot.

WGU Information Technology Management QGC1 Sample Questions (Q39-Q44):

NEW QUESTION # 39

What is a primary purpose of using prototypes in the business analysis process?

- A. To develop the back-end code of the final product
- B. To finalize the visual design and branding of the product
- C. To model requirements and gather early feedback from stakeholders
- D. To replace user manuals with interactive simulations

Answer: C

Explanation:

Prototypes are used in business analysis to model system requirements and gather early feedback from stakeholders. They provide a tangible representation of requirements, allowing users to visualize and test functionality before full-scale development begins.

Option A: Coding the back end is not the purpose of a prototype.

Option B: User manuals and simulations come later in training or documentation.

Option D: Branding and visual design are separate from business analysis.

Thus, the purpose of prototypes is to model requirements and gather early feedback from stakeholders.

NEW QUESTION # 40

An inventory manager is using a company's customer relationship management (CRM) system to determine how much inventory to pre-order for an upcoming sales promotion.

Which phase of CRM does this describe?

- A. Defining
- B. Analyzing
- C. Predicting
- D. Reporting

Answer: C

Explanation:

* Understanding CRM Phases:

* CRM systems encompass phases such as reporting, analyzing, and predicting to support business operations and decision-making.

* The predicting phase uses historical data to forecast future trends, behaviors, or requirements.

* Application in the Scenario:

* The inventory manager is using CRM data to forecast how much inventory to pre-order for a sales promotion, aligning with the predicting phase.

* This involves evaluating past sales trends and customer behaviors to anticipate demand.

* Why Other Options Are Incorrect:

* Option B (Defining): This phase does not exist in CRM processes.

* Option C (Reporting): Reporting provides data summaries but does not forecast future needs.

* Option D (Analyzing): Analyzing focuses on identifying patterns but stops short of prediction.

NEW QUESTION # 41

A director of software development observes friction between various team members. How should the director alleviate team friction?

- A. Create a culture of showing appreciation
- B. Nurture competition among team members
- C. Provide a public forum for anonymous feedback
- D. Ask each team member to provide weekly feedback via email

Answer: A

Explanation:

Understanding Team Friction:

Team friction often arises due to a lack of communication, recognition, or conflicting goals.

Building a positive work culture where team members feel valued can reduce friction and improve collaboration.

Creating a Culture of Appreciation:

Regularly acknowledging contributions fosters trust and teamwork.

It encourages positive behavior and strengthens team bonds.

Why Other Options Are Incorrect:

Option A: Weekly feedback is useful but does not address the root causes of friction.

Option C: Nurturing competition can exacerbate conflicts and harm collaboration.

Option D: Anonymous feedback might provide insights but does not directly alleviate friction.

NEW QUESTION # 42

What is an advantage of virtualization?

- A. Allows for greater workload stagnation
- B. Reduces the cost of ownership and makes IT simpler to manage
- C. Restricts the availability of resources
- D. Increases reliance on manual operations

Answer: B

Explanation:

* Understanding Virtualization:

* Virtualization is the process of creating virtual versions of physical resources, such as servers, storage, or networks, to maximize their utilization.

* Cost Reduction and Simplified Management:

* Virtualization reduces hardware costs by allowing multiple virtual machines to run on a single physical server.

* It simplifies IT management by enabling easier resource allocation, scaling, and disaster recovery.

* Why Other Options Are Incorrect:

* Option A: Virtualization increases resource availability, not restricts it.

* Option C: Virtualization enhances workload distribution, reducing stagnation.

* Option D: It reduces reliance on manual operations by enabling automation and centralized control.
