Topic 5	• Data Modeling, Analysis, and Integration: This section assesses the skills of Data Architects and covers data modeling, analysis, and integration.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q24-Q29):

NEW QUESTION # 24

What must you use to transform data in a dataset using if/then/else logic?

- A. Formula bar
- B. Custom expression editor
- C. Transform bar
- D. Calculations editor

Answer: B

Explanation:

To transform data in a dataset using if/then/else logic in SAP Analytics Cloud, you must use the Custom expression editor. This tool allows you to write complex logical conditions and perform conditional data transformations. The steps involved are:

Open the dataset you want to transform.

Navigate to the "Custom expression editor".

Write your if/then/else logic using the syntax supported by SAP Analytics Cloud. For example:

IF([Sales] > 1000, "High", "Low")

Apply the expression to the relevant column.

Validate and save your changes.

This approach allows for flexibility and precision in transforming your data based on specific conditions.

NEW QUESTION # 25

You have a story based on an import model. The transaction data in the model's data source changes. How can you update the data in the model? Note: There are 2 correct answers to this question.

- A. Refresh the story
- B. Refresh the import job
- C. Schedule the import
- D. Allow model import

Answer: A,C

Explanation:

To update the data in a model based on an import connection, two main approaches can be used:

Refresh the story: This action forces SAP Analytics Cloud to reload the data for the visualizations in a story, pulling in the most recent data available in the model. This is a manual process initiated by the user.

Schedule the import: This option allows users to set up a recurring data import schedule, ensuring the model is regularly updated with the latest data from the source system. This automated process helps maintain data freshness without manual intervention.

Both methods ensure that the story reflects the most current data, accommodating changes in the transaction data of the model's data source.

NEW QUESTION # 26

You are designing a new story. You want the size and position of widgets to adjust dynamically for viewing on different devices and screen sizes. Which page type must you use?

- A. Grid
- B. Canvas
- **C. Responsive**
- D. Composite

Answer: C

Explanation:

For designing a new story in SAP Analytics Cloud where the size and position of widgets need to adjust dynamically for different devices and screen sizes, the Responsive page type should be used. Responsive pages automatically adapt to the screen size of the device they are viewed on, providing an optimal viewing experience across desktops, tablets, and smartphones.

NEW QUESTION # 27

Which calculation types include dynamic date options? Note: There are 2 correct answers to this Question.

- A. Aggregation
- **B. Difference From**
- **C. Restricted Measure**
- D. Date Difference

Answer: B,C

NEW QUESTION # 28

You input new data for a private version in a story. What must you do to ensure the new data is added to the model?

- A. Send
- **B. Publish**
- C. Save
- D. Nothing

Answer: B

Explanation:

When inputting new data for a private version in a story in SAP Analytics Cloud, it is necessary to "Publish" the data to ensure it is added to the model. Publishing the private version commits the changes to the underlying model, making the new data visible and accessible to other users according to their permissions. This step is crucial for ensuring that the updated data is incorporated into the shared model for further analysis and decision-making.
