

Trustworthy Databricks-Certified-Data-Analyst-Associate Exam Torrent - Databricks-Certified-Data-Analyst-Associate Latest Exam Simulator

P.S. Free 2025 Databricks Databricks-Certified-Data-Analyst-Associate dumps are available on Google Drive shared by Prep4sureExam: <https://drive.google.com/open?id=1cVeEyH36rhn9e5H4tiytp2G7nvq2Vp>

Our Databricks Databricks-Certified-Data-Analyst-Associate real test can bring you the most valid and integrated content to ensure that what you study with is totally in accordance with the real Databricks Databricks-Certified-Data-Analyst-Associate Exam. And we give sincere and suitable after-sales service to all our customers to provide you a 100% success guarantee to pass your exams on your first attempt.

When preparing for the test Databricks-Certified-Data-Analyst-Associate certification, most clients choose our products because our Databricks-Certified-Data-Analyst-Associate learning file enjoys high reputation and boost high passing rate. Our products are the masterpiece of our company and designed especially for the certification. Our Databricks-Certified-Data-Analyst-Associate latest study question has gone through strict analysis and verification by the industry experts and senior published authors. The clients trust our products and treat our products as the first choice. So the total amounts of the clients and the sales volume of our Databricks-Certified-Data-Analyst-Associate learning file is constantly increasing.

Databricks-Certified-Data-Analyst-Associate Latest Exam Simulator, Latest Databricks-Certified-Data-Analyst-Associate Cram Materials

In order to cater to the different requirements of people from different countries in the international market, we have prepared three kinds of versions of our Databricks-Certified-Data-Analyst-Associate preparation questions in this website, namely, PDF version, online engine and software version, and you can choose any one of them as you like. The three versions have their own unique characteristics. The PDF version of Databricks-Certified-Data-Analyst-Associate Training Materials is convenient for you to print, the software version can provide practice test for you and the online version is for you to read anywhere at any time. If you are hesitating about which version should you choose, you can download our Databricks-Certified-Data-Analyst-Associate free demo first to get a firsthand experience before you make any decision.

Databricks Certified Data Analyst Associate Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

What is used as a compute resource for Databricks SQL?

- A. Downstream BI tools integrated with Databricks SQL
- B. Single-node clusters
- C. Standard clusters
- D. **SQL warehouses**

Answer: D

NEW QUESTION # 38

Which location can be used to determine the owner of a managed table?

- A. Review the Owner field in the table page using the SQL Editor
- **B. Review the Owner field in the table page using Catalog Explorer**
- C. Review the Owner field in the database page using Data Explorer
- D. Review the Owner field in the schema page using Data Explorer

Answer: B

Explanation:

In Databricks, to determine the owner of a managed table, you can utilize the Catalog Explorer feature. The steps are as follows:

Access Catalog Explorer:

In your Databricks workspace, click on the Catalog icon in the sidebar to open Catalog Explorer.

Navigate to the Table:

Within Catalog Explorer, browse through the catalog and schema to locate the specific managed table whose ownership you wish to verify.

View Table Details:

Click on the table name to open its details page.

Identify the Owner:

On the table's details page, review the Owner field, which displays the principal (user, service principal, or group) that owns the table.

This method provides a straightforward way to ascertain the ownership of managed tables within the Databricks environment.

Understanding table ownership is essential for managing permissions and ensuring proper access control.

NEW QUESTION # 39

A data analyst is processing a complex aggregation on a table with zero null values and their query returns the following result:

group_1	group_2	sum
null	null	100
null	Y	70
null	Z	30
A	null	50
A	Y	30
A	Z	20
B	null	50
B	Y	40
B	Z	10

Which of the following queries did the analyst run to obtain the above result?

- **A.**

```
SELECT
    group_1,
    group_2,
    count(values) AS count
FROM my_table
GROUP BY group_1, group_2 WITH ROLLUP;
```

```
SELECT
  group_1,
  group_2,
  count(values) AS count
FROM my_table
  GROUP BY group_1, group_2;
```

- B. GROUP BY group_1, group_2;
- C.

```
SELECT
  group_1, databricks
  group_2,
  count(values) AS count
FROM my_table
  GROUP BY group_1, group_2 WITH CUBE;
```

```
SELECT
  group_1,
  group_2,
  count(values) AS count
FROM my_table
  GROUP BY group_1, group_2, (group_1, group_2);
```

- D.
- E.

```
SELECT
  group_1, databricks
  group_2,
  count(values) AS count
FROM my_table
  GROUP BY group_1, group_2 INCLUDING NULL;
```

Answer: A

Explanation:

The result set provided shows a combination of grouping by two columns (group_1 and group_2) with subtotals for each level of grouping and a grand total. This pattern is typical of a GROUP BY ... WITH ROLLUP operation in SQL, which provides subtotal rows and a grand total row in the result set.

Considering the query options:

- A) Option A: GROUP BY group_1, group_2 INCLUDING NULL - This is not a standard SQL clause and would not result in subtotals and a grand total.
- B) Option B: GROUP BY group_1, group_2 WITH ROLLUP - This would create subtotals for each unique group_1, each combination of group_1 and group_2, and a grand total, which matches the result set provided.
- C) Option C: GROUP BY group_1, group_2 - This is a simple GROUP BY and would not include subtotals or a grand total.
- D) Option D: GROUP BY group_1, group_2, (group_1, group_2) - This syntax is not standard and would likely result in an error or be interpreted as a simple GROUP BY, not providing the subtotals and grand total.
- E) Option E: GROUP BY group_1, group_2 WITH CUBE - The WITH CUBE operation produces subtotals for all combinations of the selected columns and a grand total, which is more than what is shown in the result set.

The correct answer is Option B, which uses WITH ROLLUP to generate the subtotals for each level of grouping as well as a grand total. This matches the result set where we have subtotals for each group_1, each combination of group_1 and group_2, and the grand total where both group_1 and group_2 are NULL.

NEW QUESTION # 40

Query History provides Databricks SQL users with a lot of benefits. A data analyst has been asked to share all of these benefits

with their team as part of a training exercise. One of the benefit statements the analyst provided to their team is incorrect. Which statement about Query History is incorrect?

- A. It can be used to debug queries.
- B. It can be used to automate query execution on multiple warehouses (formerly endpoints).
- C. It can be used to view the query plan of queries that have run.
- D. It can be used to troubleshoot slow running queries.

Answer: B

Explanation:

Query History in Databricks SQL is intended for reviewing executed queries, understanding their execution plans, and identifying performance issues or errors for debugging purposes. It allows users to analyze query duration, resources used, and potential bottlenecks. However, Query History does not provide any capability to automate the execution of queries across multiple warehouses; automation must be handled through jobs or external orchestration tools, not through the Query History feature itself.

NEW QUESTION # 41

A data analyst has been asked to configure an alert for a query that returns the income in the accounts_receivable table for a date range. The date range is configurable using a Date query parameter.

The Alert does not work.

Which of the following describes why the Alert does not work?

- A. The wrong query parameter is being used. Alerts only work with dropdown list query parameters, not dates.
- B. The wrong query parameter is being used. Alerts only work with Date and Time query parameters.
- C. **Queries that use query parameters cannot be used with Alerts.**
- D. Queries that return results based on dates cannot be used with Alerts.
- E. Alerts don't work with queries that access tables.

Answer: C

Explanation:

The reason the alert is not functioning as expected is because Databricks SQL Alerts do not support query parameters. This limitation applies to all types of parameters, including date parameters.

Here's why:

Alerts require static, deterministic query results so they can compare values consistently during scheduled executions.

When a query includes parameters (e.g., a date range parameter), its results may change based on user input or the default value set in the query editor.

However, Databricks SQL Alerts will always use the default value set for the parameter at the time the alert is created. This means the alert doesn't dynamically adapt to new date ranges and will not reflect changes unless the query is manually updated.

As a result, if the business logic behind the alert depends on changing date ranges or any user input, the alert will not trigger correctly, or may never trigger at all.

Therefore, the correct explanation contradicts Option B, which is incorrect in saying that alerts cannot work with date-based queries at all. In fact, they can-as long as the query is static (i.e., without parameters).

Reference:

Databricks SQL Alerts Documentation

Databricks Knowledge: "You cannot use alerts with queries that contain parameters."

NEW QUESTION # 42

.....

If you doubt the high pass rate of our customers is as 98% to 100% with the help of our Databricks-Certified-Data-Analyst-Associate exam questions, you can free download the demos to check it out. You have to believe that the quality content and scientific design of Databricks-Certified-Data-Analyst-Associate learning guide can really do this. You can easily find out that there are many people who have benefited from Databricks-Certified-Data-Analyst-Associate Actual Exam. In this field, let me tell you our excellent Databricks-Certified-Data-Analyst-Associate study materials are in the position that can't be ignored.

Databricks-Certified-Data-Analyst-Associate Latest Exam Simulator: <https://www.prep4sureexam.com/Databricks-Certified-Data-Analyst-Associate-dumps-torrent.html>

We sincerely hope our product can help you pass Databricks Databricks-Certified-Data-Analyst-Associate Latest Exam Simulator exam, Bright hard the hard as long as Prep4sureExam Databricks-Certified-Data-Analyst-Associate Latest Exam Simulator still, always find hope, Databricks Trustworthy Databricks-Certified-Data-Analyst-Associate Exam Torrent Compared with others, you can have more opportunities to get promotion and desirable jobs, Many IT companies highly value the Databricks-Certified-Data-Analyst-Associate Latest Exam Simulator certificate when they employ workers, then your opportunities will be greater than other candidates.

Yes, all our test questions on sale are valid, Abstract Classes and Interfaces, Databricks-Certified-Data-Analyst-Associate We sincerely hope our product can help you pass Databricks exam, Bright hard the hard as long as Prep4sureExam still, always find hope.

Prep4sureExam Databricks Databricks-Certified-Data-Analyst-Associate Desktop Practice Exam

Compared with others, you can have more opportunities to get promotion and desirable Latest Databricks-Certified-Data-Analyst-Associate Cram Materials jobs, Many IT companies highly value the Data Analyst certificate when they employ workers, then your opportunities will be greater than other candidates.

All in all if you feel upset about the Databricks-Certified-Data-Analyst-Associate exams we will be your best choice.
