## Oracle 1Z0-1075-25 Oracle Manufacturing Cloud 2025 Implementation Professional QUESTION & ANSWERS

Visit Now: <https://www.dumps-certify.com>

There are a lot of excellent experts and professors in our company. The high quality of the 1z0-1075-25 reference guide from our company resulted from their constant practice. After a long period of research and development, our 1z0-1075-25 test questions have been the leader study materials in the field. We have taken our customers' suggestions of the 1z0-1075-25 Exam Prep seriously, we have tried our best to perfect the 1z0-1075-25 reference guide from our company just in order to meet the need of these customers well. So stop hesitation and buy our 1z0-1075-25 study materials.

In the 21 Century, the 1z0-1075-25 certification became more and more recognized in the society because it represented the certain ability of examinees. However, in order to obtain 1z0-1075-25 certification, you have to spend a lot of time preparing for the 1z0-1075-25 Exam. Many people gave up because of all kinds of difficulties before the examination, and finally lost the opportunity to enhance their self-worth. As a thriving multinational company, we are always committed to solving this problem.

## Oracle Realistic Valid 1z0-1075-25 Exam Voucher Free PDF

Oracle study dumps training Q&As Are Based On The Real Exam. Best 1z0-1075-25 study material make you pass exam easily. Oracle Manufacturing Cloud 2025 Implementation Professional dump PDF Questions collection for Practice..latest 1z0-1075-25 Test Engine are available. Hot Oracle Manufacturing Cloud 2025 Implementation Professional questions to pass the exam in First Attempt Easily. High quality 1z0-1075-25 relevant exam dumps. Best practice for you.

## Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q50-Q55):

### NEW QUESTION # 50

Two work definitions are created in the application: one for Engine Finished Good and the other for Pallet Finished Good. The Engine Finished Good item should have Pallet Finished Good as one of its components. How can you establish the relationship between the Pallet and Engine work definitions?

- A. Work definition versions can be used to tie the work orders.
- B. Assign a higher priority to the work definition created for Engine and a lower one to the work definition for Pallet.
- C. The two work definitions can be tied through Project or Selban numbers.
- **D. Create a subinventory to serve as the completion subinventory for yielding Pallet, and then use the same subinventory to serve as the supply subinventory of Pallet in the work definition created for Engine.**

**Answer: D**

Explanation:

To establish a relationship between the work definitions of Engine Finished Good and Pallet Finished Good, you can create a common subinventory. This subinventory will serve as the completion subinventory for the Pallet Finished Good and the supply subinventory for the Engine Finished Good. This ensures that the Pallet Finished Good is completed in one process and is then available as a component for the Engine Finished Good.

\* Subinventory Linking : Using a common subinventory ties the output from one work definition as an input to another. The Pallet becomes an inventory item that is consumed in the production of the Engine.

Oracle Manufacturing Cloud 's documentation on work definitions and inventory setups explains how subinventories are used to link different stages of production.

### NEW QUESTION # 51

You are implementing project-driven supply chain functionality. You need to set up movement requests to issue or transfer project material to manage the inventory associated with projects and tasks.

Which two are types of movement requests to issue or transfer project material?

- A. Pick transactions Interfaced by the project costing project and task using the project material, common Inventory, or Inventory from another project.
- **B. Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project.**
- C. Create a movement receipt line with the Project Costing widget.
- **D. Transfer project material from one subinventory to another.**

**Answer: B,D**

Explanation:

When setting up movement requests in a project-driven supply chain, you need to manage inventory associated with specific projects and tasks. The two correct types of movement requests in this context are:

\* Statement A : Transfer project material from one subinventory to another - This is a standard type of movement request in Oracle Cloud, allowing project materials to be transferred between subinventories.

It is essential for managing inventory tied to specific projects and tasks, ensuring that materials are available where needed for project execution.

Oracle Fusion SCM Cloud: Inventory Management Guide describes how material transfers can be executed between subinventories, including project-based transfers.

Statement D : Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project - Manual picking for project-specific material is another supported operation. It allows users to perform manual picks from various sources, such as project material, common inventory, or even inventory from other projects.

Reference : Oracle Project-Driven Supply Chain documentation explains how manual picks can be configured to source inventory based on project requirements.

Incorrect Statements:

Statement B : Pick transactions are not interfaced specifically by project costing. Although project costing is relevant for tracking costs, it is not the driving factor behind pick transactions.

Statement C : There is no concept of creating a movement receipt line with the " Project Costing widget " in Oracle Manufacturing Cloud.

### NEW QUESTION # 52

You are defining a standard operation for visual inspection. You want the completion of this standard operation to be reported in all work orders that reference it.

Which setup task must you perform to achieve this?

- A. Select the Automatically Transact check box while defining the standard operation.
- B. Deselect the Count Point check box while defining the standard operation.
- **C. Select the Count Point check box while defining the standard operation.**
- D. Ensure that the Charge Type of the resource is Automatic.

**Answer: C**

Explanation:

In Oracle Manufacturing Cloud, when defining a standard operation such as visual inspection, marking it as a Count Point ensures that its completion will be tracked and reported for all work orders referencing it. A Count Point operation is one where progress must be explicitly recorded, allowing visibility into work order completion.

\* Selecting the Count Point check box ensures that this operation becomes a mandatory checkpoint where users must report completion in all related work orders. This is essential for operations like visual inspection, where reporting completion is critical to production quality.

Oracle Manufacturing Cloud documentation on defining standard operations explains the significance of using the Count Point functionality to enforce operation completion reporting.

### NEW QUESTION # 53

Your customer runs production 24 x 7 x 365 and wants to track Overall Equipment Effectiveness (OEE) online.

Which key setup can they use to achieve this?

- A. Enable IoT Fleet Monitoring and enable synchronization to IoT Production Monitoring in Plant Parameters.
- B. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " In Plant Parameters.
- C. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production
- **D. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production Monitoring " In Inventory Organization.**
- E. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " in Resources.

**Answer: D**

### NEW QUESTION # 54

A Production Operator needs to load work order operation transactions from an external system into Manufacturing Cloud.

What is the correct sequence of tasks to achieve this?

- **A. Load data to data repository > Export file to UCM server > Load file from UCM to interface table > Process import operations transactions.**
- B. Load data to data repository > Load file from UCM to interface table > Export file to UCM server > Process import operations transactions.
- C. Load data to data repository > Export file to UCM server > Process import operations transactions > Load file from UCM to Interface table.
- D. Export file to UCM server > Load data to data repository > Process import operations transactions > Load file from UCM to interface table.

**Answer: A**

Explanation:

When loading work order operation transactions from an external system into Oracle Manufacturing Cloud, the correct sequence of tasks is:

\* Load data to the data repository : This step ensures the external data is available in Oracle Manufacturing Cloud.

\* Export file to UCM server : The data file is then exported to the Universal Content Management (UCM) server, which acts as a staging area for further processing.

\* Load file from UCM to interface table : The data from the UCM server is loaded into the appropriate interface table.

\* Process import operations transactions : Finally, the system processes the imported transactions and updates the work orders accordingly.

Incorrect sequences:

\* Options A, B, C do not follow the correct order, particularly around the interaction between the UCM server and the interface tables.

Oracle Manufacturing Cloud documentation on File-Based Data Import (FBDI) explains the necessary steps and sequence for loading work order transactions from external systems.

## NEW QUESTION # 55

.....

To pass the Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) certification exam you need to prepare well with the help of top-notch Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) exam questions which you can download from platform. On this platform, you will get valid, updated, and real Oracle 1z0-1075-25 Dumps for quick exam preparation.

**1z0-1075-25 Latest Exam:** [https://www.braindumpsvce.com/1z0-1075-25\\_exam-dumps-torrent.html](https://www.braindumpsvce.com/1z0-1075-25_exam-dumps-torrent.html)

Once select our 1z0-1075-25 Latest Exam - Oracle Manufacturing Cloud 2025 Implementation Professional test dumps, you will not only save time and money, but also help you pass test successfully, To let the clients have a fundamental understanding of our 1z0-1075-25 training materials, we provide the free trials of our 1z0-1075-25 exam questions before their purchasing, Oracle Valid 1z0-1075-25 Exam Voucher In the past, our passing rate has remained at 99%-100%.

Al Ahram, Cairo the most influential Arab world newspaper) When it comes to Islamic 1z0-1075-25 Latest Exam studies, Bernard Lewis is the father of us all, But the subtleties of the drama displayed an essential truth about the nature of personal criticism.

## Real Oracle 1z0-1075-25 Exam Questions -The Greatest Shortcut Towards Success

Once select our Oracle Manufacturing Cloud 2025 Implementation Professional test dumps, you will not 1z0-1075-25 only save time and money, but also help you pass test successfully, To let the clients have a fundamental understanding of our 1z0-1075-25 training materials, we provide the free trials of our 1z0-1075-25 exam questions before their purchasing.

In the past, our passing rate has remained at 99%-100%, No other Oracle Cloud book Exam 1z0-1075-25 Questions Fee or Oracle Cloud dumps will bring you the knowledge and preparation that you will get from one of the Oracle Cloud CBT courses available only from BraindumpsVCE.

The user only needs to write out the routine and step points of the 1z0-1075-25 test material, so that we can get good results in the exams.
