## Exam Plat-Dev-210 Pattern & Plat-Dev-210 Reliable Test Experience

All these three Plat-Dev-210 real dumps formats contain the actual and updated Salesforce Certified Omnistudio Developer Plat-Dev-210 exam questions that will surely repeat in the upcoming Plat-Dev-210 exam and you can easily pass it with good scores. Today is the best time to learn new in-demand skills and upgrade your knowledge. Yes, you can do this easily. Just enroll in the Salesforce Certified Omnistudio Developer Plat-Dev-210 Exam and start preparation with Salesforce Certified Omnistudio Developer Plat-Dev-210 exam dumps. The updated, real, and verified Salesforce Dumps are ready for download. Just pay affordable Salesforce Certified Omnistudio Developer Plat-Dev-210 exam dumps charges and get the exam dumps file in your mailbox and start VCE4Dumps Plat-Dev-210 exam preparation.

## Salesforce Certified Omnistudio Developer Sample Questions (Q97-Q102):

### NEW QUESTION # 97

In a calculation procedure, what is required for the output of a calculation step to be used in an aggregation step?

- A. It must be included in constants.
- B. It must be included in the calculation output.
- C. It must be a matrix lookup step.
- D. It must be a calculation step.

**Answer: B**

Explanation:

In a calculation procedure, the output of a calculation step must be included in the calculation output in order to be used in an aggregation step. The calculation output defines the variables that are available for aggregation

**NEW QUESTION # 98**

A developer creates an Integration Procedure with a Set values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and executes the preview. The developer sees the dataextracted by the DataRaptor in the Debug Log, but the response is empty. What is the likely cause of this issue?

- A. The Response cannot be previewed directly.
- B. A Response Action was not added to the Integration Procedure.
- C. The DataRaptor Action did not have the Add Response To Response JSON property set to true.
- D. The AccountId used for the preview is invalid.

**Answer: C**

Explanation:

The Add Response To Response JSON property on the DataRaptor Action indicates that the output of the DataRaptor should be added to the response JSON of the Integration Procedure. If this property is not set to true, the response will be empty even if the DataRaptor extracts data successfully.

**NEW QUESTION # 99**

Refer to the exhibit.

What JSON from the DRGetAccountDetails action would display all six values correctly in the OmniScript structure shown? BlkContacts is a Repeat Block.

```
{
  "Contacts": [
    {
      "ContactPhone": "(415) 169-1475",
      "ContactName": "Edward Stamos"
    },
    {
      "ContactPhone": "(415) 169-1475",
      "ContactName": "Edward Stamos"
    }
  ]
}
```

- A.

```

{
  "BlkContacts": [
    {
      "contactPhone": "(212) 169-1475",
      "contactName": "Edward Stanos"
    }, {
      "contactPhone": "(212) 169-8979",
      "contactName": "Leanne Tomlin"
    }
  ],
  "accountPhone": "2121546460",
  "accountName": "Acce"
}

```

- B.

```

{
  "BlkContacts": [
    {
      "Phone": "(212) 169-1475",
      "name": "Edward Stanos"
    }, {
      "Phone": "(212) 169-8979",
      "name": "Leanne Tomlin"
    }
  ],
  "AccountPhone": "2121546460",
  "AccountName": "Acce"
}

```

- C.

```

{
  "ContactPhone": "(212) 169-1475",
  "ContactName": "Edward Stanos",
  "ContactPhone": "(212) 169-8979",
  "ContactName": "Leanne Tomlin",
  "AccountPhone": "2121546460",
  "AccountName": "Acce"
}

```

- D.

**Answer: B**

Explanation:

According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with six elements: AccountName, AccountNumber, AccountType, AccountOwner, ContactName, and ContactPhone.

The DRGetAccountDetails action is a DataRaptor Extract action that retrieves data from the Account and Contact objects in Salesforce. The BlkContacts element is a Repeat Block that displays a list of contacts related to the account. Therefore, the JSON from the DRGetAccountDetails action that would display all six values correctly in the OmniScript structure shown is option C, which has the following structure:

{The other options have different structures that do not match the OmniScript structure shown. Therefore, the correct answer is C.

```

{
  "AccountName": "Acme Corporation",
  "AccountNumber": "ACME-001",
  "AccountType": "Customer",
  "AccountOwner": "John Smith",
  "BikContacts": [
    {
      "ContactName": "Alice Jones",
      "ContactPhone": "(123) 456-7890"
    },
    {
      "ContactName": "Bob Lee",
      "ContactPhone": "(234) 567-8901"
    }
  ]
}

```

**NEW QUESTION # 100**

Refer to the exhibit below. A developer has configured an integration Procedure element with Additional input. Alternatively, how could the developer configure SEND/RESPONSE TRANSFORMATION to send exactly the same data? Assume the developer has un-checked Send Only Additional input.

- A. 

Send JSON Path DRExtractAction:Account	Send JSON Node SecondaryAccount
---	------------------------------------
- B. 

Send JSON Path %SecondaryAccount%	Send JSON Node DRExtractAction:Account
--------------------------------------	---
- C. 

Send JSON Path SecondaryAccount	Send JSON Node DRExtractAction:Account
------------------------------------	---
- D. 

Send JSON Path DRExtractAction:Account	Send JSON Node %SecondaryAccount%
---	--------------------------------------

**Answer: B**

Explanation:

The Send JSON Path syntax for accessing an element from an Integration Procedure structure is BlockName.ElementName. In this case, the BlockName is BlockX and the ElementName is ActionZ. The colon (:) is used to separate the input and output parameters, not the block and element names. The order of the block and element names should follow the hierarchy of the structure, from top to bottom. The Additional input parameter is not needed in this case, as it is already included in the Send JSON Path.

**NEW QUESTION # 101**

Refer to the exhibit below. What JSON code correctly represents the step in the OmniScript Structure panel shown?

```

"Step1": {
  "Block1": {
    "Text1": "Text",
    "Telephone1": "1234567890"
  },
  "Block2": {
    "Checkbox1": false,
    "Block3": {
      "Multi-select1": "Value A;Value B"
    }
  }
}

```

- A.
- B.

```

"Step1": {
  "Block1": {
    "Text1": "Text",
    "Telephone1": "1234567890"
  },
  "Block2": {
    "Checkbox1": false,
    "Block3": {
      "Multi-select1": "Value A;Value B"
    }
  }
}

```

- C.)

- D.

**Answer: C**

Explanation:

The JSON code correctly represents the step in the OmniScript Structure panel shown. The JSON code has the following properties:

- \* The type is "Step", which indicates that this is a step element in the OmniScript.
- \* The label is "Step 1", which matches the label shown in the panel.
- \* The name is "Step1", which matches the name shown in the panel.

- \* The elements property is an array that contains one element, which is a text field.
- \* The text field element has the following properties:
- \* The type is "Text", which indicates that this is a text field element.
- \* The label is "Text Field 1", which matches the label shown in the panel.
- \* The name is "TextField1", which matches the name shown in the panel.
- \* The value property is an empty string, which indicates that this text field has no default value.

## NEW QUESTION # 102

.....

Take a look at our Free Salesforce Plat-Dev-210 Exam Questions and Answers to check how perfect they are for your exam preparation. Once you buy it, you will be able to get free updates for Salesforce Plat-Dev-210 exam questions for up to 12 months. We also ensure that our support team and the core team of Plat-Dev-210 provide services to resolve all your issues. There is a high probability that you will be successful in the Salesforce Plat-Dev-210 exam on the first attempt after buying our prep material.

**Exam Plat-Dev-210 Pattern:** <https://www.vce4dumps.com/Plat-Dev-210-valid-torrent.html>

And there is no doubt that as long as you practice the questions in our study materials, you can pass the Exam Plat-Dev-210 Pattern Exam Plat-Dev-210 Pattern - Salesforce Certified Omnistudio Developer exam and gain the related certification as easy as pie. Our Plat-Dev-210 learning quiz according to your specific circumstances, for you to develop a suitable schedule and learning materials, so that you can prepare in the shortest possible time to pass the exam needs everything.
