If clients feel good after trying out our demos they will choose the full version of the test bank to learn our PDI Study Materials. And the PDF version can be printed into paper documents and convenient for the client to take notes.

Earning the Salesforce PDI Certification is a great way to showcase your expertise in Salesforce development. It is a valuable credential that can help you stand out in a competitive job market and increase your earning potential. With this certification, you can demonstrate your skills to potential employers, and they can trust that you have the knowledge and skills to develop custom applications on the Salesforce platform.

### Salesforce Platform Developer I (PDI) Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

Which three resources in an Aura component can contain JavaScript functions? Choose 3 answers

- A. Controller
- B. style
- C. Renderer
- D. Design
- E. Helper

**Answer: A,C,E**

Explanation:

In an Aura component, JavaScript functions can be included in the following resources:

Controller (.js file):

Handles events triggered by user interaction or component lifecycle.

Contains action handlers defined in the component's markup.

"A client-side controller contains the handler functions that are called in response to events fired by the component or other components."

- Aura Components Developer Guide: Client-Side Controller

Helper (.js file):

Contains reusable functions that can be called from the controller or renderer.

Helps to keep the controller lean by abstracting complex logic.

"A helper JavaScript resource can be added to an Aura component bundle and is used to store helper functions that can be reused in the component's client-side code."

- Aura Components Developer Guide: Helper Functions

Renderer (.js file):

Allows for custom rendering behavior.

Contains methods that can override default rendering lifecycle events.

"A renderer component bundle resource allows you to customize the rendering behavior of a component."

- Aura Components Developer Guide: Custom Renderers

Why Other Options Are Incorrect:

C . Style:

The .css file in an Aura component is used for styling and cannot contain JavaScript functions.

"An Aura component or application can have a style (CSS) resource to define its styles."

- Aura Components Developer Guide: Style

E . Design:

The .design file is used to define metadata values for the component, especially when used in Lightning App Builder or Community Builder.

"A design resource describes the design-time behavior of an Aura component-information that visual tools need to display the component in a page or app."

- Aura Components Developer Guide: Design Files

Conclusion: JavaScript functions in an Aura component can be placed in the Controller, Helper, and Renderer resources. Therefore, the correct answers are A, B, and D.

#### NEW QUESTION # 38

Given the following Anonymous block:

```
List<Case> casesToUpdate = new List<Case>();
for(Case thisCase : [SELECT Id, Status FROM Case LIMIT 50000]){
    thisCase.Status = 'Working';
    casesToUpdate.add(thisCase);
}
try{
    Database.update(casesToUpdate, false);
} catch (Exception e) {
    System.debug(e, 'salesforce');
}
```

What should a developer consider for an environment that has over 10,000 Case records?

- A. The try-catch block will handle any DML exceptions thrown.
- B. The try-catch block will handle exceptions thrown by governor limits.
- C. The transaction will succeed and changes will be committed.
- D. The transaction will fail due to exceeding the governor limit.

**Answer: D**

#### NEW QUESTION # 39

Which type of information is provided by the Checkpoints tab in the Developer Console? (Choose 2)

- A. Namespace
- B. Exception
- C. Debug Statement
- D. Time

**Answer: A,D**

#### NEW QUESTION # 40

A developer writes a trigger on the Account object on the before update event that increments a count field. A workflow rule also increments the count field every time that an Account is created or updated. The field update in the workflow rule is configured to not re-evaluate workflow rules.

What is the value of the count field if an Account is inserted with an initial value of zero, assuming no other automation logic is implemented on the Account?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

#### NEW QUESTION # 41

Which three resources in an Aura component can contain JavaScript functions? Choose 3 answers

- A. Controller
- B. Renderer
- C. Design
- D. Style

- E. Helper

Answer: A,B,E
