## The latest International Code Council Certification Fire-Inspector-II exam training methods

With many advantages such as immediate download, simulation before the real test as well as high degree of privacy, our Fire-Inspector-II actual exam survives all the ordeals throughout its development and remains one of the best choices for those in preparation for exams. Many people have gained good grades after using our Fire-Inspector-II real test, so you will also enjoy the good results. Don't hesitate any more. Time and tide wait for no man. If you really long for recognition and success, you had better choose our Fire-Inspector-II exam demo since no other exam demo has better quality than our Fire-Inspector-II training questions.

## International Code Council 67 - Fire Inspector II Exam Sample Questions (Q28-Q33):

### NEW QUESTION # 28

Platforms used for access to aboveground tanks storing flammable or combustible liquids shall be:

- A. built of noncombustible construction.
- B. at least 4 ft. wide.
- C. built of nonferrous, nonsparking metal.
- D. located no closer than 3 ft. to the side of the tank.

**Answer: A**

### NEW QUESTION # 29

Foamed plastics or materials containing foamed plastics used for stage scenery must be approved when tested in accordance with

- A. NFPA 11A
- B. CPSC 16CFR
- **C. UL 1975**
- D. ASTM D 1784

**Answer: C**

Explanation:

Foamed plastics or materials containing foamed plastics used for stage scenery must meet strict fire performance requirements to prevent rapid flame spread and fire hazards in assembly occupancies.

The correct fire test standard for these materials is UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 807.4.2 (Foamed Plastics for Stage Scenery) IFC 807.4.2 states that foamed plastics used in scenery must be tested and approved per UL 1975 to ensure fire safety.

2. UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes This standard evaluates the flammability and smoke production of foamed plastics used in decorative applications, including stage scenery.

Detailed Explanation of Answer Choices:

Option A (Correct): UL 1975 is the required test standard for foamed plastics used in stage scenery, ensuring compliance with IFC 807.4.2.

Option B (Incorrect): NFPA 11A deals with foam-water fire suppression systems, not foamed plastics for decorative use.

Option C (Incorrect): CPSC 16CFR relates to consumer product safety regulations but does not address fire safety for foamed plastics on stage scenery.

Option D (Incorrect): ASTM D 1784 is a test for rigid PVC plastics and does not apply to foamed plastics used for stage scenery. Thus, the correct and verified answer is: A. UL 1975.

### NEW QUESTION # 30

Two tents which each have an area of 20,000 sq. ft. shall be separated from each other by a distance of not less than:

- A. 0 ft. (no separation is required).
- **B. 20 ft.**
- C. 10 ft.
- D. 25 ft.

**Answer: B**

Explanation:

IFC Section 3103.8.2 (Separation of Temporary Tents) requires tents larger than 15,000 sq. ft. to be separated by at least 20 feet to prevent fire spread, unless connected by a corridor meeting specific requirements (not indicated here). Each tent at 20,000 sq. ft. exceeds this threshold, necessitating 20 feet of separation. Option A (0 ft.) applies only to smaller tents, B (10 ft.) is insufficient, and D (25 ft.) exceeds the minimum. Thus, C is correct.

### NEW QUESTION # 31

When more than 500 chairs are used for an assembly event held in a gymnasium, they must be secured to the floor or:

- A. be spaced at least 6 in. apart.
- **B. be fastened together in groups of not less than 3.**
- C. be fastened together in groups of not less than 10.
- D. be fastened together in groups of not less than 6.

**Answer: B**

Explanation:

Seating Arrangements for Large Assembly Events

According to the International Fire Code (IFC) 2021, Section 1029.14, when more than 500 chairs are used for an assembly event held in a gymnasium (or similar venue), they must be either:

Secured to the floor OR

Fastened together in groups of at least three (3) chairs.

## 2. Why Groups of 3 is the Correct Answer

This requirement ensures organized seating, preventing chairs from shifting or obstructing aisles during emergencies.

Properly fastened chairs reduce the risk of crowd-related hazards, ensuring safe and efficient evacuation if needed.

## 3. Verification of Other Options

Option A (spaced at least 6 inches apart) - Incorrect, as the IFC requires chairs to be fastened together or secured when over 500 are used.

Option C (groups of not less than 6) - Incorrect, as the minimum required grouping is 3.

Option D (groups of not less than 10) - Incorrect, as the IFC does not mandate groups of 10.

Reference Sources:

International Fire Code (IFC) 2021 - Section 1029.14 (Seating and Fastening Requirements for Assembly Events) NFPA 101: Life Safety Code (Seating Arrangements in Assembly Occupancies) ICC Fire Inspector II Study Guide (2021)

## NEW QUESTION # 32

Panic hardware is required on exit doors serving an occupant load of \_\_\_ or more in a Group \_\_\_ Occupancy

- A. 100; F
- B. 50; M
- **C. 50; A**
- D. 10; A

**Answer: C**

Explanation:

The requirement for panic hardware on exit doors is specified in 2021 IFC Section 1010.2.9 - Panic and Fire Exit Hardware.

IFC Section 1010.2.9.1 - Where Panic Hardware is Required:

Panic hardware is required for Group A (Assembly) occupancies when the occupant load is 50 or more.

It is also required in certain Group E (Educational) and Group R-1 (Hotels and Dormitories) occupancies under specific conditions.

Why Other Options Are Incorrect?

A: 10; A - The threshold for panic hardware in Group A occupancies is 50, not 10.

C: 50; M - Group M (Mercantile) does not require panic hardware unless specifically required by another section of the code.

D: 100; F - Panic hardware is not required in Group F (Factory) occupancies at 100 occupants; the threshold applies primarily to Group A.

## NEW QUESTION # 33

.....

If you search test practice questions you can find us which is the leading position in this field or you may know us from other candidates about our high-quality Fire-Inspector-II training materials as every year thousands of candidates choose us and gain success for their exams.
