Certified Development Lifecycle and Deployment Architect Solutions Complete final exam 2024

Universal Containers has started building a customer Lightning community that contains a few dozen Aura components. The development team lead has come to the Salesforce architect about questions regarding testing the Lightning components. What two knowledge points can the architect pass to the development team lead? Choose 2 answers

- A. There is a \$T test helper object that can be used to create the instance of the Lightning component, and it is promise enabled.
- B. The testing of the JavaScript part of the Aura component can be tested in the Jest framework and the Apex controllers can be tested using test classes.
- C. Install the Lightning test service AppExchange package to enable the Aura component testing.
- D. The testing can be viewed in the lightning.force.com/c/jasminetests.app URL. The page loads and runs Jasmine test and writes pass/fail information to the screen. - CORRECT ANSWER-ANSWER:BC - CHECKED

What are three advantages of using the SFDX? Choose 3 answers

- A. Can store code on a local machine, or a version control system.
- B. Can use native Deployment Rollback Tool to quickly revert to prior state.
- C. Can quickly deploy metadata using Execute Anonymous
- D. Can install application metadata from a central repository
- E. Can create scratch orgs. - CORRECT ANSWER-ANSWER:ADE

Universal Containers (UC) Customer Community is scheduled to go live in the Europe, Middle East, and Africa (EMEA) region in 3 months. UC follows a typical centralized governance model. Two weeks ago, the project stakeholders informed the project team about the recent changes in mandatory compliance Requirements needed to go live. The project team analyzed the requirements and have estimated additional budget needs of 30% of the project cost for incorporating the compliance requirements. Which management team is empowered to approve this additional budget requirements?

- A. O Executive Steering Committee
- B. Change Control Board
- C. Security Review Committee
- D. Project Management Committee - CORRECT ANSWER-ANSWER:A

4 . Universal Containers (UC) is planning to move to Salesforce Sales Cloud and retire its homegrown on-premise system. As part of the project, UC will need to migrate 5

2026 Development-Lifecycle-and-Deployment-Architect Exam Study Solutions - Salesforce Salesforce Certified Development Lifecycle and Deployment Architect - Latest Development-Lifecycle-and-Deployment-

Architect Preparation

We have a large number of regular customers exceedingly trust our Salesforce Certified Development Lifecycle and Deployment Architect practice materials for their precise content about the exam. You may previously have thought preparing for the Development-Lifecycle-and-Deployment-Architect practice exam will be full of agony, actually, you can abandon the time-consuming thought from now on. Our practice materials can be understood with precise content for your information, which will remedy your previous faults and wrong thinking of knowledge needed in this exam. As a result, many customers get manifest improvement and lighten their load by using our Development-Lifecycle-and-Deployment-Architect practice materials. Up to now, more than 98 percent of buyers of our practice materials have passed it successfully. Development-Lifecycle-and-Deployment-Architect practice materials can be classified into three versions: the pdf, the software and the app version. So we give emphasis on your goals, and higher quality of our Development-Lifecycle-and-Deployment-Architect practice materials.

Salesforce Certified Development Lifecycle and Deployment Architect Sample Questions (Q114-Q119):

NEW QUESTION # 114

Universal Containers (UC) works with different partners and has few admin resources that take care of the day-to-day deployment tasks. As a result, UC would like to find a way to automate the deployments using Metadata API. Which two limitations of Metadata API should be considered when using Metadata API-based Deployments? Choose 2 answers

- A. Maximum Size of deployed .zip file is 39MB.
- B. Deploy up to 10,000 files, but retrieve more than 10,000 files.
- C. Maximum size of deployed .zip file is 400MB.
- D. Deploy and retrieve up to 10,000 files at once.

Answer: A,B

Explanation:

Explanation

The maximum size of deployed .zip file is 39MB for Metadata API. You can deploy up to 10,000 files, but retrieve more than 10,000 files using Metadata API.

NEW QUESTION # 115

Universal Containers (UC) has recently acquired other companies that have their own Salesforce orgs. These companies have been merged as new UC business units.

The CEO has requested an architect to review the org strategy, taking into consideration two main factors:

* The CEO wants business process standardization among all business units.

* Business process integration is not required as the different business units have different customers and expertise.

Which org strategy should the architect recommend in this scenario, and why?

- A. Multi-org strategy, as it is uncommon for the diversified business units to get used to working in the same space as the other business units.
- B. Single-org strategy, as costs increase as the number of orgs go up.
- C. Single-org strategy, as the high level of business process standardization will be easier to implement in a single org.
- D. A Multi-org strategy, as they could deploy a common managed package into the orgs of the different business units.

Answer: C

Explanation:

A single-org strategy is the best option for UC, as it will enable them to achieve business process standardization among all business units, which is the main goal of the CEO. A multi-org strategy would make it harder to enforce consistent processes and policies across the different business units, and would also increase the costs and complexity of managing multiple orgs. A common managed package could help with some aspects of standardization, but it would not cover all the possible scenarios and customizations that UC might need.

NEW QUESTION # 116

Universal Containers (UC) maintains its Salesforce org using its internal tools and processes for managing its application lifecycle.

The UC team has been facing challenges on their development processes in their recent two releases. The architect has

recommended the UC team to follow the org development model to address the challenges faced.
Which two characteristics of the org development model will help UC address the challenges?
Choose 2 answers

- A. Automated defect fixing
- **B. Automated deployment**
- C. Automated sandbox provisioning
- **D. Automated change tracking**

Answer: B,D

NEW QUESTION # 117

Universal Containers (UC) has a large user base (>300 users) and was originally implemented eight years ago by a Salesforce Systems Integration Partner. Since then, UC has made a number of changes to their Visual force pages and Apex classes in response to customer requirements, made by a variety of Vendors and internal teams. Which three issues would a new Technical Architect expect to see when evaluating the code in the Salesforce org? Choose 3 answers

- **A. Duplicated logic across Visual force pages and Apex classes performing similar tasks.**
- **B. Custom built JSON and String manipulation Classes that are no longer required.**
- C. Broken functionality due to Salesforce upgrades.
- D. Multiple unit test failures would be encountered.
- **E. Multiple triggers on the same object, making it hard to understand the order of operations.**

Answer: A,B,E

NEW QUESTION # 118

Due to several issues, Universal Containers wants to have better control over the changes made in the production org and to be able to track them. Which two options will streamline the process? Choose 2 answers

- A. Make all code/configuration changes directly in the production org.
- **B. Use Metadata API to automate deployment to the production.org**
- **C. Allow no code/configuration changes directly in the production.org**
- D. Use the Force.com IDE to automate deployment to the production.org

Answer: B,C

NEW QUESTION # 119

.....

We provide you the Development-Lifecycle-and-Deployment-Architect practice materials, which include both the questions and answers, and you can improve your ability for the Development-Lifecycle-and-Deployment-Architect exam through practicing the materials.
