Oracle 1z0-1127-24 Practice Test - Effortless Solution To Pass Exam
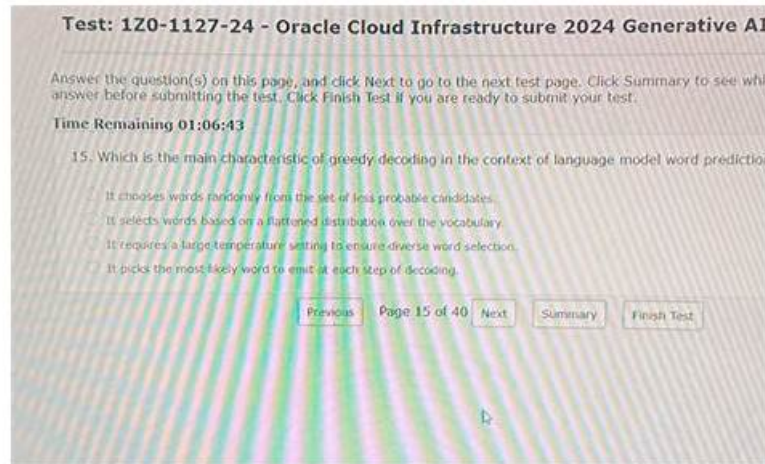

Due to busy routines, applicants of the Oracle Cloud Infrastructure 2024 Generative AI Professional (1z0-1127-24) exam need real Oracle exam questions. When they don't study with updated Oracle 1z0-1127-24 practice test questions, they fail and lose money. If you want to save your resources, choose updated and actual 1z0-1127-24 Exam Questions of BraindumpQuiz. At the BraindumpQuiz offer students Oracle 1z0-1127-24 practice test questions, and 24/7 support to ensure they do comprehensive preparation for the 1z0-1127-24 exam.

Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. 1z0-1127-24 test questions have the function of supporting printing in order to meet the need of customers. You can print our 1z0-1127-24 Exam Question on papers after you have downloaded it successfully. It not only can help you protect your eyes, but also it will be very convenient for you to make notes. We believe that you will like our 1z0-1127-24 exam prep.

Free PDF 1z0-1127-24 - The Best Oracle Cloud Infrastructure 2024 Generative AI Professional Test Pass4sure

This is a good way to purchase valid exam preparation materials for your coming 1z0-1127-24 test. Good choice will make you get double results with half efforts. Good exam preparation will point you a clear direction and help you prepare efficiently. Our 1z0-1127-24 exam preparation can not only give a right direction but also cover most of the real test questions so that you can know the content of exam in advance. You can master the questions and answers of Oracle 1z0-1127-24 Exam Preparation, even adjust your exam mood actively.

Oracle Cloud Infrastructure 2024 Generative AI Professional Sample Questions (Q64-Q69):

NEW QUESTION # 64
Which is NOT a category of pertained foundational models available in the OCI Generative AI service?

- A. Summarization models
- B. Generation models
- C. Embedding models
- D. Translation models

Answer: D

Explanation:
In the OCI Generative AI service, the categories of pre-trained foundational models available include Summarization models, Generation models, and Embedding models. However, Translation models are not listed as a category of pre-trained foundational models available in OCI Generative AI service. The service focuses on providing models that support text generation, summarization, and embedding tasks.
Reference

Listings and descriptions of pre-trained foundational models in OCI

NEW QUESTION # 65
What does a higher number assigned to a token signify in the "Show Likelihoods" feature of the language model token generation?

- A. The token is more likely to follow the current token.
- B. The token is less likely to follow the current token.
- C. The token is unrelated to the current token and will not be used.
- D. The token will be the only one considered in the next generation step.

Answer: A

Explanation:
In the "Show Likelihoods" feature of language model token generation, a higher number assigned to a token indicates that the token is more likely to follow the current token. This likelihood is based on the model's probability distribution, where tokens with higher probabilities are considered more likely to be the next in the sequence. This feature helps in understanding the model's decision-making process and the relative probabilities of different tokens.
Reference
Technical documentation on language model token generation

NEW QUESTION # 66
Which Oracle Accelerated Data Science (ADS) class can be used to deploy a Large Language Model (LLM) application to OCI Data Science model deployment?

- A. Chain Deployment
- B. Text Leader
- C. GenerativeAI
- D. RetrievalQA

Answer: C

NEW QUESTION # 67
How are documents usually evaluated in the simplest form of keyword-based search?

- A. Based on the number of images and videos contained in the documents
- B. According to the length of the documents
- C. By the complexity of language used in the documents
- D. Based on the presence and frequency of the user-provided keywords

Answer: D

Explanation:
In the simplest form of keyword-based search, documents are evaluated based on keyword matching and term frequency. This approach does not account for context, semantics, or the meaning behind the words, but rather focuses on:
Presence of Keywords - If a document contains the search term, it is considered relevant.
Term Frequency (TF) - The more a keyword appears in a document, the higher the ranking in basic search algorithms.
Inverse Document Frequency (IDF) - Words that are common across many documents (e.g., "the," "is") are given less weight, while rare words are prioritized.
Boolean Matching - Some basic search engines support logical operators like AND, OR, and NOT to refine keyword searches.
Exact Match vs. Partial Match - Some systems prioritize exact keyword matches, while others allow partial or fuzzy matches.

☐ Oracle Generative AI Reference:
Oracle has implemented semantic search and advanced AI-driven document search techniques in its cloud solutions, but traditional keyword-based search still forms the foundation of many enterprise search mechanisms.

NEW QUESTION # 68
Which is a key characteristic of the annotation process used in T-Few fine-tuning?

- **A. T-Few fine-tuning relies on unsupervised learning techniques for annotation.**
- B. T-Few fine-tuning uses annotated data to adjust a fraction of model weights.
- C. T- Few fine-tuning involves updating the weights of all layers in the model.
- D. T-Few fine-tuning requires manual annotation of input-output pain.

Answer: A

NEW QUESTION # 69
......

Managing time during the Oracle 1z0-1127-24 exam is a challenging task. Most candidates cannot manage their time during the Oracle 1z0-1127-24 exam, leave the questions, and fail. Time management skills can help students gain excellent marks in the 1z0-1127-24 Exam. Oracle 1z0-1127-24 practice exam on the software help you identify which kind of 1z0-1127-24 questions are more time-consuming, and they would be able to assess their efficiency in answering questions.
