| Topic 8 | <ul style="list-style-type: none"> <li>Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.</li> </ul>  |

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q73-Q78):

### NEW QUESTION # 73

What can you do with evaluation points?

- A. Influence the search sequence of storage types, storage sections, and bin types
- B. Use them to measure the efficiency of your warehouse
- **C. Influence which warehouse order is assigned to a resource**
- D. Influence which items shall be picked first

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Evaluation points in SAP EWM are used within the resource management framework to prioritize and assign warehouse orders to resources (e.g., warehouse workers or equipment). Option A ("Influence which warehouse order is assigned to a resource") is correct because evaluation points are calculated based on factors like order urgency, resource proximity, or queue assignment, configured in SPRO: SCM Extended Warehouse Management > Resource Management > Define Evaluation Points. This influences the system's decision on resource allocation. Option B is incorrect as item picking sequence is determined by picking strategies (e.g., FIFO), not evaluation points. Option C relates to storage type search sequences, not evaluation points. Option D is a broader warehouse efficiency goal but not a direct function of evaluation points.

#### NEW QUESTION # 74

What can a warehouse order include? Note: There are 2 correct answers to this question.

- A. Warehouse requests
- B. Wave items
- C. Physical inventory items
- D. Warehouse tasks

**Answer: A,C**

#### NEW QUESTION # 75

Which of the following are storage type roles? Note: There are 3 correct answers to this question.

- A. Work Center in Staging Area Group
- B. Production Supply
- C. Identification Point
- D. Conveyor System
- E. Deconsolidation

**Answer: A,B,C**

#### NEW QUESTION # 76

You need to create warehouse tasks for putaway. Which SAP Extended Warehouse Management document do you use as your reference document?

- A. Inbound delivery notification
- B. Inbound delivery
- C. Posting change request
- D. Expected goods receipt

**Answer: B**

Explanation:

To create warehouse tasks for putaway in SAP EWM, the reference document is:

\* A. Inbound Delivery:

\* The inbound delivery is used to initiate putaway processes and serves as the basis for creating warehouse tasks.

\* It contains all necessary details, such as product, quantity, and source location.

Incorrect Options:

\* B: The inbound delivery notification is a precursor to the inbound delivery.

\* C: Posting change requests are used for inventory updates, not putaway.

\* D: Expected goods receipt provides preliminary information but is not used directly for task creation.

References:

\* SAP Help Portal: Inbound Delivery Processing

\* SAP EWM Documentation: Warehouse Task Creation

#### NEW QUESTION # 77

For which processes can you create a direct outbound delivery order? Note: There are 3 correct answers to this question.

- A. Direct sales
- B. Inventory difference
- C. Replenishment
- D. Issue to cost center
- E. Scrapping

**Answer: A,D,E**

A direct outbound delivery order is created for scenarios where goods are directly moved out of the warehouse without standard intermediate steps. The applicable processes include:

\* A. Scrapping:

\* Used to dispose of damaged or obsolete stock directly from the warehouse.

\* D. Issue to Cost Center:

\* Materials issued for internal consumption or to a specific cost center.

\* E. Direct Sales:

\* Goods sold directly from the warehouse to customers, bypassing typical outbound processing.

Incorrect Options:

\* B: Replenishment involves internal movements and does not create outbound delivery orders.

\* C: Inventory differences are adjusted during inventory procedures, not via outbound deliveries.

References:

\* SAP Help Portal: Direct Outbound Delivery Order Scenarios

\* SAP EWM Documentation: Outbound Delivery Order Processing
