F5 BIG-IP LTM Specialist: Architect Set-Up & Deploy Sample Questions

(Q85-Q90):

NEW QUESTION # 85

You want to enforce strict separation of failover control traffic and data traffic. Which configuration is required?

- A. Use HA group scoring
- **B. Dedicate a VLAN for ConfigSync**
- C. Use management IPs only
- D. Create separate trust domains

Answer: B

NEW QUESTION # 86

The picture belongs to static content, you can configure static content cache in FS to meet this demand. An LTM Specialist must configure session persistence for a highly available, highly utilized web-based application.

* The following requirements are provided:

* http proxy setup for security

persistence information available to the HA peer in case of failover

The LTM Specialist needs to minimize additional burden on the LTM device to the greatest extent possible.

Which persistence profile should be used?

- A. Source Address Affinity
- B. Universal
- **C. Cookie insert**
- D. Destination Address Affinity

Answer: C

NEW QUESTION # 87

A customer configures two traffic-groups. One traffic-group contains all application VIPs, and the second contains routing and NAT objects. What is the main benefit?

- **A. Allows independent failover of control-plane and data-plane objects**
- B. Enhances redundancy by isolating virtual addresses
- C. Enables distributed load balancing across both devices
- D. Prevents both devices from ever being active at the same time

Answer: A

NEW QUESTION # 88

An LTM specialist needs to create a new account with the admin role called 'newadmin' and access to all partitions. Which tmsh command should be executed?

- A. create /user newadmin partition-access add (all-partitions {role admin }) prompt- for-password.
- **B. create /auth user newadmin partition-access add {all-partitions {role admin }} prompt for-password.**
- C. create /users newadmin partition-access add {all-partitions {role admin JJ prompt for-password.
- D. create / sys user newadmin partition-access add (all-partitions {role admin }) prompt-for-password.

Answer: B

Explanation:

Examining the use of commands, the creation of user is subordinate to auth

NEW QUESTION # 89

A customer wants to select the pool for an application based on information found in the path of the URL.
