2026 ISO-IEC-27001-Foundation Exam Collection Pdf | Valid 100% Free Exams ISO/IEC 27001 (2022) Foundation Exam Torrent

We provide APMG-International ISO-IEC-27001-Foundation exam product in three different formats to accommodate diverse

learning styles and help candidates prepare successfully for the ISO-IEC-27001-Foundation exam. These formats include ISO-IEC-27001-Foundation web-based practice test, desktop-based practice exam software, and ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) pdf file. Before purchasing, customers can try a free demo to assess the quality of the APMG-International ISO-IEC-27001-Foundation practice exam material.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 2	<ul style="list-style-type: none"> Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 3	<ul style="list-style-type: none"> Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 4	<ul style="list-style-type: none"> Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 5	<ul style="list-style-type: none"> Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 6	<ul style="list-style-type: none"> Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 7	<ul style="list-style-type: none"> Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

Who determines the number of days required for a certification audit?

- A. Both the management representative and the external auditor together
- **B. The external auditor from the Certification Body who will undertake the audit**
- C. The management representative from the organization to be audited
- D. The lead internal auditor from the organization to be audited

Answer: B

Explanation:

Certification audits are carried out by Certification Bodies (CBs), not the organization itself. ISO/IEC 27001 requires external certification audits to be independent, impartial, and objective. According to ISO/IEC 27006 (Requirements for bodies providing audit and certification of ISMS), the Certification Body determines the audit duration and number of audit days based on factors such as organizational size, complexity, scope, and risk environment. This ensures consistency across organizations and prevents manipulation by the auditee. ISO/IEC 27001 Clause 9.2 and 9.3 address internal audit and management review, but the determination of certification audit days is outside the organization's control; it rests solely with the accredited Certification Body auditors. Thus, answer: B is correct, as the CB's external auditor formally calculates and assigns the audit time.

NEW QUESTION # 47

Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- A. A statement of correspondence between other ISO standards and the ISMS
- **B. Records of management decisions related to continual improvement**
- C. Third party information security awareness materials
- D. The budget assigned to operate the ISMS and its related allocations

Answer: B

Explanation:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentation necessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third-party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includes records of management review decisions related to continual improvement, confirming answer: A.

NEW QUESTION # 48

Which activity is an operational planning and control requirement?

- A. Perform information security risk assessments at planned intervals
- B. Document information security objectives
- C. Scheduling of second party audits
- **D. Review the consequences of unintended changes**

Answer: D

Explanation:

Clause 8.1 (Operational planning and control) requires organizations to:

"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).

Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

NEW QUESTION # 49

Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO/IEC 27001?

- A. To track the use of outsourced processes
- **B. To evaluate information security performance**
- C. To monitor the use of information assets
- D. To ensure that employees and contractors are competent

Answer: B

Explanation:

Clause 9.1 requires:

"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.

Thus, the verified purpose is A: To evaluate information security performance.

NEW QUESTION # 50

Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- A. Conduct an audit of an Accredited Training Organization
- **B. Conduct an internal audit of the organization**
- C. Conduct an audit of a Certification Body
- D. Conduct a surveillance audit of their own area of the organization

Answer: B

Explanation:

ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 51

.....

If your answer is yes then you need to start Channel Partner Program ISO-IEC-27001-Foundation test preparation with APMG-International ISO-IEC-27001-Foundation PDF Questions and practice tests. With the ValidTorrent Channel Partner Program ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation Practice Test questions you can prepare yourself shortly for the final ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation exam.
