

Braindumps Microsoft AZ-305 Torrent - Valid AZ-305 Exam Prep

2025 Latest ActualPDF AZ-305 PDF Dumps and AZ-305 Exam Engine Free Share: <https://drive.google.com/open?id=1mnv5NPnKkqN7S3Fe4FI08nVYZgqLO2q5>

For Microsoft AZ-305 certification test, are you ready? The exam comes in sight, but can you take the test with confidence? If you have not confidence to sail through your exam, here I will recommend the most excellent reference materials for you. The latest AZ-305 Certification Training dumps that can pass your exam in a short period of studying have appeared. The dumps are provided by ActualPDF.

Microsoft AZ-305 exam is a certification test that assesses the candidate's skills and knowledge in designing solutions on the Microsoft Azure platform. AZ-305 exam is intended for individuals who have experience in designing and implementing Azure solutions and are looking to validate their skills and knowledge. AZ-305 exam is designed to evaluate the candidate's ability to design solutions that meet the needs of customers with a focus on security, scalability, and reliability.

The AZ-305 Certification Exam is designed to measure the candidate's skills in different areas of Azure infrastructure solutions design. These areas include designing compute solutions, designing storage solutions, designing networking solutions, designing security solutions, and designing monitoring solutions. AZ-305 exam is intended to test the candidate's ability to design solutions that meet specific business requirements, technical constraints, and compliance needs.

Desktop Microsoft AZ-305 Practice Exam Software Offers a Realistic Certification Test Environment

If moving up in the fast-paced technological world is your objective, Microsoft is here to help. The excellent Designing Microsoft Azure Infrastructure Solutions (AZ-305) practice exam from Microsoft can help you realize your goal of passing the Microsoft Treasury with Designing Microsoft Azure Infrastructure Solutions (AZ-305) certification exam on your very first attempt. Most people find it difficult to find excellent Microsoft Treasury with Designing Microsoft Azure Infrastructure Solutions (AZ-305) exam dumps that can help them prepare for the actual Designing Microsoft Azure Infrastructure Solutions (AZ-305) exam.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q126-Q131):

NEW QUESTION # 126

You manage a database environment for a Microsoft Volume Licensing customer named Contoso, Ltd. Contoso uses License Mobility through Software Assurance.

You need to deploy 50 databases. The solution must meet the following requirements:

Support automatic scaling.

Minimize Microsoft SQL Server licensing costs.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Purchase model:  Deployment option:

DTU
vCore
Azure reserved virtual machine instances

An Azure SQL managed instance
An Azure SQL Database elastic pool
A SQL Server Always On availability group

Answer:

Explanation:

Purchase model:  Deployment option:

DTU
vCore
Azure reserved virtual machine instances

An Azure SQL managed instance
An Azure SQL Database elastic pool
A SQL Server Always On availability group

NEW QUESTION # 127

You plan to deploy multiple instances of an Azure web app across several Azure regions.

You need to design an access solution for the app. The solution must meet the following replication requirements;

* Support rate limiting.

* Balance requests between all instances.

* Ensure that users can access the app in the event of a regional outage.

Solution: You use Azure Traffic Manager to provide access to the app.

Does this meet the goal?

- A. No
- **B. Yes**

Answer: B

NEW QUESTION # 128

Case Study 3 - Contoso

Existing Environment: Technical Environment

The on-premises network contains a single Active Directory domain named contoso.com.

Contoso has a single Azure subscription.

Existing Environment: Business Partnerships

Contoso has a business partnership with Fabrikam, Inc. Fabrikam users access some Contoso applications over the internet by using Azure Active Directory (Azure AD) guest accounts.

Requirements: Planned Changes

Contoso plans to deploy two applications named App1 and App2 to Azure.

Requirements: App1

App1 will be a Python web app hosted in Azure App Service that requires a Linux runtime. Users from Contoso and Fabrikam will access App1.

App1 will access several services that require third-party credentials and access strings. The credentials and access strings are stored in Azure Key Vault.

App1 will have six instances: three in the East US Azure region and three in the West Europe Azure region.

App1 has the following data requirements:

- * Each instance will write data to a data store in the same availability zone as the instance.

- * Data written by any App1 instance must be visible to all App1 instances.

App1 will only be accessible from the internet. App1 has the following connection requirements:

- * Connections to App1 must pass through a web application firewall (WAF).

- * Connections to App1 must be active-active load balanced between instances.

- * All connections to App1 from North America must be directed to the East US region. All other connections must be directed to the West Europe region.

Every hour, you will run a maintenance task by invoking a PowerShell script that copies files from all the App1 instances. The PowerShell script will run from a central location.

Requirements: App2

App2 will be a .NET app hosted in App Service that requires a Windows runtime. App2 has the following file storage requirements:

- * Save files to an Azure Storage account.

- * Replicate files to an on-premises location.

- * Ensure that on-premises clients can read the files over the LAN by using the SMB protocol.

You need to monitor App2 to analyze how long it takes to perform different transactions within the application. The solution must not require changes to the application code.

Application Development Requirements

Application developers will constantly develop new versions of App1 and App2. The development process must meet the following requirements:

- * A staging instance of a new application version must be deployed to the application host before the new version is used in production.

- * After testing the new version, the staging version of the application will replace the production version.

- * The switch to the new application version from staging to production must occur without any downtime of the application.

Identity Requirements

Contoso identifies the following requirements for managing Fabrikam access to resources:

- * Every month, an account manager at Fabrikam must review which Fabrikam users have access permissions to App1. Accounts that no longer need permissions must be removed as guests.

- * The solution must minimize development effort.

Security Requirement

All secrets used by Azure services must be stored in Azure Key Vault.

Services that require credentials must have the credentials tied to the service instance. The credentials must NOT be shared between services.

You need to recommend an App Service architecture that meets the requirements for App1.

The solution must minimize costs.

What should you recommend?

- A. one App Service Environment (ASE) per availability zone
- B. one App Service plan per availability zone
- C. one App Service Environment (ASE) per region
- **D. one App Service plan per region**

Answer: D

Explanation:

No need for dedicated environment. So Azure Service Plan per region is enough.

NEW QUESTION # 129

Drag and Drop Question

You plan to import data from your on-premises environment to Azure. The data is shown in the following table.

On-premises source	Microsoft Azure target
A Microsoft SQL Server 2014 database	An Azure SQL database
A table in a Microsoft SQL Server 2016 database	An Azure Cosmos DB for NoSQL account

What should you recommend using to migrate the data? To answer, drag the appropriate tools to the correct data sources. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Tools	Answer Area
AzCopy	
Azure Cosmos DB Data Migration Tool	
Data Management Gateway	
Data Migration Assistant	
	From the SQL Server 2014 database: <input type="text" value="Tool"/>
	From the table in the SQL Server 2016 database: <input type="text" value="Tool"/>

Answer:

Explanation:

Tools	Answer Area
AzCopy	
 Data Management Gateway	
	From the SQL Server 2014 database: <input type="text" value="Data Migration Assistant"/>
	From the table in the SQL Server 2016 database: <input type="text" value="Azure Cosmos DB Data Migration Tool"/>

Explanation:

Box 1: Data Migration Assistant

The Data Migration Assistant (DMA) helps you upgrade to a modern data platform by detecting compatibility issues that can impact database functionality in your new version of SQL Server or Azure SQL Database. DMA recommends performance and reliability improvements for your target environment and allows you to move your schema, data, and uncontained objects from your source server to your target server.

Box 2: Azure Cosmos DB Data Migration Tool

Azure Cosmos DB Data Migration Tool can be used to migrate a SQL Server Database table to Azure Cosmos.

Reference:

<https://docs.microsoft.com/en-us/sql/dma/dma-overview>

<https://docs.microsoft.com/en-us/azure/cosmos-db/cosmosdb-migrationchoices>

NEW QUESTION # 130

You have 10 on-premises servers that run Windows Server.

You need to perform daily backups of the servers to a Recovery Services vault. The solution must meet the following requirements:

- * Back up all the files and folders on the servers.
- * Maintain three copies of the backups in Azure.
- * Minimize costs.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Explanation:

Explanation:

NEW QUESTION # 131

.....

One of the key factors for passing the exam is practice. Candidates must use AZ-305 practice test material to be able to perform at their best on the real exam. This is why ActualPDF has developed three formats to assist candidates in their AZ-305 Preparation. These formats include desktop-based AZ-305 practice test software, web-based practice test, and a PDF format.
