One year free update for Google Associate-Cloud-Engineer is available for all of you after your purchase. DumpsMaterials Associate-Cloud-Engineer pdf download dumps have helped most IT candidates get their Associate-Cloud-Engineer certification. The high quality and best valid Associate-Cloud-Engineer dumps vce have been the best choice for your preparation. You just need to take 20-30 hours to study and prepare, then you can attend your Associate-Cloud-Engineer Actual Test with ease. 100% success is the guarantee of Associate-Cloud-Engineer pdf study material.

Google Associate-Cloud-Engineer exam is a certification exam designed for individuals who have experience working with Google Cloud Platform. Associate-Cloud-Engineer exam is intended to validate an individual's ability to deploy, monitor, and maintain cloud solutions using Google Cloud Platform. Associate-Cloud-Engineer exam is designed for those who have one or more years of experience working with GCP and are looking to validate their skills and knowledge.

To earn the Google Associate-Cloud-Engineer Certification, candidates need to have a good understanding of the GCP infrastructure, networking, and storage services. They should also have experience in deploying and managing applications on GCP. Google Associate Cloud Engineer Exam certification exam consists of multiple-choice questions and practical scenarios that test the candidate's knowledge and skills in these areas.

Test Associate-Cloud-Engineer Sample Online, Associate-Cloud-Engineer Book Free

Our practice exams are designed solely to help you get your Associate-Cloud-Engineer certification on your first try. A Google Associate-Cloud-Engineer practice test will help you understand the exam inside out and you will get better marks overall. It is only because you have practical experience of the exam even before the exam itself. DumpsMaterials offers authentic and up-to-date study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Google Associate Cloud Engineer Exam (Associate-Cloud-Engineer) exam on the first try. The key to passing the Associate-Cloud-Engineer exam on the first try is vigorous practice. And that's exactly what you'll get when you prepare from our material. Each format excels in its own way and helps you get success on the first attempt.

Google Associate Cloud Engineer Exam Sample Questions (Q199-Q204):

NEW QUESTION # 199

&. You are working for a hospital that stores its medical images in an on-premises data room. The hospital wants to use Cloud Storage for archival storage of these images. The hospital wants an automated process to upload any new medical images to Cloud Storage. You need to design and implement a solution. What should you do?

- A. Deploy a Dataflow job from the batch template "Datastore to Cloud Storage" Schedule the batch job on the desired interval
- B. Create a script that uses the gsutil command line interface to synchronize the on-premises storage with Cloud Storage Schedule the script as a cron job
- C. Create a Pub/Sub topic, and enable a Cloud Storage trigger for the Pub/Sub topic. Create an application that sends all medical images to the Pub/Sub topic
- D. In the Cloud Console, go to Cloud Storage Upload the relevant images to the appropriate bucket

Answer: A

NEW QUESTION # 200

You have an application that receives SSL-encrypted TCP traffic on port 443. Clients for this application are located all over the world. You want to minimize latency for the clients. Which load balancing option should you use?

- A. Network Load Balancer
- B. Internal TCP/UDP Load Balancer. Add a firewall rule allowing ingress traffic from 0.0.0.0/0 on the target instances.
- C. **SSL Proxy Load Balancer**
- D. HTTPS Load Balancer

Answer: C

Explanation:

Explanation/Reference: <https://cloud.google.com/load-balancing/docs/ssl>

NEW QUESTION # 201

You're attempting to remove the zone property from the Compute Engine service, that was set with the incorrect value. Which command would accomplish your task?

- A. gcloud config unset zone
- B. gcloud unset compute/zone
- C. gcloud config configurations unset compute/zone
- D. **gcloud config unset compute/zone**

Answer: D

NEW QUESTION # 202

A company wants to build an application that stores images in a Cloud Storage bucket and wants to generate thumbnails as well as resize the images. They want to use a Google managed service that can scale up and scale down to zero automatically with minimal effort. You have been asked to recommend a service. Which GCP service would you suggest?

- A. Google App Engine
- B. **Cloud Functions**
- C. Google Kubernetes Engine
- D. Google Compute Engine

Answer: B

Explanation:

Explanation

Text Description automatically generated with low confidence

Cloud Functions is Google Cloud's event-driven serverless compute platform. It automatically scales based on the load and requires no additional configuration. You pay only for the resources used.

Ref: <https://cloud.google.com/functions>

While all other options i.e. Google Compute Engine, Google Kubernetes Engine, Google App Engine support autoscaling, it needs to be configured explicitly based on the load and is not as trivial as the scale up or scale down offered by Google's cloud functions.

NEW QUESTION # 203

Your Dataproc cluster runs in a single Virtual Private Cloud (VPC) network in a single subnet with range 172.16.20.128/25. There are no private IP addresses available in the VPC network. You want to add new VMs to communicate with your cluster using the minimum number of steps. What should you do?

- A. Create a new VPC network for the VMs. Enable VPC Peering between the VMs' VPC network and the Dataproc cluster VPC network.
- B. Create a new Secondary IP Range in the VPC and configure the VMs to use that range.
- **C. Modify the existing subnet range to 172.16.20.0/24.**
- D. Create a new VPC network for the VMs with a subnet of 172.32.0.0/16. Enable VPC network Peering between the Dataproc VPC network and the VMs VPC network. Configure a custom Route exchange.

Answer: C

Explanation:

/25:

CIDR to IP Range

Result

CIDR Range 172.16.20.128/25

Netmask 255.255.255.128

Wildcard Bits 0.0.0.127

First IP 172.16.20.128

First IP (Decimal) 2886734976

Last IP 172.16.20.255

Last IP (Decimal) 2886735103

Total Host 128

CIDR

172.16.20.128/25

/24:

CIDR to IP Range

Result

CIDR Range 172.16.20.128/24

Netmask 255.255.255.0

Wildcard Bits 0.0.0.255

First IP 172.16.20.0

First IP (Decimal) 2886734848

Last IP 172.16.20.255

Last IP (Decimal) 2886735103

Total Host 256

CIDR

172.16.20.128/24

NEW QUESTION # 204

.....

The prospective clients can examine the format and quality of our Associate-Cloud-Engineer exam braindumps before placing order for the product. As you may find on our website, we have three different versions of our Associate-Cloud-Engineer study questions: the PDF, Software and APP online. Accordingly, we have three different demos for you to free download. And not only the content of the demos is the same with the three versions, but also the displays are the same with the according version of our Associate-Cloud-Engineer learning guide.
