COF-C02 Valuable Feedback - 100% Newest Questions Pool

Practicing with the Snowflake COF-C02 practice test, you can evaluate your Snowflake COF-C02 exam preparation. It helps you to pass the COF-C02 test with excellent results. COF-C02 imitates the actual SnowPro Core Certification Exam exam environment. You can take the Snowflake COF-C02 Practice Exam many times to evaluate and enhance your Snowflake COF-C02 exam preparation level.

Snowflake SnowPro Core Certification Exam Sample Questions (Q621-Q626):

NEW QUESTION # 621
By default, how long is the standard retention period for Time Travel across all Snowflake accounts?

- A. 14 days
- B. 7 days
- C. 0 days
- D. 1 day

Answer: B

NEW QUESTION # 622
Which statement accurately describes how a virtual warehouse functions?

- A. All virtual warehouses share the same compute resources so performance degradation of one warehouse can significantly affect all the other warehouses.
- B. Increasing the size of a virtual warehouse will always improve data loading performance.
- C. Each virtual warehouse is a compute cluster composed of multiple compute nodes allocated by Snowflake from a cloud provider.
- D. Each virtual warehouse is an independent compute cluster that shares compute resources with other warehouses.

Answer: C

NEW QUESTION # 623
A running virtual warehouse is suspended.
What is the MINIMUM amount of time that the warehouse will incur charges for when it is restarted?

- A. 60 minutes
- B. 1 second
- C. 5 minutes
- D. 60 seconds

Answer: D

Explanation:
When a running virtual warehouse in Snowflake is suspended and then restarted, the minimum amount of time it will incur charges for is 60 seconds2.

NEW QUESTION # 624
What action should be taken if a Snowflake user wants to share a newly created object in a database with consumers?

- A. Use the grant privilege ... TO share command to grant the necessary privileges.
- B. Recreate the object with a different name in the database before sharing.

- C. Use the automatic sharing feature for seamless access.
- D. Drop the object and then re-add it to the database to trigger sharing.

Answer: A

Explanation:
When a Snowflake user wants to share a newly created object in a database with consumers, the correct action to take is to use the GRANT privilege ... TO SHARE command to grant the necessary privileges for the object to be shared. This approach allows the object owner or a user with the appropriate privileges to share database objects such as tables, secure views, and streams with other Snowflake accounts by granting access to a named share.
The GRANT statement specifies which privileges are granted on the object to the share. The object remains in its original location; sharing does not duplicate or move the object. Instead, it allows the specified share to access the object according to the granted privileges.
For example, to share a table, the command would be:
GRANT SELECT ON TABLE new_table TO SHARE consumer_share;
This command grants the SELECT privilege on a table named new_table to a share named consumer_share, enabling the consumers of the share to query the table.
Automatic sharing, dropping and re-adding the object, or recreating the object with a different name are not required or recommended practices for sharing objects in Snowflake. The use of the GRANT statement to a share is the direct and intended method for this purpose.

NEW QUESTION # 625
Network policies can be set at which Snowflake levels? (Choose two.)

- A. User
- B. Tables
- C. Role
- D. Account
- E. Database
- F. Schema

Answer: A,D

Explanation:
